IMF Staff Papers, Volume 47, Special Issue, IMF Annual Research Conference, Mr.Robert P. Flood,Mr.Eduardo Borensztein,2001-11-28 This paper presents a broad overview of postwar analytical thinking on international macroeconomics, culminating in a more detailed discussion of recent progress. The paper reviews important empirical evidence that has inspired alternative modeling approaches, as well as theoretical and policy considerations behind developments in the field. The paper presents an empirical study of fiscal policy in countries with extreme monetary regimes. It also examines members of multilateral currency unions, dollarized countries that officially use the money of another country, and countries using currency boards.

Hematology in the Adolescent Female Lakshmi V. Srivaths,2020-08-11 Adolescent females experience a variety of blood disorders that are often unique to this patient population. As they go through puberty, they are uniquely poised to encounter various bleeding and thrombotic disorders once they attain menarche, start to have menstrual bleeding, and require hormonal therapy. This may in turn lead to other medical conditions, such as anemia and iron deficiency. Pregnancy encountered by some adolescents can pose hematologic challenges specifically in regards to bleeding and thrombotic disorders. In addition, adolescent females are at risk to develop immune mediated hematologic disorders, such as immune thrombocytopenia, auto-immune hemolytic anemia, and thrombotic thrombocytopenic purpura, as well as vitamin deficiencies due to pernicious anemia. Sick cell disease, thalassemia and bone marrow failure disorders in the adolescent female poses unique challenges that need to be addressed with special care and attention. Knowledge about these various blood disorders in adolescent females is crucial for the treating physician in order to accurately diagnose and optimally manage these teenagers. Otherwise, it can affect their overall health, causing hematologic and gynecologic issues, poor quality of life, neurocognitive impairments, and poor psycho-social development, all of which can lead to various complications immediately and into adulthood. This book provides a comprehensive, state-of-the art overview of blood disorders in female adolescents. The text presents new data about bleeding disorders that affect the female adolescent, including bleeding disorders, thromboembolism, thrombophilia, anemia, sickle cell disease and thalassemia, disorders of hemostasis and thrombosis in pregnancy, immune hematology and bone marrow failure disorders; reviews our current understanding of these disorders; outlines recent research findings; and spotlights multi-disciplinary approaches, evaluation and treatment modalities to combat these blood disorders. Written by experts in the field, Hematology in the Adolescent Female is a valuable resource for clinicians and practitioners who treat and manage female adolescents with blood disorders.

Powder and Grains 2001 Y. Kishino,2020-12-17 The topics discussed in this text range from quasi-static problems to dynamic problems, and are divided into 15 groups, such as: cohesion/cracking; wave propagation; and quasi-static behaviour. Each group contains theoretical, experimental and computational approaches by researchers.

Cryptosporidium Mark S Smith,K Clive Thompson,2007-10-31 Cryptosporidium, in its various forms, is a widely recognised cause of outbreaks of waterborne disease. Regulatory bodies worldwide are increasingly requiring the development of fit-for-purpose detection methods for this protozoan parasite, but analysis is often problematic. Bringing together international academic and industry-based experts, this book provides a comprehensive review of the current state of analytical techniques for the detection of Cryptosporidium, as well as looking at likely future developments. In particular, the issues of species identification and oocyst viability are addressed. Quality assurance issues and potential problems associated with the new Cryptosporidium regulations are also highlighted. The extent of the perceived problems and the regulatory backdrop against which the analysis must be carried out are also discussed. Scientists in the water industry, environmental testing laboratories, researchers, consultants, environmental health professionals, food manufacturers and regulatory or environmental bodies are amongst the many who should read this book. In addition, anyone with an interest in microbiological challenges and problem-solving will welcome the coverage.

Stress-Free Navigation Duncan Wells,2019-09-19 You might think stress-free navigation sounds like an impossible paradox. But it need not be. All boaters, whether under sail or under power, need to be able to navigate safely on the water – both to keep themselves and their crew out of trouble and to avoid endangering others. Yet navigation has often been presented almost as a black art – complicated, full of tricky maths, and with alien concepts to get your head around. Step in 'Mr Stress-Free': having in his previous books presented techniques for sailing and motorboating in an accessible, manageable fashion, Duncan Wells now turns his attention to navigation. He makes concepts easy to understand and the practice of navigation perfectly achievable for all – with minimum stress. The book covers the basic introductory elements clearly and simply for novices, and progresses through more advanced techniques for experienced navigators, so that there is something for everyone, whatever their skill level. Diagrams, quick-reference tables and flowcharts, explanatory step-by-step photographs, box features, top tips and QR codes – giving access to explanatory videos – are all features that have been much appreciated by readers of Duncan's other top-selling titles.

Esterases, Lipases, and Phospholipases M.I. Mackness,M. Clerc,2013-11-21 The NATO-Advanced Research Workshop Esterases, Lipases and Phospholipases: From Structure to Clinical Significance was held at the University of Bordeaux II, France from 22nd- 24th September 1993 under the Directorship of Professor Michel Clerc of the University of Bordeaux II. The meeting was organised by Hugues Chap (INSERM U 326, Toulouse, France), Georges Ferard (University of Strasbourg, France), Wolfgang Junge (University of Kiel, Germany) and Michael Mackness (University of Manchester, UK). In recent years it has become increasingly apparent that hydrolytic enzymes of the esterase, lipase and phospholipase type play central roles in the pathophysiology of many human diseases. The purpose of this NATO-ARW was to bring together experts (both clinical and scientific) in all three interrelated fields to review the current basic and clinical position and discuss future developments particularly with respect to future research aimed at determining the basic biochemical lesion involving hydrolytic enzymes involved in human disease and the use of these enzymes in diagnosis. As well as formal lectures from established researchers, the meeting also involved a number of lively round-table discussions on future developments and presentations from younger research workers, all of which are recorded in this Proceedings and which contribute to the success of the meeting.

Theory of Electrophoresis and Diffusiophoresis of Highly Charged Colloidal Particles Eric Lee,2018-11-30 Theory of Electrophoresis and Diffusiophoresis of Highly Charged Colloidal Particles discusses the electrophoretic and diffusiophoretic motions of various colloidal entities, such as rigid particles, liquid droplets, gas bubbles, and porous particles, focusing on the motion-detering double-layer polarization effect pertinent to highly charged particles, with the lowly charged ones serving as the limiting cases. Boundary effects such as those from a cylindrical pore, a solid plane, or an air-water interface are analyzed as well for the electrophoretic motion of the various particles considered. Dynamic electrophoresis is also explored and treated. The contents are suitable for researchers, graduate students, or senior college students with some basic background of colloid science and transport phenomena. As there is no closed-form analytical formula in general for the situation of highly charged particles, the results are presented with extensive figures and plots as well as tables under various electrokinetic situations of interest to facilitate the possible use of interested readers. Provides a reliable quantitative prediction of highly charged particles motion with easy-to-apply charts and in-depth understanding of the underlying mechanisms Offers an extensive treatment of direct quantitative predication for non-rigid systems, such as porous particles, liquid drops, and gels, which is especially valuable in proteins and DNA research Discusses highly charged systems with a nearby boundary of practical interests, such as a pore, a solid plane, or an air-water interface, which is of vital interest in fields such as microfluidic operations and biomedical engineering Affords special attention to the polarization effect

Robotic Radiosurgery Treating Prostate Cancer and Related Genitourinary Applications Lee E. Ponsky,Donald B. Fuller,Robert M. Meier,Charlie Ma,2011-11-19 The treatment of prostate cancer continues to be problematic owing to serious side-effects, including erectile dysfunction and urinary incontinence. Robotic radiosurgery offers a novel, rapid, non-invasive outpatient treatment option that combines robotics, advanced image-guided spatial positioning, and motion detection with submillimeter precision. This book examines all aspects of the treatment of prostate cancer with robotic radiosurgery. It explains how image-guided robotic radiosurgery overcomes the problem of patient motion during radiation therapy by continuously identifying the precise location of the prostate tumor throughout the course of treatment. Hypofractionated radiation delivery by means of robotic radiosurgery systems is also discussed in detail. The book closes by examining other emerging genitourinary applications of robotic radiosurgery. All of the authors are experts in their field who present a persuasive case for this fascinating technique.
