**Mobile App Trends In 2015** Vindimear Heart, 2015-03-04 Mobile App Trends in 2015: For Mobile App Marketing As we move into 2015 with lots of wishes and expectations, one thing that also follows us is: people are increasingly moving from the disconnected world to the continuously connected one. People all around the globe are buying and adopting smart devices with a great pace, trying to change their ways of approach to life - changing the way we entertain, interact, educate and shop. According to a survey it is expected to continue with around 50 billion connected devices expected by 2020. For the past 15 years, enterprises and consumers have been using mobile devices primarily to communicate and collaborate. Today's mobile devices are pocket-able supercomputers, and when they're combined with broadband networks and public cloud services, they become extremely powerful business tools. Next year will be the first year that companies mobilize revenue-generating processes. Retail and Banking led this charge, moving large processes, like shopping and check deposits, to Smartphone and tablets. This move will continue to expand into other industries as the Smartphone and tablet replace the PC as a person's primary compute device.

**Mobilized** S. C. Moatti, 2016-05-02 That person slumped over her cell phone is disengaged, isolated, lost in her own little world, right? Wrong, says SC Moatti. She's highly engaged - she's having a text conversation with a friend in Europe, playing a game with another, and looking for a good place to go to dinner with a third. Mobile technology has become such an integral part of how we interact that for many people losing a cell phone is like losing a limb. And the most successful mobile apps that are precisely those that enhance and multiply the frequency and power of our real - world interactions. Moatti - a technologist and industry insider - says these kinds of mobile apps adhere to three universal principles: they must have a simple design, enable the user to personalize them, and be continually improved by their makers through relentless attention to analytics. She uses examples from a host of great mobile app creators - Facebook, Yelp, Lyft, Tinder, Airbnb, Trulia, WhatsApp, and more - to demonstrate how it's done. Even as technology evolves and smartphones are replaced by smaller mobile devices such as watches and contact lenses, these three principles will remain evergreen. The market is full of how - to books for creating apps, but no works examine what qualities make for great mobile products. Until now.
