The Seventh Child Howard Kaminsky,2016-06-21 The man wasn't worried about attracting attention. Because he wasn't doing anything wrong. Oh, ultimately he was doing something very wrong. He smiled at the thought of it. But now he was just waiting and watching. Watching for a particular little girl....The man looked again at the photograph. The last piece was in place. Everything was a perfect match. The town of Ripton Falls, where the Richardson family comes to settle, is idyllic: nestled in the Berkshires, it boasts a stunning village green, large old houses, and a breathtaking setting. It is perfect for Hal and Judy Richardson and their nine-year-old daughter, Annie. Recruited overnight fro a frustrating job in Los Angeles by the Hilliards, Ripton Falls' oldest family, they and several other families join the Hilliards' privately owned firm in what seems a stroke of good luck. They are happier than they have been in years. But then the accidents begin. None is fatal, and some are so slight as to seem frivolous. It is Judy Richardson who first notices the disturbing and unmistakable pattern emerging as one by one the children of the new families are singled out. An obscure reference to a centuries-old legend begins to take on meaning for her--a legend about seven other children, children apparently so evil that the town had to erase from its history all record of their existence. As July and Hal's suspicions grow, speculation turns to realization and then to horror: Thy have been brought to Ripton Falls for a specific reason and for one reason and for one reason only: for their daughter, Annie.

Light and Obscurity in Symbolism Deborah Cibelli,Rosina Neginsky,2016-01-14 The idea of light and darkness is one of the central ideas of the Symbolist movement, since this is a movement of contrasts. It encompasses the major themes of Symbolism, such as good and evil, beauty and ugliness, the visible and the invisible, and the divine and the earthly. This volume brings together a range of studies in order to understand the notion of light and darkness and a variety of its Symbolist interpretations. It also stresses the interdisciplinary nature of the concepts of light and darkness in Symbolism, as well as the cohabitation and symbiosis of both, which are together or separately at the core of this movement.

Time, Light and the Dice of Creation Philip Franses,2015-10-22 The laws of modern physics are seen as the bedrock of our understanding of the material world that surrounds us. Newton's and Maxwell's mathematics reliably describe behaviour and events in the world, and have given us the age of technology from telephones to space travel. Yet the founders of modern scientific thought, such as Einstein, Bohr, Heisenberg and Pauli, struggled to pin down the paradoxical concepts they needed to present 'workable' theories, as the subatomic and quantum world began to reveal its mysteries. At the height of the debate about the nature of matter, Einstein famously objected that 'God does not play dice'. Starting from the significance of zero and one, with their contrasting Eastern and Western philosophies, Franses unravels the knots that surround elusive concepts such as matter, chance, time, light, darkness, emptiness, and form. Exploring current models in science, he asks: does light travel in time? Or is it time that travels in light? How can emptiness hold potential? Can chance create order? What does our own experience mean in all this? In this stimulating book, the author invites us to travel through a journey, and a life, full of surprise and ambiguity, from paradoxes in physics to the meaning of time and the mythology of creation.
