Island of the Dragons T. R. Hartman, 2017-09-15 Johnathon Livingston Carter IV just finished his freshman year at UCLA and had been invited to serve as an intern for an archeological expedition that would be searching for tombs in the cliff walls where the Cliff Dweller people had lived in the desert of Northern Arizona. A tomb is found that will rewrite history. Follow their team as they discover a people that circumnavigated the world in 500 BC and as they retrace an ancient map to an ancient island inhabited by ancient living dragons.

The Flashlight Alec Yates, 2016-08-29 A group of children finds an abandoned house. They go inside to explore, go upstairs and find a large trunk, open it up, and find documents and a flashlight. They turn it on. They realize its not just another flashlight. They go through the portal, search for the inventor, find him, return the flashlight, and come home.

From Traditional to Ecological Stephen Houghton, 2006 The majority of research conducted in the field of Attention Deficit/Hyperactivity Disorder (AD/HD) has comprised laboratory-based psychological studies using highly repetitive and boring tasks. Hence, the generalisability of such work is somewhat limited. This book describes, in three sections, a unique research program which successfully sought to achieve ecological validity in research. Specifically, the three sections describe: the historical conceptualisation of AD/HD and the emergence of models of AD/HD; the development of a unique quantitative research program incorporating studies using a traditional approach through to those conducted in naturalistic settings; and the initiation of a related 'grounded theory' research approach to bringing about a fuller understanding of the everyday experiences of individuals with AD/HD.

THE POLICE OFFICER'S GUIDE TO OPERATING AND SURVIVING IN LOW-LIGHT AND NO-LIGHT CONDITIONS Tony L. Jones,2002-01-01 The majority of crimes occur during the hours of darkness, and fully two-thirds of all shooting incidents in which police officers on duty are killed take place during hours of diminished light. The goal of this unique book is to increase officers' awareness that training in low-light and no-light conditions is necessary in order for them to prevail in such situations, to help facilitate correct decision making under these conditions, and to help them understand the use of a myriad of illumination tools available for professional use today. Major topics include: (1) dim-light and no-light doctrine, including navigation techniques, threat location, threat acquisition, and threat identification; (2) flashlight doctrine, including many examples of engaging a threat using a flashlight; (3) low-light weapon sighting systems; (4) techniques used for signalling during dim-light and no-light conditions; and (5) illumination technologies supporting tactical and emergency operations, including infrared systems, thermal imagers, night vision systems, strobe lights, and lasers. Through the use of the techniques described throughout this unique and comprehensive book, the skill, professionalism, and ability of police officers to operate and survive in dim-light, no-light, and artificial light conditions will be enhanced

Additionally, many universities and educational institutions have their own digital libraries that provide free access to PDF books and manuals. These libraries often offer academic texts, research

papers, and technical manuals, making them invaluable resources for students and researchers.
