Leonardo's Science Workshop Heidi Olinger, 2019-01-01 Leonardo’s Science Workshop leads children on an interactive adventure through key science concepts by following the multidisciplinary approach of the Renaissance period polymath Leonardo da Vinci: experimenting, creating projects, and exploring how art intersects with science and nature. Photos of Leonardo’s own notebooks, paintings, and drawings provide visual inspiration. More than 500 years ago, Leonardo knew that the fields of science, technology, engineering, art, and mathematics (STEAM) are all connected. The insatiably curious Leonardo examined not just the outer appearance of his art subjects, but the science that explained them. He began his studies as a painter, but his curiosity, diligence, and genius made him also a master sculptor, architect, designer, scientist, engineer, and inventor. The *Leonardo’s Workshop* series shares this spirit of multidisciplinary inquiry with children through accessible, engaging explanations and hands-on learning. This fascinating book harnesses children’s innate curiosity to explore some of Leonardo’s favorite subjects, including flight, motion, technology design, perspective, and astronomy. After each topic is explained with concepts from physics, chemistry, math, and engineering, kids can experience the principles first-hand with step-by-step STEAM projects. They will explore: The physics of flight by observing birds and experimenting with paper airplane designs The science of motion by building a windup dragonfly Gravitational acceleration with water balloons The movement of electrons by making cereal “dance” Technology design by making paper and fabric using recycled material Scientific perspective by drawing a 3D illusion Insight from other great thinkers—such as Galileo Galilei, James Clerk Maxwell, and Sir Isaac Newton—are woven into the lessons throughout. Introduce vital STEAM skills through visually rich, hands-on learning with *Leonardo’s Science Workshop*.

The Man Who Invented the Laser Edwin Brit Wyckoff, 2013-07-01 Maiman was a graduate of the University of Colorado, which awarded him a B.S. in engineering physics in 1949. Later, he received his Ph.D. in physics in 1955 from Stanford University and began work at the Hughes Research Laboratory (HRL). There he concentrated on creating a device capable of converting mixed frequency electromagnetic radiation into highly amplified and coherent light of discrete frequency. Maiman later found that the accepted calculations of the fluorescence quantum efficiency of ruby were wrong and that the material could be used for his research. His persistence with ruby eventually paid off, for on May 16, 1960, the device he built using it became the world's first operable laser.

Featuring easy-to-find, inexpensive parts, this hands-on guide helps you build your skills in working with electronics components and tools while you create an impressive arsenal of spy gear and countermeasures. The only limit is your imagination! 101 Spy Gadgets for the Evil Genius, Second Edition: Contains step-by-step instructions and helpful illustrations Provides tips for customizing the projects Covers the underlying principles behind the projects Removes the frustration factor--all required parts are listed Build these and other devious devices: Spy camera Infrared light converter Night vision viewer Phone number decoder Phone spammer jammer Telephone voice changer GPS tracking device Laser spy device Remote control hijacker Camera flash taser Portable alarm system Camera trigger hack Repeating camera timer Sound- and motion-activated cameras Camera zoom extender

Liturgy as a Way of Life (The Church and Postmodern Culture) Bruce Ellis Benson, 2013-04-15 How do the arts inform and cultivate our service to God? In this addition to an award-winning series, distinguished philosopher Bruce Ellis Benson rethinks what it means to be artistic. Rather than viewing art as practiced by the few, he recovers the ancient Christian idea of presenting ourselves to God as works of art, reenvisioning art as the very core of our being: God calls us to improvise as living works of art. Benson also examines the nature of liturgy and connects art and liturgy in a new way. This book will appeal to philosophy, worship/liturgy, art, music, and theology students as well as readers interested in engaging issues of worship and aesthetics in a postmodern context, including Christian artists and worship leaders.

Bloody Genius John Sandford, 2019-10-01 Virgil Flowers will have to watch his back--and his mouth--as he investigates a college culture war turned deadly in another one of Sandford's madly entertaining Virgil Flowers mysteries (New York Times Book Review). At the local state university, two feuding departments have faced off on the battleground of science and medicine. Each carries their views to extremes that may seem absurd, but highly educated people of sound mind and good intentions can reasonably disagree, right? Then a renowned and confrontational scholar winds up dead, and Virgil Flowers is brought in to investigate . . . and as he probes the recent ideological unrest, he soon comes to realize he's dealing with people who, on this one particular issue, are functionally crazy. Among this group of wildly impassioned, diametrically opposed zealots lurks a killer, and it will be up to Virgil to sort the murderer from the mere maniacs.

The Joy of Physics Arthur W. Wiggins, 2011-08-31 Physics professor and popular science writer, Wiggins, provides the general reader with a fun-filled, entertaining, and truly educational tour. This new paperback edition includes new material and a study guide useful for teachers and self-learners.

The Speed of Light David A. Grandy, 2009-07-06 Light -- our experience of light, our measurement of light, and the notion that light speed is constant -- can be understood to mark our interface with the cosmos. David A. Grandy's book moves from the scientific to the existential, from Einstein to Merleau-Ponty, from light as a phenomenon to light as that which is constitutive of reality. To measure the speed of light is to measure something about the way we are measured or blended into the cosmos, and that universal blending predetermines our measurement of light speed in favor of a universal or constant value. It's quite a trip, one aimed at scientists who have pondered light speed constancy, philosophers inclined to question the idea that mind and world are distinct, and scientifically or philosophically inclined persons who enjoy stretching themselves in new ways.
