A Deadly Eclair Daryl Wood Gerber,2017-11-07 It's always been Mimi Rousseau's dream to open her own bistro, but it seems beyond her grasp since she's been chased back home to Nouvelle Vie in Napa Valley by her late husband's tremendous debt. Until her best friend Jorianne James introduces her to entrepreneur Bryan Baker who invests in promising prospects. Now, working the bistro and inn until she's able to pay it off and call it her own, Mimi is throwing the inn's first wedding ever. The wedding will be the talk of the town, as famous talk show host Angelica Edmonton, daughter of Bryan's half-brother, Edison, has chosen the inn as her perfect venue. Anxious, Mimi is sure things are going to turn south, especially when Edison gets drunk and rowdy at the out-of-towners' dinner, but by the evening, things begin to look up again. That is until six AM rolls around, and Bryan is found dead at the bistro with an éclair stuffed in his mouth. And the fingers point at Mimi, whose entire loan is forgiven in Bryan's will. Now it's up to Mimi to clear her name and get to the bottom of things before the killer turns up the heat again in *A Deadly Eclair*, the scrumptious series debut by Agatha Award-winning author Daryl Wood Gerber.

Chlorophyll a Fluorescence G.C. Papageorgiou,Govindjee,2005-02-15 Chlorophyll a Fluorescence:

A Signature of Photosynthesis highlights chlorophyll (Chl) a fluorescence as a convenient, non-invasive, highly sensitive, rapid and quantitative probe of oxygenic photosynthesis. Thirty-one chapters, authored by 58 international experts, provide a solid foundation of the basic theory, as well as of the application of the rich information contained in the Chl a fluorescence signal as it relates to photosynthesis and plant productivity. Although the primary photochemical reactions of photosynthesis are highly efficient, a small fraction of absorbed photons escapes as Chl fluorescence, and this fraction varies with metabolic state, providing a basis for monitoring quantitatively various processes of photosynthesis. The book explains the mechanisms with which plants defend themselves against environmental stresses (excessive light, extreme temperatures, drought, hyper-osmolarity, heavy metals and UV). It also includes discussion on fluorescence imaging of leaves and cells and the remote sensing of Chl fluorescence from terrestrial, airborne, and satellite bases. The book is intended for use by graduate students, beginning researchers and advanced undergraduates in the areas of integrative plant biology, cellular and molecular biology, plant biology, biochemistry, biophysics, plant physiology, global ecology and agriculture.
