Rescued Brian Brown,2013-09-01 When a family outing in a private plane takes a tragic turn, a Memorial Day trip becomes an unforgettable 15 hours of danger, rescue efforts, and miracles. On a clear Saturday morning, professional fire captain and private pilot Brian Brown, his wife, and younger daughter headed out in their Cessna Sky Hawk for a weekend with their elder daughter. But unexpected severe conditions send the craft into the treacherous War Eagle Idaho mountainside...a remote place that would make communication and rescue nearly impossible—if they survived. This captivating story, featured on The Today Show, is about a family in crisis, emergency plans for survival, and the incredible orchestration of local, state, and national rescue workers who brave unpredictable obstacles to accomplish the unimaginable. An intriguing account of faith and courage reminds readers that one's darkest hour can become the landscape for miracles to unfold.

Design Technology in Contemporary Architectural Practice Dominik Holzer,2023-06-19 Design Technology in Contemporary Architectural Practice lifts the curtain to unveil how eleven world-leading design studios integrate technology (such as computational design, BIM, and digital fabrication) as part of their day-to-day design exploration and delivery. Via first-hand accounts, the book offers rare insights about how these firms apply technology to purposefully disrupt and support their creative design processes in order to then explore how technology can be integrated on an organisational level. The resulting practice stories are loosely tied to four chapters that discuss how Design Technology corresponds to studio culture, collaboration and delivery protocols, business opportunities, knowledge sharing, staff empowerment, and more. The author is less interested in presenting the latest and greatest tools than in focusing on cultural and organisational challenges and opportunities. This book benefits both the professional market (such as design firms reflecting on their technology use), as well as the academic context (with its critical reflection on the interface between design process and technology support). Stories from the following design firms are included: Coop Himmelb(l)au Foster + Partners Bjarke Ingels Group (BIG) Zaha Hadid Architects Diller Scofidio + Renfro Heatherwick Studio Morphosis Architects SO-IL Woods Bagot Herzog & de Meuron LASSA

Research Methods and Statistics Ian Walker,2017-09-16 How do you design a research project? What is the difference in method between qualitative and quantitative research? How should psychologists go about considering the ethics of research methodology? For the 'students who ask questions', this concise text provides an informative introduction to the methods of psychological

research, offering an overview of the primary stages in research. From learning how to construct the initial aims and criterion of a study to presenting the final resulting data into tables and graphs, this book aims to guide psychologists through the tools that make psychological research and the understanding of its resulting data possible. Written with enthusiasm and lucidity, Walker guides readers through the appropriate methods for undertaking research, explaining the discerning features of the core types of research, the primary measurements of statistics such as the chi-squared, t and Mann-Whitney U tests and brings an apt consideration of what makes a psychological study ethical. Whether desiring to learn about how to empirically record and measure the psychological experience of an individual or the behavioural factors of an entire population, *Research Methods and Statistics* is the introductory short-text for learning how to undertake successful research. This title stands as part of the *Insights* series edited by Nigel Holt and Rob Lewis, containing versatile, quick guides to the cornerstone theories, main topics and theoretical perspectives of their subjects and are useful for pre-undergraduate students looking to find incisive introductions to subjects that they may be considering for undergraduate study or those looking for helpful preparatory reading for undergraduate modules in the prospective subject. Also useful for undergraduate psychology-students who feel that they could benefit from some background reading in this often less-understood area of psychology.

Growing Up With Draja Mickaharic Luke Cullen,2009-03-27 Luke Cullen seemed like an average geeky kid growing up in the 80's and 90's. He experienced all the trappings and hardships of growing up as an unpopular figure at school. However, underneath that exterior was a life of magic and deep spirituality, guided by his mentor, Draja Mickaharic. This book gives a surprising description of a student and his spiritual teacher. It is a rare look at Draja Mickaharic, a mysterious figure and author of books on magic and spirituality, told from the point of view of his student.

The Line Tender Kate Allen,2020-04-21 Funny, poignant, and deeply moving, *The Line Tender* is a story of nature's enduring mystery and a girl determined to find meaning and connection within it. Wherever the sharks led, Lucy Everhart's marine-biologist mother was sure to follow. In fact, she was on a boat far off the coast of Massachusetts, collecting shark data when she died suddenly. Lucy was seven. Since then Lucy and her father have kept their heads above water--thanks in large part to a few close friends and neighbors. But June of her twelfth summer brings more than the end of school and a heat wave to sleepy Rockport. On one steamy day, the tide brings a great white--and then another tragedy, cutting short a friendship everyone insists was meaningful but no one can tell Lucy what it all meant. To survive the fresh wave of grief, Lucy must grab the line that connects her depressed father, a stubborn fisherman, and a curious old widower to her mother's unfinished research on the Great White's return to Cape Cod. If Lucy can find a way to help this unlikely quartet follow the sharks her mother loved, she'll finally be able to look beyond what she's lost and toward what's left to be discovered. ★Confidently voiced.—Kirkus Reviews, starred ★Richly layered.—Publishers Weekly, starred ★A hopeful path forward.—Booklist, starred ★Life-

Slint's Spiderland Scott Tennent, 2010-11-11 Of all the seminal albums to come out in 1991—the year of *Nevermind*, *Loveless*, *Ten*, and *Out of Time*, among others—none were quieter, both in volume and influence, than *Spiderland*, and no band more mysterious than Slint. Few single albums can lay claim to sparking an entire genre, but *Spiderland*—all six songs of it—laid the foundation for post rock in the 1990s. Yet for so much obvious influence, both the band and the album remain something of a puzzle. This thoroughly researched book is the first substantive attempt to break through some of the mystery surrounding *Spiderland* and the band that made it. Scott Tennent has written a long overdue look at this remarkable album and its origins, delving into the small, insular musical universe that included bands like *Squirrel Bait*, *Maurice*, *Bitch Magnet*, and *Bastro*. The story, helped by in-depth interviews with band members David Pajo and Todd Brashear, explores the formation of Slint, the recording of *Tweez*, and the band's dramatic move into the sound of *Spiderland*.
