**How to Grow Your Business - For Entrepreneurs** Alex Blyth,2012-10-12 Entrepreneurs face a constant struggle to make a profit. They are entirely caught up in the day-to-day race against ever more demanding customers, rising material costs, a mounting tax and regulatory burden, increased international competition, and an ever more challenging labour market. They rarely have time to get away from this ongoing struggle, to think about what they could do to find new customers, manage existing customers more effectively, cut operating costs, minimise their red tape, and get their staff working more productively. Yet, they know that if they could make even small improvements in those areas they would be able to revolutionise their businesses and their lives. They are not alone in this. Few executives at larger companies have the time to address these issues. However, executives at larger companies usually do have the budget to hire consultants to advise them in all these areas. Entrepreneurs don't. They have neither the time nor the money to address these issues. Furthermore, entrepreneurs tend to be conquerors, rather than empire builders. Very often those who are best equipped to make it through the early years, are least well-equipped to build on that early success. Yet they are desperately keen to see a reward for all the work they put in to get their enterprises off the ground. They have both a need and a desire for advice on how to take their businesses forward. This book is a practical guide, showing them how they can make those improvements with minimal investment of time or money. The ideas will be simply expressed, the action points will be clearly achievable, and the theory will be illustrated with examples of small businesses that have already grown by following this path. By reading this book, and by following each of the action points, every entrepreneur will be able, over time, to cut costs, increase sales and boost profits. It will revolutionise those businesses.

**Cut Costs Not Corners** Colin Barrow,2010-05-03 Cost cutting is an issue for every manager and executive at every

level in every company, large or small, public or private sector. Junior managers who are proactively tight on cost are learning good habits for the future, ones that will bring them recognition and advance their climb up the organizational chart. The HR department is now staffed with tough cost managers dealing with the most difficult cost category, people. Marketing departments now focus on how to get higher returns from less spend. Cut Costs Not Corners has a coherent and structured approach to cost cutting as a permanent activity, combined with guidance on the practical steps to take and powerful international case studies. It covers strategic and tactical cost cutting options such as analysing space needs, buying technology for less, selling off redundant assets, reducing credit risk, reviewing distribution methods, sourcing new suppliers or consolidating existing ones, advertising for less, changing the route to market, travel and utility savings, minimising finance and tax costs, crisis measures - freezing recruitment, delaying pay rises, sell and lease back assets - keeping budgets rolling and using a daily cash flow model.
