Head in the Clouds: The Best Stories From 50 Years of Free Flying Hugh Miller,Andrew Craig,2023-09-11 Head in The Clouds captures the heart and soul of free flying. It is a unique collection of stories and essays that documents the first 50 years of free flying – the adventure sports of paragliding and hang gliding. Since the pioneer hang glider pilots took their first tentative steps into the air in the 1970s, free-flight pilots have enjoyed a golden age. Face in the breeze, arms outstretched, following the birds and soaring high up to the clouds. For 50 years we've chased and achieved humankind's oldest dream. In this hardback collection of 50 stories, pilots describe the highs and lows in free flying firsthand: from the beauty of sunset soaring in the mountains to tales of epic adventure and the fight for survival. Whether traversing the Himalaya, being swept to 20,000ft inside a storm cloud and surviving, or simply the sheer fun of thermalling like a bird to the clouds, the stories convey the joys and challenges of this unique sport, which is enjoyed by tens of thousands of people worldwide. The book is edited by one of Britain's best paraglider pilots Hugh Miller and former BBC journalist Andrew Craig who between them have more than 50 years of free-flight experience. As Hugh says: "Free flying is adventure and exploration at its best. These stories represent the very best of our sport, the heart and soul of free flying." Head in the Clouds has been received with much critical acclaim, including being listed as one of the top 10 outdoor books of 2023 by The Scotsman, Scotland's national newspaper.

Free Flight James Fallows,2008-11-05 The troubles of the airline system have become acute in the post-terrorist era. As the average cost of a flight has come down in the last twenty years, the airlines have survived by keeping planes full and funneling traffic through a centralized hub-and-spoke routing system. Virtually all of the technological innovation in airplanes in the last thirty years has been devoted to moving passengers more efficiently between major hubs. But what was left out of this equation was the convenience and flexibility of the average traveler. Now, because of heightened security, hours of waiting are tacked onto each trip. As James Fallows vividly explains, a technological revolution is under way that will relieve this problem. Free Flight features the stories of three groups who are inventing and building the future of all air travel: NASA, Cirrus Design in Duluth,

Minnesota, and Eclipse Aviation in Albuquerque, New Mexico. These ventures should make it possible for more people to travel the way corporate executives have for years: in small jet planes, from the airport that's closest to their home or office directly to the airport closest to where they really want to go. This will be possible because of a product now missing from the vast array of flying devices: small, radically inexpensive jet planes, as different from airliners as personal computers are from mainframes. And, as Fallows explains in a new preface, a system that avoids the congestion of the overloaded hub system will offer advantages in speed, convenience, and especially security in the new environment of air travel.
