Big Billion Startup: The Untold Flipkart Story Mihir Dalal, 2019-10-06 The definitive account of India's biggest startup that redefined e-commerce, entrepreneurship and the way we shop and live. IIT graduates Sachin Bansal and Binny Bansal founded out of a Bangalore apartment what would become India's biggest e-commerce startup. Established in October 2007, Flipkart began as an online bookstore and soon came to be known for its 'customer obsession'. As the startup's reputation grew, so did its value, with venture capitalists in India and abroad lining up to invest heavily in the company that stood for bold ambition, unabashed consumerism and the virtues of technology. Investigative journalist Mihir Dalal recounts the astounding story of how the Bansals built Flipkart into a multi-billion-dollar powerhouse in the span of a few years and made internet entrepreneurship a desirable occupation. But it is also a story of big money, power and hubris, as both business and interpersonal complexities weakened the founders' control over their creation and forced them to sell out to a retailer whose dominance they had once dreamt of emulating. Flipkart's auction involved some of the corporate world's biggest names, from Jeff Bezos, Satya Nadella, Sundar Pichai to

Masayoshi Son and Doug McMillon, an ironic testimony to the strength of what the Bansals had forged. Based on extraordinary research, extensive interviews and deep access to key characters in the Flipkart story, Big Billion Startup is the riveting and revealing account of how Sachin and Binny Bansal built and sold India's largest internet company.

Thakkar,2019-12-31 Rapidly growing technology and globalization

have put tremendous pressure on management teams.

Technological developments with far reaching implications on social, economic, political, and environmental ecosystems cannot be underemphasized. Currently, organizations are trying to be more inclusive and aware of diversity, rapid technology growth, and globalization along with remotely operating businesses for profit motivation. The delegative and individual employee-based management styles of the past have become obsolete. With globalization, virtual offices, and rapid technology growth, management challenges have become an expensive force to reckon with. In this book, the authors address the recent trends in management in global environments. The authors explore issues such as managing virtual teams, gender and management, ecommerce, biased financing, quantum computing, and disruption in the financial services industry. The book will serve as a valuable resource to researchers interested in the future management challenges facing global organizations.

Haunted Chuck Palahniuk,2005-05-03 Haunted is a novel made up of twenty-three horrifying, hilarious, and stomach-churning stories. They're told by people who have answered an ad for a writer's retreat and unwittingly joined a "Survivor"-like scenario

where the host withholds heat, power, and food. As the storytellers grow more desperate, their tales become more extreme, and they ruthlessly plot to make themselves the hero of the reality show that will surely be made from their plight. This is one of the most disturbing and outrageous books you'll ever read, one that could only come from the mind of Chuck Palahniuk.

Vol 15: Kinetic Theory: Adaptive Problems Book in Physics (with Detailed Solutions) for College & High School SATYAM SIR,2021-08-01 Learn Kinetic Theory of gases which is divided into various sub topics. Each topic has plenty of problems in an adaptive difficulty wise. From basic to advanced level with gradual increment in the level of difficulty. The set of problems on any topic almost covers all varieties of physics problems related to the chapter Kinetic Theory of gases. If you are preparing for IIT JEE Mains and Advanced or NEET or CBSE Exams, this Physics eBook will really help you to master this chapter completely in all aspects. It is a Collection of Adaptive Physics Problems in Kinetic Theory for SAT Physics, AP Physics, 11 Grade Physics, IIT JEE Mains and Advanced, NEET & Olympiad Level Book Series Volume 15 This Physics eBook will cover following Topics for Kinetic Theory: 1. Pressure & Kinetic Energy 2. Various Speeds 3.

Degree of Freedom & Specific Heat 4. Chapter Test The intention is to create this book to present physics as a most systematic approach to develop a good numerical solving skill. About Author Satyam Sir has graduated from IIT Kharagpur in Civil Engineering and has been teaching Physics for JEE Mains and Advanced for more than 8 years. He has mentored over ten thousand students and continues mentoring in regular classroom coaching. The students from his class have made into IIT institutions including ranks in top 100. The main goal of this book is to enhance problem solving ability in students. Sir is having hope that you would enjoy this journey of learning physics!
