Western and Northern Europe June 1942-1945 Katja Happe,Barbara Lambauer,Clemens Maier-Wolthausen,2022-08-01 In summer 1942 the Germans escalated the systematic deportations of Jews from Western and Northern Europe to the extermination camps. In most of the countries under German control, the occupying forces initially focused on arresting foreign and stateless Jews, thereby securing the cooperation of local authorities. However, before long the entire Jewish population was targeted for deportation. This volume documents the parallels and differences in the persecution of Jews in occupied Norway, Denmark, the Netherlands, Belgium, Luxembourg and France in the period from summer 1942 to liberation; it records the implementation of the systematic deportation and murder of Jews from Western and Northern Europe, and it also records the rescue of more than 5,000 Danish Jews. In letters and diary entries the persecuted Jews describe their attempts to flee, life in hiding, the transit camps, and deportation transports that often took several days. In Westerbork camp in the occupied Netherlands, Bob Cahen, himself an inmate, recorded in his diary the arrival in the camp of 17,000 Jews from across the Netherlands in October 1942: 'People arrived here herded like livestock. Some were buried beneath their luggage, others without any possessions at all, not even properly dressed. Women in poor health who had been hauled out of bed in thin nightgowns, children in undergarments and barefoot, the elderly, the ill, the infirm - more and more new people came to the camp.' The sources in the volume show how the perpetrators attempted to dupe their victims regarding the destination of the transports, and how Jewish organizations attempted to alleviate the suffering of the deportees. The documents additionally illustrate how the resistance movement gained momentum during this period. Learn more about the PMJ on <https://pmj-documents.org/>

Sketching Light Joe McNally,2011-12-06 Following up on the great success of *The Moment It Clicks* and *The Hot Shoe Diaries: Big Light from Small Flashes*, legendary magazine photographer Joe McNally takes us on another memorable ride with *Sketching Light*, another trip into the land of light--but this time running the gamut from small flash to big flash, and everywhere in between. Of course, Joe includes coverage of Nikon Speedlights, but he also covers big flash, as well as in-between lights as the Elinchrom Quadra. The exploration of new technology, as well as the explanation of older technology. No matter what equipment Joe uses and discusses, the most important element of Joe's instruction is that it is straightforward, complete, and honest. No secrets are held back, and the principles he talks about apply generally to the shaping and quality of light, not just to an individual model or brand of flash. He tells readers what works and what doesn't via his let's-see-what-happens approach, he shows how he sets up his shots with plentiful sketches and behind-the-scenes production shots, and he does it all with the intelligence, clarity, and wisdom that can only come from shooting in the field for 30 years for the likes of

National Geographic, Time, Life, and Sports Illustrated--not to mention the wit and humor of a clearly warped (if gifted) mind.

Studio Anywhere 2: Hard Light Nick Fancher, 2017-01-20 In *Studio Anywhere 2: Hard Light*, photographer and author Nick Fancher builds on the success of his previous book (*Studio Anywhere: A Photographer's Guide to Shooting in Unconventional Locations*) as he continues to offer candid, practical, and valuable lessons on how to create successful and fresh photographs armed with only minimal gear, a resourceful mind, and a creative spirit. The heart and soul of *Studio Anywhere 2: Hard Light* resemble its predecessor, but this time Nick focuses his approach on hard light, demonstrating how to use it in innovative and flattering ways, working with subjects ranging from products to people. You'll learn:

- How to work with both available light (e.g., the sun) and manufactured light (such as inexpensive small flash)
- How to shape, bounce, and manipulate your unmodified flash to get the results you want
- The importance of proper light placement and ambient balance
- How to create dramatic, intentional photographs with hard light
- DIY techniques for making your own gobos and photo hacks (such as with a reflector)
- How to incorporate colored gels into your work to create expressive and innovative imagery
- Post-processing tricks and techniques that Nick uses to achieve the final look of the image

Included in the book are behind-the-scenes photos, lighting diagrams, and Lightroom settings for every scenario, so the reader can follow along from idea through the shoot and on to the final edit. There is also a feature throughout the book called "Making a Scene" where, upon being presented with an "empty" scene, you're challenged to figure out where you might place your subject and your light(s) in order to achieve a specific effect or result. At the back of the book, Nick shows you how he chose to tackle each scenario. The goal is to train yourself to look at the everyday, commonplace locations and scenarios you encounter and begin to see them full of photographic potential.

Digitale mondfotografie Daan van Oort, 2009-12-11 In deze tijd van ferme concurrentie en een roep om transparantie zullen tandartspraktijken steeds beter moeten tonen wat ze kunnen. Daarbij kan mondfotografie een belangrijke rol spelen. Beeldmateriaal kan voor verschillende doeleinden worden gebruikt. Goede mondfoto's maken intercollegiaal contact een stuk gemakkelijker. Daarnaast zijn ze een goed hulpmiddel in de communicatie tussen tandarts en patiënt. Beeldmateriaal kan ook prima worden gebruikt voor presentaties, marketing en het documenteren van patiëntbehandelingen. Tot slot kan met foto's het eigen werk worden gecontroleerd. Fotografie gaat dus steeds vaker een vast onderdeel van de behandeling worden. Het is daarbij uiteraard belangrijk om duidelijke, goed bruikbare foto's te maken. In Mondfotografie worden de technische principes van fotografie gecombineerd met specialistische kennis op het gebied van tandheelkunde. Belangrijke voorwaarden voor een goede foto zijn een goede camera, kwaliteitsobjectieven, prima flitsapparatuur en een geschikt fotobewerkingsprogramma. Daarnaast wordt de kwaliteit van de foto vooral bepaald door de fotograaf zelf. In dit boek worden alle mogelijkheden van het gebruik van fotoapparatuur verduidelijkt. Er worden adviezen gegeven voor het maken van goede en duidelijke mondfoto's. Aan bod komen hoofdstukken over materiaal, instellingen, fotograferen en bewerken op de computer.
