Garden of Flowers Volume 2 David Jansen, Jansen Art Studio, 2016-09-09 oin David as he continues painting garden flowers! This time he will show you a new approach to painting multi-petaled flowers. He will introduce you to some wonderful wildflowers, the Says Phoebe and talk about how to design interesting compositions. He will show you a new lesson called the Bee and Wild Roses where he will use new techniques to capture the background and move light through a composition. Vignetted paintings are really popular and David will show you how to plan and create those looks. David will also create a different way to approach some casual roses that will surely add some excitement to your painting!

Art Lab for Kids: Express Yourself Susan Schwake, 2018-11-20 Art Lab for Kids, Express Yourself is a fun collection of art activities that encourage children to create freely, using their own thoughts and experiences as a

guide. One of the most important gifts we can give children is to nurture their creativity and allow them to express themselves freely. There's no better way to express yourself than through creative art projects. This is especially true for children because it gives them an outlet to explore their developing interests and strengths. Art Lab for Kids: Express Yourself contains 52 brand new original art projects that will draw out each young artist as they discover their style, document their thoughts, and build confidence in their unique perspective. Each lesson asks questions and offers personal choices while encouraging diverse approaches and creative thinking. The Colorful Beasts project, which incorporates discussion of endangered animals with the Blue Rider art movement, asks children to use torn colored tissue paper and glue to create an expressive representation of a favorite vulnerable animal. In I Built This City, children imagine and build their own cityscape using columns of newspaper text to make buildings on top of a watercolor painted background, and detailed with marker. Many projects include varying examples and executions of the activity to illustrate and reinforce the open-ended nature of the labs, inspiring children to embrace and share their own voice. Give children the great gift of creative self-exploration with Art Lab for Kids, Express Yourself. The popular Lab for Kids series features a growing list of books that share hands-on activities and projects on a wide host of topics, including art, astronomy, clay, geology, math, and even how to create your own circus—all authored by established

experts in their fields. Each lab contains a complete materials list, clear step-by-step photographs of the process, as well as finished samples. The labs can be used as singular projects or as part of a yearlong curriculum of experiential learning. The activities are open-ended, designed to be explored over and over, often with different results. Geared toward being taught or guided by adults, they are enriching for a range of ages and skill levels. Gain firsthand knowledge on your favorite topic with Lab for Kids.

The Japanese Arts and Self-Cultivation Robert E. Carter, 2007-11-08 It is through the practice of the arts, and not through rules or theory that moral and spiritual values are taught in Japan. Author Robert E. Carter examines five arts (or ways in Japan): the martial art of aikido, Zen landscape gardening, the Way of Tea, the Way of Flowers, and pottery making. Each art is more than a mere craft, for each takes as its goal not just the teaching of ethics but the formation of the ethical individual. Transformation is the result of diligent practice and each art recognizes the importance of the body. Training the mind as well as the body results in important insights, habits, and attitudes that involve the whole person, both body and mind. This fascinating book features the author's interviews with masters of the arts in

Japan and his own experiences with the arts, along with background on the arts and ethics from Japanese philosophy and religion. Ultimately, the Japanese arts emerge as a deep cultural repository of ideal attitudes and behavior, which lead to enlightenment itself.

Buttercream Petals Neetha Syam, 2021-07-20 Create beautiful buttercream flowers and leaves using piping and palette knife painting techniques. Master the art of decorating cakes with buttercream flowers in this stunning book from cake artist and tutor Neetha Syam. Neetha's strong, vibrant style and novel techniques make her designs really stand out from the crowd. In particular, she has developed a unique way of working that involves painting the flowers onto the cake using a palette knife, and the book will include both this and the more traditional piping technique to show how to create a multitude of flowers and how to decorate 10 glorious cakes. The book includes a materials and tools section and some basic cake recipes, as well as sections on making and colouring buttercream, preparing piping bags, covering and stacking cakes. Projects range from cupcakes to one, two and three-tiered cakes, featuring Neetha's stunning piped and palette-knife painted flowers, leaves and embellishments. Whether you are a home baker or experienced cake decorator, Neetha's designs will not fail to inspire you to create cakes that look as mouth-wateringly delicious as they taste!

Digital Culture & Society (DCS) Ramón Reichert, Annika Richterich, Pablo Abend, Mathias Fuchs, Karin Wenz, 2016-12-31 »Digital Culture & Society« is a refereed, international journal, fostering discussion about the ways in which digital technologies, platforms and applications reconfigure daily lives and practices. It offers a forum for critical analysis and inquiries into digital media theory and provides a publication environment for interdisciplinary research approaches, contemporary theory developments and methodological innovation. The third issue »Politics of Big Data« edited by Mark Coté, Paolo Gerbaudo, and Jennifer Pybus, critically examines the political and economic dimensions of Big Data and thus details its contestation. The contributions focus on the materialities and processes which manifest Big Data and explore forms of value beyond the state and capital. These range from open data

initiatives, social media metrics, machine learning algorithms, data visualisation to data dashboards, critical data analysis, and new modes of data action research and practice.

Flowers That Kill Emiko Ohnuki-Tierney, 2015-08-12 Flowers are beautiful. People often communicate their love, sorrow, and other feelings to each other by offering flowers, like roses. Flowers can also be symbols of collective identity, as cherry blossoms are for the Japanese. But, are they also

deceptive? Do people become aware when their meaning changes, perhaps as flowers are deployed by the state and dictators? Did people recognize that the roses they offered to Stalin and Hitler became a propaganda tool? Or were they like the Japanese, who, including the soldiers, did not realize when the state told them to fall like cherry blossoms, it meant their deaths? *Flowers That Kill* proposes an entirely new theoretical understanding of the role of quotidian symbols and their political significance to understand how they lead people, if indirectly, to wars, violence, and even self-exclusion and self-destruction precisely because symbolic communication is full of ambiguity and opacity. Using a broad comparative approach, Emiko Ohnuki-Tierney illustrates how the aesthetic and multiple meanings of symbols, and at times symbols without images become possible sources for creating opacity which prevents people from recognizing the shifting meaning of the symbols.

Art Themes Marjorie Cohee Manifold, 2017-11-20 Flexible in approach and full of colorful examples, this textbook provides a basic introduction to what art is and can be in the lives of people who do not necessarily think of themselves as artists. You will be taught about a variety of art themes, genres, materials, and processes that appeal to novice art makers. The lessons are organized by themes of general subject matter or media. Options are available for work in mixed media, crafts, photography and digital media, as well as in traditional drawing or painting media. After picking a theme of particular interest to you, look next at the four strands of lessons

presented in that thematic unit. Moving from left to right, select one lesson from each consecutive strand and complete that lesson. Because each lesson builds upon previously presented knowledge and developed skill, as you progress through four lessons, one from each strand, you should grow in your understanding of art concepts, meanings, and processes, while also improving your art making skills. Completing this course will help you develop a new appreciation for the power and possibilities of art learning, by understanding better the art others create, as well as making it yourself.

Digital Nature Photography John and Barbara Gerlach, 2015-04-17 Identifying a beautiful image in nature is easy, but capturing it is often challenging. To truly seize the essence of a photograph shot out of the studio and in the world requires an artistic eye and impeccable set of photographic techniques. John and Barbara Gerlach have been teaching photographers how to master the craft of photographing nature and the outdoors through their workshops and best-selling books for more than twenty years. Now, equipped with brand new images to share and skills to teach, this celebrated photo team is sharing their latest lessons in the second edition of Digital Nature Photography. Notable revisions in this new edition include introducing the concepts of focus stacking and HDR, as well as expanded discussions of multiple exposure, wireless flash, RGB histograms, live view, shutter priority with auto ISO, hand-held shooting techniques, and the author's equipment selections. The

inspiring imagery in this book covers a broader range of subjects than before including ghost towns, the night sky, animals, and sports, in addition to the classic nature photographs we expect from this very talented author team. This book is a comprehensive guide to one of the broadest subjects in photography, explained and demystified by two respected masters.
