Developmental Genetics of the Flower , 2006-09-29

Current major interests in this area include the study of higher level phylogenetic relationships and character evolution in the angiosperms, floral evolution, the genetic basis of key floral differences in basal angiosperms, the genetic and genomic consequences of polyploid speciation, conservation genetics of rare plant species, and phylogeography. *Developmental Genetics of the Flower* provides a series of papers focused on the developmental genetics of flowering as well as the genetic control of the timing of flowering. Investigation of speciation mechanisms, evolutionary relationships, and character evolution in flowering plants and land plants utilizing a variety of experimental approaches are discussed. The chapters are excellent reviews of the current fast-moving area of research. Provides a brief review of genes known to regulate flower development. Articles emphasize the classic ABC model of flower development.

Jones Very Jones Very, 1993 Very, a New England Transcendentalist and a protege of Ralph Waldo Emerson, is one of the underrated American poets of the nineteenth century. Though he attracted a select audience in his day, serious study of Very's work in this century has been hampered by the lack of a complete, convenient, and reliable edition of his poetry. Perhaps even more

discouraging to readers of older collections of Very's poems has been the puzzling variance in the style and quality of the verse. This edition, in which the poems are dated and chronologically arranged, reveals the three stages of Very's poetic development, out of which the distinctive genius of the second period clearly emerges. Written under the influence of a powerful psychological/spiritual experience, the ecstatic utterances of this period are by turns breathless in their intensity and tranquil in their serene contentment.

Abiotic Stress Responses in Plants Parvaiz Ahmad,M.N.V. Prasad,2011-11-16 Abiotic stress

cause changes in soil-plant-atmosphere continuum and is responsible for reduced yield in several major crops. Therefore, the subject of abiotic stress response in plants - metabolism, productivity and sustainability - is gaining considerable significance in the contemporary world. Abiotic stress is an integral part of "climate change," a complex phenomenon with a wide range of unpredictable impacts on the environment. Prolonged exposure to these abiotic stresses results in altered metabolism and damage to biomolecules. Plants evolve defense mechanisms to tolerate these stresses by upregulation of osmolytes, osmoprotectants, and enzymatic and non-enzymatic antioxidants, etc. This volume deals with abiotic stress-induced morphological and anatomical changes, aberrations in metabolism, strategies and approaches to increase salt tolerance, managing the drought stress, sustainable fruit production and postharvest stress treatments, role of glutathione reductase, flavonoids as antioxidants in plants, the role of salicylic acid and trehalose in plants, stress-induced flowering. The role of soil organic matter in mineral nutrition and fatty acid profile in response to heavy metal stress are also dealt with. Proteomic markers for oxidative stress as a new tools for reactive oxygen species and photosynthesis research, abscisic acid signaling in plants are covered with chosen examples. Stress responsive genes and gene products including expressed proteins that are implicated in conferring tolerance to the plant are presented. Thus, this volume would provides the reader with a wide spectrum of information including key references and with a large number of illustrations and tables. Dr. Parvaiz is Assistant Professor in Botany at A.S. College, Srinagar, Jammu and Kashmir, India. He has completed his post-graduation in Botany in 2000 from Jamia

Hamdard New Delhi India. After his Ph.D from the Indian Institute of Technology (IIT) Delhi, India in 2007 he joined the International Centre for Genetic Engineering and Biotechnology, New Delhi. He has published more than 20 research papers in peer reviewed journals and 4 book chapters. He has also edited a volume which is in press with Studium Press Pvt. India Ltd., New Delhi, India. Dr. Parvaiz is actively engaged in studying the molecular and physio-biochemical responses of different plants (mulberry, pea, Indian mustard) under environmental stress. Prof. M.N.V. Prasad is a Professor in the Department of Plant Sciences at the University of Hyderabad, India. He received B.Sc. (1973) and M.Sc. (1975) degrees from Andhra University, India, and the Ph.D. degree (1979) in botany from the University of Lucknow, India. Prasad has published 216 articles in peer reviewed journals and 82 book chapters and conference proceedings in the broad area of environmental botany and heavy metal stress in plants. He is the author, co-author, editor, or co-editor for eight books. He is the recipient of Pitamber Pant National Environment Fellowship of 2007 awarded by the Ministry of Environment and Forests, Government of India.

Digital Culture & Society (DCS) Ramón Reichert, Annika Richterich, Pablo Abend, Mathias Fuchs, Karin Wenz, 2016-12-31 »Digital Culture & Society« is a refereed, international journal, fostering discussion about the ways in which digital technologies, platforms and applications reconfigure daily lives and practices. It offers a forum for critical analysis and inquiries into digital media theory and provides a publication environment for interdisciplinary research approaches, contemporary theory developments and methodological innovation. The third issue »Politics of Big Data« edited by Mark Coté, Paolo Gerbaudo, and Jennifer Pybus, critically examines

the political and economic dimensions of Big Data and thus details its contestation. The contributions focus on the materialities and processes which manifest Big Data and explore forms of value beyond the state and capital. These range from open data initiatives, social media metrics, machine learning algorithms, data visualisation to data dashboards, critical data analysis, and new modes of data action research and practice.

Advances in Plant Defense Mechanisms Josphert N. Kimatu, 2022-12-14 Increasing human migrations, technological advances, agricultural activities, and climate change are forcing plants to adapt to new environments. This book highlights current morphological, anatomical, physiological, molecular, and genomic advances in plant defense mechanisms. These advances, including epigenetic mechanisms, have been linked to observed phenotypic plant plasticity. The book also outlines next-generation food systems, considering the resilience and sustainability of plant genomes and epigenomes.

Técnicas vitícolas frente al cambio climático

MARTINEZ DE TODA, FERNANDO, 2019-07-29 Técnicas de manejo de la vegetación del viñedo para mitigar los efectos de las altas temperaturas y del calentamiento climático El objetivo de este libro es el de recoger y presentar una serie de trabajos de investigación y reflexiones, desarrollados por mi grupo de investigación en los últimos años, sobre las técnicas vitícolas disponibles para mitigar o contrarrestar los efectos negativos de las altas temperaturas y del calentamiento climático. Dentro de esas posibles técnicas de cultivo, me centro especialmente en las técnicas de manejo de la vegetación, ya que las considero más interesantes porque pueden aplicarse sobre viñedos ya instalados, sin necesidad de recurrir al establecimiento de nuevos viñedos, como es el caso de otras técnicas que abordan la ubicación del viñedo en zonas más frescas o la utilización de nuevo material vegetal mejor adaptado. Y, dentro de las técnicas de manejo de la vegetación, dedico una atención especial a aquellas cuyo efecto consiste en el retraso de la maduración de la uva, ya que el efecto negativo fundamental y más claro de las altas temperaturas es el de provocar un adelanto en la maduración de la uva, por lo que dicha maduración se desarrolla más rápidamente y en un período más cálido. Fernando Martínez de Toda Fernández, es Viticultor, Dr. Ingeniero Agrónomo y Catedrático de Viticultura de la Universidad de La Rioja. Con cuarenta años de experiencia docente e investigadora, ha publicado una veintena de libros, monografías y capítulos de libro y más de doscientos artículos científicos y técnicos sobre diferentes aspectos de la viticultura. Entre sus premios y distinciones destacan los Premios Internacionales de Viticultura concedidos por la Oficina Internacional de la Viña y del Vino (OIV) en los años 1986, 1991, 2003 y 2008.
