**Never Fly Over an Eagle's Nest** Joe Garner, 2003 A BC classic--over 100,000 copies in print Joe Garner's father, Oland, was the oldest of four brothers who were run out of South Carolina in 1903 by the Ku Klux Klan. Along with his bride, Lona, Oland headed west to San Francisco, then north to Victoria, BC. He found employment with Emily Carr's father. Ten years later he helped Emily build her house in Victoria. Garner recalls a hilarious childhood night spent sleeping between the artist's two shaggy sheepdogs. In this fascinating memoir, Joe Garner takes us from the family's move to Salt Spring Island to his adventures as a hunter and trapper to his adult exploits as an entrepreneur and innovator in several of the west coast's burgeoning industries. Garner recalls encounters with a cougar, journeys by floatplane to the remote reaches of the Queen Charlotte Islands and the lakes of the Chilcotin, and a poker game in which the stakes included logging camps and aircraft.

**Airline Maps** Mark Ovenden,Maxwell Roberts,2019-10-29 A nostalgic and celebratory look back at one hundred years of passenger flight, featuring full-color reproductions of route maps and posters from the world's most iconic airlines, from the author of bestselling cult classic Transit Maps of the World. In this gorgeously illustrated collection of airline route maps, Mark Ovenden and Maxwell Roberts look to the skies and transport readers to another time. Hundreds of images span a century of passenger flight, from the rudimentary trajectory of routes to the most intricately detailed birds-eye views of the land to be flown over. Advertisements for the first scheduled commercial passenger flights featured only a few destinations, with stunning views of the countryside and graphics of biplanes. As aviation took off, speed and mileage were trumpeted on bold posters featuring busy routes. Major airlines produced highly stylized illustrations of their global presence, establishing now-classic brands. With trendy and forward-looking designs, cartographers celebrated the coming together of different cultures and made the earth look ever smaller. Eventually, fleets got bigger and routes multiplied, and graphic designers have found creative new ways to display huge amounts of information. Airline hubs bring their own cultural mark and advertise their plentiful destination options. Innovative maps depict our busy world with webs of overlapping routes and networks of low-cost city-to-city hopping. But though flying has become more commonplace, Ovenden and Roberts remind us that early air travel was a glamorous affair for good reason. Airline Maps is a celebration of graphic design,

cartographic skills and clever marketing, and a visual feast that reminds us to enjoy the journey as much as the destination.

**Site Characterization in Karst and Pseudokarst Terraines** Richard C.

Benson, Lynn B. Yuhr, 2015-09-24 This book provides a practical strategy for obtaining a more complete and accurate geologic site characterization. The strategy and methods to characterize complex geologic settings are readily available. The strategy utilizes readily available technology, basic science and good, old-fashioned common sense resulting in a solid understanding of geologic and even karst or pseudokarst conditions. We provide an introduction to many off-the-shelf methods available for site characterization as well as examples of their application throughout the book. The purpose of a geologic site characterization is to understand the 3-dimensional geologic framework, along with the engineering and hydrologic properties of a site including any man-made impacts. A well-done site characterization is the cornerstone of all geotechnical, groundwater and environmental projects. The geologic conditions, particularly karst conditions, can significantly impact a site including its structural stability, groundwater pathways and potential for rapid transport or traps for contaminants. Once we have adequately characterized the geologic conditions can we carry our remediation, design and construction, model flow, and make risk assessments that are accurate and reliable.

**The Politics of Maps** Christine Leuenberger, Izhak Schnell, 2020-07-18 The land

between the Mediterranean Sea and the Jordan Valley has been one of the most disputed territories in history. Since the establishment of the state of Israel in 1948, Palestinians and Israelis have each sought claim to the national identity of the land through various martial, social, and scientific tactics, but no method has offered as much legitimacy and national controversy as that of the map. The Politics of Maps delves beneath the battlefield to unearth the cartographic strife behind the Israel/Palestine conflict. Blending science and technology studies, sociology, and geography with a host of archival material, in-depth interviews and ethnographies, this book explores how the geographical sciences came to be entangled with the politics, territorial claim-making, and nation-state building of Israel/Palestine. Chapters chart the cartographic history of the region, from the introduction of Western scientific and legal paradigms that seemingly legitimized and depoliticized new land regimes to the rise of new mapping technologies and software that expanded access to cartography into the public sphere. Maps produced by various sectors like the peace camps or the Jewish community enhanced national belonging, while others, like that of the Green Line, served largely to divide. The stories of Israel's many boundaries reveal that there is no absolute, technocratic solution to boundary-making. As boundaries continue to be controversial and the Israeli-Palestinian conflict remains intractable and unresolved, The Politics of Maps uses nationally-based cartographic discourses to provide insight into the complexity, fissures, and frictions within internal political debates, illuminating the persistent power of the nation-state as a framework for forging identities, citizens, and alliances.

*British and American News Maps in the Early Cold War Period, 1945–1955* Jeffrey P.

Stone,2019-06-06 During the early years of the Cold War, England and the United States both found themselves reassessing their relationship with their former ally the Soviet Union, and the status of their own “special relationship” was far from certain. As Jeffrey P. Stone argues, maps from British and American news journals from this period became a valuable tool for relating the new realities of the Cold War to millions of readers. These maps were vehicles for political ideology, revealing both obvious and subtle differences in how each country viewed global geopolitics at the onset of the Cold War. Richly illustrated with news maps, cartographic advertisements, and cartoons from the era, this book reveals the idiomatic political, cultural, and material differences contributing to these divergent cartographic visions of the Cold War world.
