Protocols and Systems for Interactive Distributed Multimedia Fernando

Boavida,Edmundo Heitor da Silva Monteiro,Joao Orvalho,2003-08-02 This book constitutes the refereed proceedings of the Joint International Workshops on Interactive Distributed Multimedia Systems and Protocols for Multimedia Systems, IDMS/PROMS 2002, held in Coimbra, Portugal in November 2002. The 30 revised full papers presented were carefully reviewed and selected from 112 submissions. The papers are organized in topical sections on performance of protocols and applications, mobile multimedia systems, standards and related issues, quality of service, video systems and applications, resource management, and multimedia support.

Computational Science and Its Applications - ICCSA 2006 Marina Gavrilova,Osvaldo

Gervasi,Vipin Kumar,C.J. Kenneth Tan,David Taniar,Antonio Laganà,Youngsong Mun,Hyunseung Choo,2006-05-05 The five-volume set LNCS 3980-3984 constitutes the refereed proceedings of the International Conference on Computational Science and Its Applications, ICCSA 2006. The volumes present a total of 664 papers organized according to the five major conference themes: computational methods, algorithms and applications high performance technical computing and networks advanced and emerging applications geometric modelling, graphics and visualization information systems and information technologies. This is Part V.

Insights Into Mobile Multimedia Communications David Bull,David R. Bull,C.

Nishan Canagarajah,Andrew R. Nix,1999 Describes the state-of-the-art in digital multimedia communications. This text presents an integrated view of advanced radio systems, network architectures and source coding.

Networking -- ICN 2005 Petre Dini,Pascal Lorenz,2005-03-31 The International

Conference on Networking (ICN 2005) was the fourth conference in its series aimed at stimulating technical exchange in the emerging and important field of networking. On behalf of the International Advisory Committee, it is our great pleasure to welcome you to the proceedings of the 2005 event. Networking faces dramatic changes due to the customer-centric view, the venue of the next generation networks paradigm, the push from ubiquitous n-

working, and the new service models. Despite legacy problems, which researchers and industry are still discovering and improving the state of the art, the horizon has revealed new challenges that some of the authors tackled through their submissions.

In fact ICN 2005 was very well perceived by the international networking community. A total of 651 papers from more than 60 countries were submitted, from which 238 were accepted. Each paper was reviewed by several members of the Technical Program Committee. This year, the Advisory Committee revalidated various accepted papers after the reviews had been incorporated. We perceived a significant improvement in the number of submissions and the quality of the submissions.

The ICN 2005 program covered a variety of research topics that are of current interest, starting with Grid networks, multicasting, TCP optimizations, QoS and security, emergency services, and network resiliency. The Program Committee selected also three tutorials and invited speakers that addressed the latest research results from the international industries and academia, and reports on findings from mobile, satellite, and personal communications related to 3rd- and 4th-generation research projects and standardization.

Routing and Quality-of-Service in Broadband LEO Satellite Networks Hoang Nam

Nguyen,2012-12-06 Routing and Quality-of-Service in Broadband LEO Satellite Networks describes mechanisms for supporting Quality-of-Service (QoS) strategies that consider properties of low earth orbit satellite networks and their effects on link handover. A graph model representing the dynamic topology of a satellite constellation is introduced based

on a new parameter, lifetime. Novel routing and resource reservation algorithms as well as connection admission control strategies are proposed to minimize the handover blocking probability while maintaining QoS requirements. The author also discusses the roles of satellites in an all-IP mobile network architecture and the problems of mobility, QoS provisioning, and routing. This work will be of particular interest to researchers and professionals working on mobility networking in next generation networks.

Heterogeneous Wireless Access Networks Ekram Hossain, 2008-09-18 Heterogeneous wireless networking, which is sometimes referred to as the fourth-generation (4G) wireless, is a new frontier in the future wireless communications technology and there has been a growing interest on this topic among researchers and engineers in both academia and industry. This book will include a set of research and survey articles featuring the recent advances in theory and applications of heterogeneous wireless networking technology for the next generation (e.g., fourth generation) wireless communications systems. With the rapid growth in the number of wireless applications, services and devices, using a single wireless technology such as a second generation (2G) and third generation (3G) wireless system would not be efficient to deliver high speed data rate and quality-of-service (QoS) support to mobile users in a seamless way. Fourth generation (4G) wireless systems are devised with the vision of heterogeneity in which a mobile user/device will be able to connect to multiple wireless networks (e.g., WLAN, cellular, WMAN) simultaneously. This book intends to provide a unified view on the state-of-the-art of protocols and architectures for heterogeneous wireless networking. The contributed articles will cover both the theoretical concepts and system-level implementation issues related to design, analysis, and optimization of architectures and protocols for heterogeneous wireless access networks.

Contemporary Computing Sanjay Ranka, Srinivas Aluru, Rajkumar Buyya, Yeh-Ching Chung, Sandeep Gupta, Ananth Grama, Rajeev Kumar, Vir V. Phoha, Sumeet Dua, 2009-08-19 This book constitutes the refereed papers of the 2nd International Conference on Contemporary Computing, which was held in Noida (New Delhi), India, in August 2009. The 61 revised full papers presented were carefully reviewed and selected from 213 submissions and focus on topics that are of contemporary interest to computer and computational scientists and engineers. The papers are organized in topical sections on Algorithms, Applications, Bioinformatics, and Systems.

Education, Research and Business Technologies Cristian Ciurea, Cătălin Boja, Paul Pocatilu, Mihai Doinea, 2022-04-15 This book includes high-quality research papers presented at 20th International Conference on Informatics in Economy (IE 2021), which is held in Bucharest, Romania during May 2021. The book covers research results in business informatics and related computer science topics, such as IoT, mobile-embedded and multimedia solutions, e-society, enterprise and business solutions, databases and big data, artificial intelligence, data-mining and machine learning, quantitative economics.

Human-Computer Interaction: The Agency Perspective Marielba Zacarias, José Valente de Oliveira, 2012-01-20 Agent-centric theories, approaches and technologies are contributing to enrich interactions between users and computers. This book aims at highlighting the influence of the agency perspective in Human-Computer Interaction through a careful selection of research contributions. Split into five sections; Users as Agents, Agents and Accessibility, Agents and Interactions, Agent-centric Paradigms and Approaches, and Collective Agents, the book covers a wealth of novel, original and fully updated material, offering: To provide a coherent, in depth, and timely material on the agency perspective in HCI To offer an authoritative treatment of the subject matter presented by carefully selected authors To offer a balanced and broad coverage of the subject area, including, human, organizational, social, as well as technological concerns. ü To offer a hands-on-experience by covering representative case studies and offering

essential design guidelines The book will appeal to a broad audience of researchers and professionals associated to software engineering, interface design, accessibility, as well as agent-based interaction paradigms and technology.

Selected Topics in Communication Networks and Distributed Systems ,

Mobile Telecommunications Standards Rudi Bekkers,2001 Gain a thorough understanding of the dynamics of today's mobile telecommunications standards with this unique new resource. The book examines the development and adoption trajectories of major European standards, such as UMTS, GSM, ERMES, and TETRA. It presents a framework that analyzes the factors that influenced each standard's level of success, and includes the most-comprehensive case studies on these standards.

Advances in Genetics ,1997-12-10 Advances in Genetics continues to present articles that are of interest to both human and molecular geneticists. Volume 37 offers a single chapter, written by I.F. Zhimulev, in which Dr. Zhimulev undertakes the laborious task of presenting an in-depth and detailed account of the various aspects of heterochromatin organization in the mitotic and interphase polytene chromosomes. It also includes details concerning the organization of heterochromatin at high resolution are also analyzed.

Wireless Hacks Rob Flickenger,Roger Weeks,2005-11-22 The authors bring readers more of the practical tips and tricks that made the first edition a runaway hit. Completely revised and updated, this version includes over 30 new hacks, major overhauls of over 30 more, and timely adjustments and touch-ups to dozens of other hacks.

Perspectives on Knowledge Management K. Madhavan, R.K Bhatt & R. Raman Nair,2022-01-09 Perspectives on Knowledge Management The unprecedented developments in Information and communication technologies resulted in the speedy transition of the Industrial society into the Knowledge Society. Now the efficiency in knowledge Management determines the quality, speed and Development in all spheres of human activity. Experts from different academic disciplines have contributed to the growth of this innovative domain of knowledge as well as to the methods and techniques for managing it. Digital technologies make it possible to transfer or access knowledge transcending the limitations of space and time. Knowledge Management processes have started to get much importance along in the manufacturing processes. Knowledge is defined as 'the remembering of previously learned material. This may involve the recall of a wide range of material, from specific facts to complete theories, but all that is required is bringing to mind the appropriate information. Knowledge represents the lowest level of learning outcomes in the cognitive domain'. Knowledge Management is the broad process of locating, organizing, transferring and using the information and expertise within an organization. The overall knowledge management process is supported by four key enablers: leadership, culture, technology, and measurement. In his prophetic words, Management Guru, Peter F. Drucker, observed that the most important, and indeed the truly unique, contribution of management in the 20th century was the fifty-fold increase in the productivity of the Manual Worker in manufacturing. The most important contribution management needs to make in the 21st century is similarly to increase the productivity of Knowledge Work and the Knowledge Worker. (Drucker, 1999. Knowledge-Worker Productivity: The Biggest Challenge. CMR41.(2). Considering the importance and relevance of this innovative area that has roots in different subject areas such as information science, Decision science, Social and economic activities, manufacturing, health care systems

M-Commerce Punita Duhan,Anurag Singh,2019-03-04 This volume presents a pragmatic approach to understanding and capitalizing on contemporary m-commerce trend. It comprehensively encapsulates the evolution, emergent trends, hindrances and challenges, and customer perceptions about various facets of how physical and online retail channels are merging, blurring, and influencing each other in new ways. The rapid rise of m-commerce (or mobile commerce) has led to the emergence of new paradigms in the marketplace. The difference between physical and digital retail is diminishing, and a new “phygital retail” phenomenon is on the rise. Marketers need to understand this emerging paradigm and consider the new opportunities and challenges involved. This volume, *M-Commerce: Experiencing the Phygital Retail*, provides a comprehensive discussion of the contemporary m-commerce concepts along with the emerging paradigms in a pragmatic way. It presents empirical analyses and reviews on the myriad aspects of m-commerce, including both contemporary academic and business research.

Radio Resource Management for Mobile Traffic Offloading in Heterogeneous Cellular Networks Yuan Wu,Li Ping Qian,Jianwei Huang,Xuemin (Sherman) Shen,2017-01-03 This SpringerBrief offers two concrete design examples for traffic offloading. The first is an optimal resource allocation for small-cell based traffic offloading that aims at minimizing mobile users’ data cost. The second is an optimal resource allocation for device-to-device assisted traffic offloading that also minimizes the total energy consumption and cellular link usage (while providing an overview of the challenging issues). Both examples illustrate the importance of proper resource allocation to the success of traffic offloading, show the consequent performance advantages of executing optimal resource allocation, and present the methodologies to achieve the corresponding optimal offloading solution for traffic offloading in heterogeneous cellular networks. The authors also include an overview of heterogeneous cellular networks and explain different traffic offloading paradigms ranging from uplink traffic offloading through small cells to downlink traffic offloading via mobile device-to-device cooperation. This brief is an excellent resource for postgraduate students studying advanced-level topics in wireless communications and networking. Researchers, engineers and professionals working in related fields will also find this brief a valuable resource tool.
