Decision of the Comptroller of the Currency United States. Office of the Comptroller of the Currency,1984

The Report: South Africa 2014 Oxford Business Group,2014-12-08 Indeed, since the end of apartheid in 1994 South Africa has become a major diplomatic player both on the African continent as well as further afield. Despite the size of South Africa's economy, the country currently faces a number of major economic challenges. As of the end of July 2014 the unemployment rate was at 25.5%, according to data from Statistics South Africa, which was among the highest in the world. While the government's long-term development plans are generally highly regarded, delivery and execution has occasionally been problematic. While there are major hurdles that must be cleared, given the country's strong institutions and the rapid pace of economic expansion over the past two decades, South Africa should be able to look forward to 20 more years of peace and steady, sustained economic growth.

Today, microfinance providers reach close to 100 million clients worldwide and are growing fast. New partnerships expand the impact of microfinance even further. Three types of partnerships are examined in this book, each consisting of a thematic pillar. Pillar I focuses on equity investments in microfinance, especially the possibilities for engaging private investors

through structured microfinance investment funds. Rating agencies are involved in providing more transparency in this emerging fund industry. Pillar II focuses on collaboration among microfinance providers, governments, private investors and technology companies which help microfinance institutions to integrate new technologies into their business models, reducing cost and increasing outreach to clients. Pillar III covers micropensions, microinsurance and the role of securitisation for the future of microfinance.

Industrialization in the Modern World [2 volumes] John Hinshaw, Peter N. Stearns, 2013-11-12 This unique two-volume work analyzes the Industrial Revolution from a global perspective and traces its influences up to the present day—encouraging students to rethink the significance of events past and present. By taking a fresh approach to its topic, *Industrialization in the Modern World: From the Industrial Revolution to the Internet* enables students to see this ongoing phenomenon not as a standalone event, but as a catalyst for the formation of today's globalized, industrializing world. Spanning the period from 1750 to the present, the work offers some 450 entries that cover developments in Africa and Asia, as well as in Europe and the United States. Numerous essays are organized around specific questions or problems; others examine significant events, countries, or industries. The work deals with all the major aspects of traditional industrialization (textiles, coal, steel), as well as modern variations (China, computers, the Internet). With a targeted approach, the authors will help students see how industrialization in one society influenced another, how industrialization spread throughout the world, and the causes and effects of each country's individual revolution.

The Report: South Africa 2013 Oxford Business Group, 2013-09-04 The Rainbow Nation benefits from an internationally competitive private sector, which accounts for roughly 70% of GDP, and extremely competitive infrastructure; its utility sector, for example, produces just under half of the total power generated on the African continent. South Africa represents by far the most

developed market in Africa, but there are still some structural challenges it is grappling with. Government strategies have set a target of increasing labour market participation from 54% in 2010 to 65% by 2030, bringing the number of workers in the formal sector to 25.3m people and lowering unemployment from 25% to 6%. While its fiscal space is narrow, long-term investments in infrastructure, education and health are expected to be key to attaining its growth potential. Recent years have seen both the public and private sectors look to strengthen regulatory frameworks in mining and industry – in some cases, like the automotive sector, with impressive results.

Business Models and Firm Internationalisation Christian Nielsen, Svetla T. Marinova, Marin A. Marinov, 2021-12-21 Internationalisation has been a binding request for firms dealing with the challenges of the present-day realities. Extant international business publications have recently begun to point out the relationship between the notions of 'business model' and 'internationalisation', yet the field needs considerably more attention. The core aim of this book is to provide a comprehensive analysis of the ways in which business models and internationalisation impact one another in the process of initiating and expanding international business activities. The

analysis makes it feasible to detect the core issues of the interdependences between business models and internationalisation to facilitate management decision-making and implementation of pertinent firm internationalisation incorporating the application of appropriate business models. In this book, the business model is applied to explore the specifics and aspects of firm internationalisation processes. Innovating the business model is analysed as a persuasive means for augmenting the propensities of firms to internationalise. The book enriches the comprehension of the significance of business model innovation as an enabler of firm internationalisation, in view that scores in what manners business model innovation facilitate firm internationalisation. The book chapters address a broad range of issues encompassing: the general roles of business model in firm internationalisation, the relationships between digital business models and platforms on one side and firm internationalisation on another, how business models determine the internationalisation of services firms, the interplay between business models and firm internationalisation in specific contexts. It will, therefore, be of interest to researchers, academics and advanced students in the fields of international business and management.
