The Power of Mobile Banking Sankar Krishnan, 2014-05-19 Today's tech-savvy consumers are demanding a more personal customer experience from their banks, and banks are discovering that mobile services deliver individualized, tailored experiences better than any other technology. The Power of Mobile Banking: How to Profit from the Revolution in Retail Financial Services gives banking and financial professionals a well-researched guide for becoming transformational leaders. These leaders can convert their traditional retail branch banks into streamlined systems that deliver personalized services to their customers' laptops, tablets, and smartphones. Written by Sankar Krishnan—a career banker and noted financial services industry thought leader—The Power of Mobile Banking includes strategies for adapting mobile banking practices that suit the needs of both developed and emerging markets. Krishnan also shows how bankers can make their products and services relevant to a new generation of digital natives. Krishnan explores the expanding mobile payment systems that offer a wealth of financial opportunities for banking institutions and includes information on the growth of e-commerce, which holds the potential for new and profitable ways for banks to engage with consumers. The Power of Mobile Banking outlines the practical aspects of adapting to a mobile banking strategy and shows how to put the right players in place to ensure the technology works seamlessly. Once in place, a great mobile system delivers excellent service and benefits to users, as well as real value and unique features that cement customer loyalty. The book also offers advice for bankers who want to increase their bottom line by delving into the world-wide prepaid card market. Krishnan includes a discussion on the risks and hazards of mobile banking and reveals the critical investments that banks must be willing to make in order to avoid losing customers to telecoms, retailers, and technology providers. The time for retail banking to prepare for the new paradigm is now and The Power of Mobile Banking is the guide for professionals who want to adapt, evolve, and succeed in this new mobile-driven world.

**Bank 3.0** Brett King, 2012-11-19 The first edition of BANK 2.0—#1 on Amazon's bestseller list for banking and finance in the US, UK, Germany, France, and Japan for over 18 months—took the financial world by storm and became synonymous with disruptive customer behaviour, technology shift, and new banking models. In BANK 3.0, Brett King brings the story up to date with the latest trends redefining financial services and payments—from the global scramble for dominance of the mobile wallet and the expectations created by tablet computing to the operationalising of the cloud, the explosion of social media, and the rise of the de-banked consumer, who doesn't need a bank at all. BANK 3.0 shows that the gap between customers and financial services players is rapidly widening, leaving massive opportunities for new, non-bank competitors to totally disrupt the industry. On the Web and on Mobile, the customer isn't king—he's dictator. Highly impatient, skeptical, cynical. Brett King understands deeply what drives this new hard-nosed customer. Banking professionals would do well to heed his advice. —Gerry McGovern, author of Killer Web Content

*An Investigation into Authentication Security of GSM algorithm for Mobile Banking* Ali Raheem, 2014-02-01 Due to the mobility of its users, GSM systems are vulnerable to an unauthorized access and eaves droppings when compared with the traditional fixed wired networks. The main idea of

this project is to develop an application device in order to secure mobile banking over unsecure GSM network. It is important to mention that mobile banking is a term that is used for performing balance checks, account transactions, payments, credit applications, and many other online applications. Unfortunately, the security architecture for cellular network is not entirely secure. As a matter of fact, GSM network infrastructure is proved to be insecure. Many possible attacks are documented in literature. For security was never considered in the initial stages, the sending of protective banking information across an open mobile phone network remains insecure. Consequently, this project focuses entirely on the development and design of security techniques in order to assess some security issues within mobile banking through cellular phone network (GSM). The main aim of this project is to investigate and examine the following: 1. Security issues in each level of the mobile network architecture. 2. Messages and signals exchanged between user's cellular phone and mobile network at each level. 3. The overall security architecture of GSM flaws. 4. Some existing security measures for mobile transactions. 5. The current security within SMS banking and GPRS banking. Finally, two folded simulations in MATLAB were performed using OFDM which is a broadband multicarrier modulation method that provides a high performance operation to transmitted and received data or information.

**Marketing and Mobile Financial Services** Aijaz A. Shaikh, Heikki Karjalainen, 2018-12-21 Mobile financial services (MFS) are of major interest and importance to both researchers and practitioners. The role played by nonbanking actors including telecoms and FinTech firms as well as other participants, such as PayPal and Amazon, in developing and deploying innovative financial and payment services is undeniable. Peer2peer (P2P) payments from nonbank services are becoming increasingly commonplace and will shortly be codified by EC (EU?) regulations requiring banks to provide access to consumer data for third-party app developers and service providers. Three major mobile financial systems—mobile banking, mobile payments, and branchless banking—currently dominate the electronic retail banking sector. Although interconnected and interrelated, their business models, regulatory frameworks, and target markets are distinct. This book provides a unified perspective on MFS and discusses its evolution, growth, and future, as well as identifying the frameworks, stakeholders, and technologies used in financial information systems in general and MFS in particular. Academics and researchers in digital and financial marketing will find this book an invaluable resource, as will bank executives, regulators, policy makers, FinTech professionals, and anyone interested in how mobile technology, social media and financial services will increasingly intersect.

**The Impact of New Technology and Mobile Banking in Africa. A Case Study of the Standard Bank South Africa** Diffrine Madara, 2019-11-28 Seminar paper from the year 2019 in the subject Business economics - Banking, Stock Exchanges, Insurance, Accounting, grade: A, Kenyatta University, language: English, abstract: This paper explores the impact of new technology and mobile banking in the entire financial sector in Africa. The paper focuses on the case of Standard Bank South Africa to assist in understanding the challenges faced by the major commercial banks in adopting new banking technologies in less developed worlds, such as Africa. To realize the primary goal of this paper, the researcher discusses how technology can help Standard Bank to move forward in the aftermath of the 2008/9 financial crisis and the new opportunities for the bank to grow its financial service businesses. Furthermore, the research suggests how new technological applications in the financial services sector can help Africans to escape poverty and if diversification is appropriate for a diverse bank, such as Standard Bank. Technology has immensely transformed business-to-business and within business transactions and interactions. Technological applications are enabling reconfiguration of design, production, marketing, and service delivery in most businesses. For instance, the design reconfigurations have allowed for the implementation of online marketplaces, mobile business activities, such as mobile banking, and better risk assessment. In the emerging financial markets of Africa, disruptive market innovations and reconstituted value chains have become key drivers of the growing financial

services industry. Despite the huge benefits of financial innovations, conventional financial services providers, such as banks, finance companies, microfinance institutions, and insurance must be wary of the new risks and challenges posed by these financial technologies. For a major bank like the Standard Bank, financial innovations, such as e-banking and mobile banking present both new opportunities and threats to its core businesses.

**Bank 2.0** Brett King, 2010-06-05 BANK 2.0 reveals why customer behaviour is so rapidly changing, how branches will evolve, why cheques are disappearing, and why your mobile phone will replace your wallet—all within the next 10 years.

**Mobile banking in the Ethiopian bank sector** Dereje Tesfa, 2019-08-30 Seminar paper from the year 2019 in the subject Business economics - Banking, Stock Exchanges, Insurance, Accounting, grade: A, Wolkite University (College of Business and Economics), language: English, abstract: This article looks at how and why banking customers have begun to take advantage of mobile services for their banking requirements and why some of them are still hesitant to adopt mobile banking in Ethiopian banking sector. Also, this article throws light on some of the eminent challenges faced by the mobile banking service providers, which can be seen as opportunities for the financial institutions and the bankers. The internet and the mobile phone, the two technological advancements that have profoundly affected human behavior in the last decade have started to converge. Using a variety of platforms, services are being created to enable mobile devices to perform many activities of the traditional internet in a reduced format for mobile devices. One such area of activity is mobile banking. A cluster of dedicated and demanding mobile phone users (consumers) have multiplied tremendously over the years, who expect real-time information and access and high levels of service.

**Digital Bank: Strategies to launch or become a digital bank** Chris Skinner, 2014-05-15 Digital Bank tracks the innovations in banking and how the mobile internet is changing the dynamics of consumer and corporate relationships with their banks. The implication is that banks must become digitised, and that is a challenge as becoming a Digital Bank demands new services focused upon 21st-century technologies. Digital Bank not only includes extensive guidance and background on the digital revolution in banking, but also in-depth analysis of the activities of incumbent banks such as Barclays in the UK and mBank in Poland, as well as new start-ups such as Metro Bank and disruptive new models of banking such as FIDOR Bank in Germany. Add on to these a comprehensive sprinkling of completely new models of finance, such as Zopa and Bitcoin, and you can see that this book is a must-have for anyone involved in the future of business, commerce and banking. Chris Skinner is best known as an independent commentator on the financial markets through the Finanser ([www.thefinanser.com](http://www.thefinanser.com)) and Chair of the European networking forum The Financial Services Club, which he founded in 2004. He is the author of ten books covering everything from European regulations in banking through the credit crisis to the future of banking, and is a regular commentator on BBC News, Sky News and Bloomberg about banking issues. **Driving Digital Transformation: Lessons from Building the First ASEAN Digital Bank** Dr. Dennis Khoo, 2021-09-10 Traditional banks are

facing unprecedented disruption from challenger banks today. So why aren't more of them launching challenger banks of their own? Well, two high-profile examples – JP Morgan's Finn and RBS's Bo – were launched with much fanfare, but both shuttered after less than a year. In light of this, the success of TMRW digital bank by UOB, launched in Thailand in 2019 and Indonesia in 2020, is astonishing. Dr Dennis Khoo, who created TMRW, shares with us the thinking behind the design of this revolutionary undertaking. At every step of the way, he and his team went against established paradigms and bucked conventional wisdom to build ASEAN's first digital bank. Filled with visionary analysis and on-the-ground guidance, *Driving Digital Transformation* demonstrates how this success can be replicated across all industries. For any leader or organisation starting on a major digital initiative, this book is a must-read. "What makes this playbook particularly valuable is that it is written by Dennis Khoo, one of the sharpest minds in the industry." – Mary Huen, CEO, Standard Chartered Hong Kong

*Internet Banking* Karen Furst, 2000

*Retail and Digital Banking* John Henderson, 2018-10-03 Endorsed by the Chartered Banker Institute as core reading for the Personal and Private Banking module, *Retail and Digital Banking* looks at the changes that have occurred, including developments in onshore and offshore operations, call centres and the impact of technology and other critical factors in retail and digital banking. This book considers the evolution of retail banking services and the major role that technology has played in providing quality, cost-effective services to consumers. This fascinating text then goes on to offer expert thought leadership on the future of retail banking and what this could mean for existing established banks and disruptive new entrants. *Retail and Digital Banking* offers readers the opportunity to take a step back and consider the evolution of the sector in which they work and the tremendous level of change that has occurred over time for all operational activity. *Retail and Digital Banking* provides support for the Personal and Private Banking module assessment and features practical case studies from the banking sector. This essential text brings the journey of modern banking to life and considers what the future holds. Online supporting resources include a glossary and updates to regulation.

*SMACing the Bank* Balaji Raghunathan, Rajashekara Maiya, 2017-11-15 The formula for the Future of Work is called SMAC - social, mobile, analytics and cloud on one integrated stack where each function enables another to maximize its effect. **Service Promotion and its Impact on Building Customer Value** Sanjeev Pradhan, 2018-05-17 Case Study from the year 2018 in the subject Business economics - Offline Marketing and Online Marketing, grade: Ass. Professor, , course: Management and IT, language: English, abstract: For banks to attract new business and sustain the loyalty of existing customers, consumers must be able to reach financial institutions through multiple channels. With consumer interest that was historically focused on Branch Banking, currently fast changing towards Mobile & Internet banking - the level of popularity and number of possible services it carries has a great potential. Through the use of wireless banking as a customer channel, as well as an internal tool within financial institutions, the combination of Mobile and wireless technologies with the wide variety of portable devices available today, enables new revenue opportunities for financial services organizations. This provides a new channel that can be used to refresh and expand the customer base, attract prime customers and enhance loyalty. The research topic has a greater importance in today's context in terms of customer retention. The mobile banking services provided by NIBL showed that the customers has a high degree of trust building factor and has made their financial transactions safe and easy to operate. Though a little consumer awareness is required at certain level to the first time users in order to boost their confidence to operate easily. The revolution in the field of technology has made a boon for the society and at the same time high risk factors are also associated with it. This research has made an extensive contribution in the area of promotional activities where personal

interaction and advertisement program is a must for maintaining long term customer relationship. Moreover, providing better services with added value has made the customer to become more loyal towards their mobile banking services.
