Fog Delay Bill Nash,2011-02-23 James Donato is a demolitions expert with an explosive temper. When he gets angry, something blows up. A misunderstanding at a bank leads to what he calls his latest “job.” He has it all planned. A quick job in the bank, then jump on a plane to Los Angeles at nearby San Francisco International Airport to leave a cold trail. Everything goes fine until Donato encounters the one thing he can’t control: the weather. Victoria Kilpatrick is the head of security at SFO. After 9/11, airport security has become more complicated. Security lines are long and every threat is taken seriously. When fog, a long-time nemesis at SFO shuts down the airport, tempers rise and the terminals fill up. James Donato is one of those who has been delayed, and he knows only one way to relieve his anger – explosively. The fog, and by extension, San Francisco International Airport has foiled his perfect bank job, and Donato decides the airport must pay. The FBI, ATF and local police are called in to form a task force to capture Donato before he can make good on his threat. A San Francisco Fire Department Captain, Mark Saxon, is assigned to the task force as a resource in case Donato is somehow successful in detonating a bomb at the airport and an emergency medical and fire response is necessary. The task force is divided over whether the attack will occur out on the field and attack the airport’s infrastructure, or occur in the terminals where injury and panic will cause chaos. Using skills he learned during an undistinguished military career, Donato plans a commando-like raid on the airport. Kilpatrick and Saxon fight the FBI and ATF over how to use resources to protect the airport. As Donato’s deadline grows closer, there is no agreement on how Donato could carry out his plan. But Donato has already launched it as the task force starts to close in on him. The race is on to prevent an on-time arrival of destruction at San Francisco International Airport.

Encyclopedia of Transportation Mark Garrett,2014-08-13 Viewing transportation through the lens of current social, economic, and policy aspects, this four-volume reference work explores the topic of transportation across multiple disciplines within the social sciences and related areas, including geography, public policy, business, and economics. The book’s articles, all written by experts in the field, seek to answer such questions as: What has been the legacy, not just economically but politically and socially as well, of President Eisenhower’s modern interstate highway system in America? With that system and the infrastructure that supports it now in a state of decline and decay, what’s the best path for the future at a time of enormous fiscal constraints? Should California politicians plunge ahead with plans for a high-speed rail that every expert says–despite the allure–will go largely unused and will never pay back the massive investment while at this very moment potholes go unfilled all across the state? What path is best for emerging countries to keep pace with dramatic economic growth for their part? What are the social and financial costs of gridlock in our cities? Features: Approximately 675 signed articles authored by prominent scholars are arranged in A-to-Z fashion and conclude with Further Readings and cross references. A Chronology helps readers put individual events into historical context; a Reader’s Guide organizes entries by broad topical or thematic areas; a detailed index helps users quickly locate entries of most immediate interest; and a Resource Guide provides a list of journals, books, and associations and their websites. While articles were written to avoid jargon as much as possible, a Glossary provides quick definitions of technical terms. To ensure full, well-rounded coverage of the field, the General Editor with expertise in urban planning, public policy, and the environment worked alongside a Consulting Editor with a background in Civil Engineering. The index, Reader’s Guide, and cross references combine for thorough search-and-browse capabilities in the electronic edition. Available in both print and electronic formats, Encyclopedia of Transportation is an ideal reference for libraries and those who want to explore the issues that surround transportation in the United States and around the world.

Search Algorithm Dinesh G. Harkut,2023-02-01 Algorithms, particularly those embedded in search engines, social media platforms, recommendation systems, and information databases, play an increasingly important role in selecting what information is most relevant to us, which is a crucial feature of our participation in public life. These algorithms are not just helpful in our daily lives but are also one of the unavoidable necessities of modern living. This book discusses advances and applications of various types of search algorithms, such as quantum search, harmony search, cognitive search, genetic search, and many others. It is a valuable resource and provides a solid technical base for frontline investigations of search algorithms for scientists and students interested in search and optimization methods.

Jupe Anthony Iacone,2020-11-15 Jupe was a nickname bestowed on a larger-than-life individual by the name of John J. Judefind. He received that honor from his classmates. Jupe was a spectacular student/athlete who won a small, silver statuette as the first great athlete at his beloved school, St. James High School in Chester, Pennsylvania. He won All-Delco honors in football and earned a full scholarship to LaSalle College in Philadelphia even though baseball was his best sport. He was on the brink of becoming a major league player having been granted a well-earned tryout by the Philadelphia Athletics, when the surprise attack by Japan at Pearl Harbor changed his plans. Jupe left LaSalle and joined the US. Army in November of 1942. An Army recruiter talked him into joining the Eighty-Second Division of the 508th Airborne Infantry Regiment, where he was promoted to the rank of platoon sergeant. Jupe soon showed everyone that he was a head above the crowd and was thought to be the poster boy for the 508. He jumped out of an airplane on D-Day and into the arms of history. He put his love of God, country, and the people who surrounded him ahead of his own dreams and aspirations. In this story, Jupe showed us what it was like to be a man of principle and integrity. Follow along on his journey that lasted just twenty-one years even though his connection to us has passed the realms of time.

Letters to His Children from an Uncommon Attorney David Roberts,2014-08-26 This memoir was inspired by the author’s daughter. He would tell her stories about incidents in his life: so she persuaded him to write them down. “You must write all this down, Dad, so they can be read by your grandchildren. And you must get on with it before you die.” Some stories are brief, half a page: others are long, twelve pages. It is the sort of book to keep by the bedside and dip into, one story at a time. Some stories cover events that occurred when the author was a small boy growing up in England during the war. Some cover incidents while he and his wife were travelling, in China, Japan, France, in Canada and in other odd places: events that occurred in the neighbourhood in Caulfeild Cove, where he and his wife have lived for fifty two years. There are pieces about Haida Gwaii and some about his experiences practising law. The stories range from the funny to the harrowing.
