The Manual includes 121 photos of single foods and recipes, as well as household measurements (e.g. cups, spoons), of which 85 were taken in SKN and 36 were taken in Brazil. All photos were taken using a similar methodology. The photos cover the measurement of most food groups, either by photos of portions or of household measurements. Picture-Book Professors Melissa Terras,2018-10-31 How is academia portrayed in children's literature? This Element ambitiously surveys fictional professors in texts marketed towards children, who are overwhelmingly white and male, tending to be elderly scientists. Professors fall into three stereotypes: the vehicle to explain scientific facts, the baffled genius, and the evil madman. By the late twentieth century, the stereotype of the male, mad, muddlehead, called Professor SomethingDumb, is formed in humorous yet pejorative fashion. This Element provides a publishing history of the role of academics in children's literature, questioning the book culture which promotes the enforcement of stereotypes regarding intellectual expertise in children's media. This title is also available, with additional material, as Open Access.
