Soccer Solutions Gabriel Akuya,2006 It took Harry Cornell two years to figure out that his wife, Karen Payne, did not die in the World Trade Center on nine-eleven. He discovers that his wife had been obsessed with finding an historic African artifact, a carved statue of a Bantu warrior, brought to America on a slave ship in the late eighteenth century. Convinced that finding the artifact will lead to his wife, Cornell travels to the Sea Islands off the coast of South Carolina. The trail narrows to the five star resort of Hilton Head Island. His first discovery is the murder of his wife's former lover who also was reported as a casualty of nine-eleven. The brutal murder draws him deep into the low country and the world of the Gullah and root doctors. Cornell discovers that these medicine men of years past still work voodoo magic. He finds others are intensely interested in locating the artifact as well. Rebecca Kane claims that the carved statue is an heirloom of her family and she knows her fellow native islanders will help her find it. Clinton Cooper, the unscrupulous and disgraced former CEO, is convinced the artifact will lead to a hoard of diamonds and gold bullion, a treasure he desperately needs. The root doctor unleashes his terrible magic to help Rebecca Kane locate the artifact but the costs are high. In the end the legendary curse that accompanied the Gullah Prince works its evil one final time.

Correct Scores - A Guide to Betting on Football Jason Houlsby,2013-12-16 Some people think that trying to predict the result of a football match is largely a waste of time. They instinctively know that 'anything can happen in those 90 minutes and often does'. It's true that you can never predict the result of a football match with any degree of certainty, but that doesn't mean that football is wholly unpredictable. A football match is probabilistic in nature and always involves an element of 'God plays dice'. Freak results happen and they are largely unpredictable, but they happen no more often than they should and the best teams win more often than not. To be profitable betting on football it's important to evaluate probabilities rather than predict winners and to use a value based approach to betting. You'll need to establish what factors are important and therefore what information is relevant and you'll need to understand the nature of the problem space. The traditional approach to data processing for football is to use ratings and statistics, however neural networks provide a more sophisticated approach. The subconscious mind can also be very powerful when trained and used in the right way. Some people rely too much on their 'gut feeling' when gambling and other people not enough. Sometimes we feel more certain about a decision than we should and we tend not to think in terms of probabilities, however it is possible to train our minds to be more effective. It's also important to take a disciplined and intelligent approach and to always learn and evolve. One thing that you must accept is that the process involves losing and you can't force your luck. You also need to be realistic: luck is completely random and impersonal. You can be lucky after the event, but not before. You can't see the future in a dream. Dreams are windows to the subconscious, not the future. Whether you plan to take a systematic approach to betting on football or not, this guide will help you to understand what's important and what's not and how best to proceed. There is also a small, easy to understand introduction to neural networks describing what they are and how they work by way of a simple example.

Attacking Soccer Massimo Lucchesi,2001-12-06 This book examines match strategies for creating goal scoring opportunities out of the following systems of play: 4-4-2, 4-3-3, 3-5-2, 4-3-1-2, 4-5-1. For each system, the author discusses the strategy, tactics, system and schemes of play as well as the technical, tactical and physical characteristics of the players who use the system. Several situational attacking schemes are also presented using clear diagrams and detailed descriptions.
