The Routledge Companion to Global Internet Histories Gerard Goggin, Mark McLelland, 2017-02-17
The Routledge Companion to Global Internet Histories brings together research on the diverse Internet histories that have evolved in different regions, language cultures and social contexts across the globe. While the Internet is now in its fifth decade, the understanding and formulation of its histories outside of an anglophone framework is still very much in its infancy. From Tunisia to Taiwan, this volume emphasizes the importance of understanding and formulating Internet histories outside of the anglophone case studies and theoretical paradigms that have thus far dominated academic scholarship on Internet history. Interdisciplinary in scope, the collection offers a variety of historical lenses on the development of the Internet: as a new communication technology seen in the context of older technologies; as a new form of sociality read alongside previous technologically mediated means of relating; and as a new media vehicle for the communication of content.

Digarec Keynote-Lectures 2009/10 Stephan Günzel, 2011 The sixth volume of the DIGAREC Series holds the contributions to the DIGAREC Keynote-Lectures given at the University of Potsdam in the winter semester 2009/10. With contributions by Mark J.P. Wolf (Concordia University Wisconsin), Espen Aarseth (Center for Computer Games Research, IT University of Copenhagen), Katie Salen (Parsons New School of Design, New York), Laura Ermi and Frans Mäyrä (University of Tampere), and Lev

Manovich (University of Southern California, San Diego).

Gaming in Social, Locative and Mobile Media L.

Hjorth, I. Richardson, 2014-05-29 Drawing on case studies across the Asia-Pacific region, *Gaming in Social, Locative and Mobile Media* explores the 'playful turn' in contemporary everyday life, and the role of mobile devices, games and social media in this transformation.

Contributions range from assessments of Nintendo's lasting technological impact in Japan and globally to analyses of mobile social gaming among teenage girls in Korea, with qualitative and quantitative methodologies set in contact with one another to

New Consumer Behavior Theories from Japan Akira Shimizu, 2021-04-20 This book focuses on a new type of inclusive consumer decision-making process model (CDM) related to new leading-edge consumers. There have been two main types of CDMs for consumer behavior: one is the stimulus-response model and the other is the information-processing model. The stimulus-response model is applicable when consumers buy low-involvement products, and the information-processing model applies for high-involvement products. Thus consumers' decision making depends on the involvement level for the products. With the advent of the widespread use of the Internet, however, the situation has changed. Consumers whose information sensitivity is high (i.e., among leading-edge consumers) now use the Internet to search for information even for low-involvement products. The consumers' decision-making process depends therefore on their information sensitivity, not on the involvement level of the products. Also, these leading-edge consumers become in effect another type of media as they broaden their experience through the Internet. Under these circumstances, research about leading-edge consumers and the introduction of a new CDM is highly significant. This book gathers data about leading-edge consumers, analyzes these data, then proposes a new type of CDM called "circulation marketing". Following this model, not only the previous types of CDM, but also the new kind of CDM, including share behavior of leading-edge consumers, is explained.

how to conduct independent analysis. Locating Japan in a comparative and interdisciplinary perspective, this Handbook is an essential resource for students and scholars interested in Japanese studies, Asian studies and global studies.

Fields, 2014-01-22 Successfully Navigate the Evolving World of Mobile and Social Game Design and Monetization Completely updated, **Mobile & Social Game Design: Monetization Methods and Mechanics**, Second Edition explains how to use the interconnectedness of social networks to make stickier, more compelling games on all types of devices. Through the book's many design and marketing techniques, strategies, and examples,

you will acquire a better understanding of the design and monetization mechanics of mobile and social games as well as working knowledge of industry practices and terminology. Learn How to Attract—and Retain—Gamers and Make Money The book explores how the gaming sector has changed, including the evolution of free-to-play games on mobile and tablet devices, sophisticated subscription model-based products, and games for social media websites, such as Facebook. It also demystifies the alphabet soup of industry terms that have sprouted up around mobile and social game design and monetization. A major focus of the book is on popular mechanisms for acquiring users and methods of monetizing users. The author explains how to put the right kinds of hooks in your games, gather the appropriate metrics, and evaluate that information to increase the game's overall stickiness and revenue per user. He also discusses the sale of virtual goods and the types of currency used in games, including single and dual currency models. Each chapter includes an interview with industry leaders who share their insight on designing and producing games, analyzing metrics, and much more.
