New Consumer Behavior Theories from Japan Akira Shimizu,2021-04-20 This book focuses on a new type of inclusive consumer decision-making process model (CDM) related to new leading-edge consumers. There have been two main types of CDMs for consumer behavior: one is the stimulus–response model and the other is the information-processing model. The stimulus–response model is applicable when consumers buy low-involvement products, and the information-processing model applies for high-involvement products. Thus consumers’ decision making depends on the involvement level for the products. With the advent of the widespread use of the Internet, however, the situation has changed. Consumers whose information sensitivity is high (i.e., among leading-edge consumers) now use the Internet to search for information even for low-involvement products. The consumers’ decision-making process depends therefore on their information sensitivity, not on the involvement level of the products. Also, these leading-edge consumers become in effect another type of media as they broaden their experience through the Internet. Under these circumstances, research about leading-edge consumers and the introduction of a new CDM is highly significant. This book gathers data about leading-edge consumers, analyzes these data, then proposes a new type of CDM called “circulation marketing”. Following this model, not only the previous types of CDM, but also the new kind of CDM, including share behavior of leading-edge consumers, is explained.

Power and Humility John Keane,2018-07-31 Democracy urgently needs re-imagining if it is to address the dangers and opportunities posed by current global realities, argues leading political thinker John Keane. He offers an imaginative, radically new interpretation of the twenty-first-century fate of democracy. The book shows why the current literature on democracy is failing to make sense of many intellectual puzzles and new political trends. It probes a wide range of themes, from the growth of cross-border institutions and capitalist market failures to the greening of democracy, the dignity of children and the anti-democratic effects of everyday fear, violence and bigotry. Keane develops the idea of 'monitory democracy' to show why periodic free and fair elections are losing their democratic centrality; and why the ongoing struggles by citizens and their representatives, in a multiplicity of global settings, to humble the high and mighty and deal with the dangers of arbitrary power, force us to rethink what we mean by democracy and why it remains a universal ideal.

Democracy and Media Decadence John Keane,2013-10-31 Examines the role of the media in shaping and representing political life, arguing that 'media decadence' is harmful for democracy.

Democracy on the Precipice Zygmunt Bauman,Council of Europe. Directorate of Policy Planning,2012-01-01 Democracy is well-established and soundly practiced in most European countries. But despite unprecedented progress, there is growing dissatisfaction with the state of democracy and deepening mistrust of democratic institutions; a situation exacerbated by the economic crisis. Are Europe's democracies really under threat? Has the traditional model of European democracy exhausted its potential? A broad consensus is forming as to the urgent need to examine the origins of the crisis and to explore visions and strategies which could contribute to rebuilding confidence in democracy. As Europe's guardian of democracy, human rights and the rule of law, the Council of Europe is committed to exploring the state and practice of European democracy, as well as identifying new challenges and anticipating future trends. In order to facilitate this reflection, the Council of Europe held a series of Democracy Debates with the participation of renowned specialists working in a variety of backgrounds and disciplines. This publication presents the eight Democracy Debate lectures. Each presentation analyses a specific aspect of democracy today, placing the issues not only in their political context but also addressing the historical, technological and communication dimensions. The authors make proposals on ways to improve democratic governance and offer their predictions on how democracy in Europe may evolve. Together, the presentations contribute to improving our understanding of democracy today and to recognising the ways it could be protected and strengthened.
