Model Rules of Professional Conduct American Bar Association. House of Delegates, Center for Professional Responsibility (American Bar Association), 2007 The Model Rules of Professional Conduct provides an up-to-date resource for information on legal ethics. Federal, state and local courts in all jurisdictions look to the Rules for guidance in solving lawyer malpractice cases, disciplinary actions, disqualification issues, sanctions questions and much more. In this volume, black-letter Rules of Professional Conduct are followed by numbered Comments that explain each Rule's purpose and provide suggestions for its practical application. The Rules will help you identify proper conduct in a variety of given situations, review those instances where discretionary action is possible, and define the nature of the relationship between you and your clients, colleagues and the courts.

21st Century Airlines Nawal K. Taneja, 2017-09-08 In *21st Century Airlines: Connecting the Dots*, Nawal Taneja addresses the challenges and opportunities facing the airline industry as it tries to innovate and create products and services that are radically different by 'connecting the dots' at four key levels: recognizing the implications of global events, improving cross-functional collaboration within the organization, working more closely with the travel chain, and providing much higher engagements with connectors within the social networks. The book synthesizes insights gained from the experience of non-traditional businesses, such as Uber, that have no

physical assets and that focus on scalability through platforms, as well as traditional businesses, such as Mercedes-Benz, that are transitioning from operators of physical assets to adapt to the on-demand and sharing economies. These insights show pragmatically that digitizing airline businesses would require digital mind-sets, digital technologies, digital strategies, and digital workplaces to explore new frontiers in value for both customers and airlines. Moreover, forward-thinking airlines need to consider working with bimodal organizational structures, in which one group optimizes current business models (network, fleet, and schedule planning, as well as revenue management) while a second group explores innovative ways to add digital features to physical products to provide a consistent experience throughout the journey. The book is written for all senior-level practitioners of airlines and related businesses worldwide, as well as senior-level government policymakers.

Portal Through the Pond David K.

Anderson, 2013-02-17 They said her grandfather was dead. They said her grandmother was crazy. Christy knows they're wrong. When her grandmother dies, 13-year-old Christy inherits an old family secret: the pond behind her house is in fact a portal to another world. What's more, she learns that her grandfather went through the portal when he mysteriously "disappeared" nine years ago. Christy tries to respect her grandmother's final wishes and not go exploring, but when a classmate named Rob falls into the pond, she has to act. Since no one would believe her if she told them the truth

about the pond, Christy arranges her own rescue party. In order to rescue Rob, she'll have to brave a bizarre alien landscape, evade hostile creatures, and protect Danny, the boy from next door who followed her through the portal. Meanwhile on Earth, the grown-ups launch a frantic search, and they're willing to drain the pond to find out what happened. Will Christy be able to find her grandfather, rescue Rob, and return safely to Earth before she becomes a permanent resident of the Empty World? *Portal Through the Pond* is the first book of the Empty World Saga, a science fiction adventure series for kids aged 8-12. If your kids have blown through the *Land of Stories*, devoured the *Keeper of the Lost Cities*, or can't wait for the next *Wings of Fire*, make the complete Empty World Saga their next read. Pick up your copy of *Portal Through the Pond*, and land in an alien world!

Global Trends 2040 National Intelligence Council, 2021-03 The ongoing COVID-19 pandemic marks the most significant, singular global disruption since World War II, with health, economic, political, and security implications that will ripple for years to come. -Global Trends 2040 (2021) Global Trends 2040-A More Contested World (2021), released by the US National Intelligence Council, is the latest report in its series of reports starting in 1997 about megatrends and the world's future. This report, strongly influenced by the COVID-19 pandemic, paints a bleak picture of the future and describes a contested, fragmented and turbulent world. It specifically discusses the four main trends that will shape tomorrow's world: - Demographics-by 2040, 1.4 billion people will be added mostly in Africa and South Asia. - Economics-increased government debt and concentrated economic power will escalate problems for the poor and middleclass. - Climate-a hotter world will increase water, food, and health insecurity. - Technology-the emergence of new technologies could both solve and cause problems for human life. Students of trends, policymakers, entrepreneurs, academics, journalists and anyone eager for a glimpse into the next decades, will find this report, with colored graphs, essential reading.

The Routledge Companion to Mobile Media Art

Larissa Hjorth, Adriana de Souza e Silva, Klare Lanson, 2020-07-28 In this companion, a diverse, international and interdisciplinary group of contributors and editors examine the rapidly expanding, far-reaching field of mobile media as it intersects with art across a range of spaces—theoretical, practical and conceptual. As a vehicle for—and of—the everyday, mobile media is recalibrating the relationship between art and digital networked media, and reshaping how creative practices such as writing, photography, video art and filmmaking are being conceptualized and practised. In exploring these innovations, The Routledge Companion to Mobile Media Art pulls together comprehensive, culturally nuanced and interdisciplinary approaches; considerations of broader media ecologies and histories and political, social and cultural dynamics; and critical and considered perspectives on the intersections between mobile media and art. This book is the definitive publication for researchers, artists and students interested in comprehending all the various aspects of mobile media art, covering digital media and culture, internet studies, games studies, anthropology, sociology, geography, media and communication, cultural studies and design.

Asia's Digital Dividends David C. Michael, Greg Sutherland, 2002 Thus, this book provides e-managers and e-entrepreneurs in the West with a coherent, in-depth look at Asian e-commerce and the wealth of opportunities it presents.

Design for Experience Jinwoo Kim, 2015-03-17 Presents a strategic perspective and design methodology that guide the process of developing digital products and services that provide 'real experience' to users. Only when the material experienced runs its course to fulfilment is it then regarded as 'real experience' that is distinctively senseful, evaluated as valuable, and

harmoniously related to others. Based on the theoretical background of human experience, the book focuses on these three questions: How can we understand the current dominant designs of digital products and services? What are the user experience factors that are critical to provide the real experience? What are the important HCI design elements that can effectively support the various UX factors that are critical to real experience? Design for Experience is intended for people who are interested in the experiences behind the way we use our products and services, for example designers and students interested in interaction, visual graphics and information design or practitioners and entrepreneurs in pursuit of new products or service-based start-ups.

Perspectives on ICT4D and Socio-Economic Growth Opportunities in Developing Countries

Ndayizigamiye, Patrick, Barlow-Jones, Glenda, Brink, Roelien, Bvuma, Stella, Minty, Rehana, Mhlongo, Siyabonga, 2020-10-09 Technology has been hailed as one of the catalysts toward economic and human development. In the current economic era of the Fourth Industrial Revolution, information acquisition, transformation, and dissemination processes are posed to be the key enablers of development. Building Big Data and Analytics Solutions in the
Cloud Wei-Dong Zhu,Manav Gupta,Ven Kumar,Sujatha
Perepa,Arvind Sathi,Craig Statchuk,IBM

Redbooks,2014-12-08 Big data is currently one of
the most critical emerging technologies.

Organizations around the world are looking to
exploit the explosive growth of data to unlock
previously hidden insights in the hope of creating
new revenue streams, gaining operational
efficiencies, and obtaining greater understanding
of customer needs. It is important to think of big
data and analytics together. Big data is the term
used to describe the recent explosion of different
types of data from disparate sources. Analytics is
about examining data to derive interesting and
relevant trends and patterns, which can be used to
inform decisions, optimize processes, and even
drive new business models. With today's deluge of
data comes the problems of processing that data,
obtaining the correct skills to manage and analyze
that data, and establishing rules to govern the
data's use and distribution. The big data
technology stack is ever growing and sometimes
confusing, even more so when we add the
complexities of setting up big data environments
with large up-front investments. Cloud computing
seems to be a perfect vehicle for hosting big data
workloads. However, working on big data in the
cloud brings its own challenge of reconciling two
contradictory design principles. Cloud computing
is based on the concepts of consolidation and

resource pooling, but big data systems (such as Hadoop) are built on the shared nothing principle, where each node is independent and self-sufficient. A solution architecture that can allow these mutually exclusive principles to coexist is required to truly exploit the elasticity and ease-of-use of cloud computing for big data environments. This IBM® Redpaper™ publication is aimed at chief architects, line-of-business executives, and CIOs to provide an understanding of the cloud-related challenges they face and give prescriptive guidance for how to realize the benefits of big data solutions quickly and cost-effectively.

Editors Elizabeth Buie and Dianne Murray have brought together over 30 experts to outline practical advice to both usability specialists and government technology professionals and managers. Open government, plain language, accessibility, biometrics, service design, internal vs. external systems, and cross-cultural issues, as well as working with the

government, are all covered in this book. Covers both public-facing systems and internal systems run by governments Details usability and user experience approaches specific to government websites, intranets, complex systems, and applications Provides practical material that allows you to take the information and immediately use it to make a difference in your projects

Environmental impacts and potential of the sharing economy John Magne Skjelvik, Anne Maren Erlandsen, Oscar Haavardsholm, 2017-10-19 The various sharing initiatives seen in the Nordic countries over the last years within transportation, housing/accommodation, sharing/renting of smaller capital goods and personal services could yield considerable benefits for consumers due to better quality and/or lower prices of the services. They also have a potential for emissions reductions of CO₂ and local pollutants. However, savings from lower prices could lead to increased emissions from increased demand of the services (particularly transport) and increased spending on other goods

and services. Depending on how consumers spend their savings, these changes could partly, wholly or more than offset the initial emission reductions. The impacts on overall CO2 emissions depend on whether the emissions are taxed, part of the emissions trading system EU ETS or not regulated at all.
