Ask a Manager Alison Green, 2018-05-01 From the creator of the popular website Ask a Manager and New York's work-advice columnist comes a witty, practical guide to 200 difficult professional conversations—featuring all-new advice! There's a reason Alison Green has been called “the Dear Abby of the work world.” Ten years as a workplace-advice columnist have taught her that people avoid awkward conversations in the office because they simply don't know what to say. Thankfully, Green does—and in this incredibly helpful book, she tackles the tough discussions you may need to have during your career. You'll learn what to say when • coworkers push their work on you—then take credit for it • you accidentally trash-talk someone in an email then hit “reply all” • you're being micromanaged—or not being managed at all • you catch a colleague in a lie • your boss seems unhappy with your work • your cubemate's loud speakerphone is making you homicidal • you got drunk at the holiday party Praise for Ask a Manager “A must-read for anyone who works . . . [Alison Green's] advice boils down to the idea that you should be professional (even when others are not) and that communicating in a straightforward manner with candor and kindness will get you far, no matter where you work.”—Booklist (starred review) “The author's friendly, warm, no-nonsense writing is a pleasure to read, and her advice can be widely applied to relationships in all areas of readers' lives. Ideal for anyone new to the job market or new to management, or anyone hoping to improve their work experience.”—Library Journal (starred review) “I am a huge fan of Alison Green's Ask a Manager column. This book is even better. It teaches us how to deal with many of the most vexing big and little problems in our workplaces—and to do so with grace, confidence, and a sense of humor.”—Robert Sutton, Stanford professor and author of *The No Asshole Rule* and *The Asshole Survival Guide* “Ask a Manager is the ultimate playbook for navigating the traditional workforce in a diplomatic but firm way.”—Erin Lowry, author of *Broke Millennial: Stop Scraping By and Get Your Financial Life Together*

Nanovation Kevin Freiberg, Jackie Freiberg, Dain Dunston, 2012-07-23 Do you have the eyes, the ears, and the hands to be a Nanovator? You're about to find out. In India, entire families?too poor to afford a car?crowd onto a single motor scooter every day to brave the tangled traffic lurching through the streets. One evening Tata Motor's venerable chairman Ratan Tata witnessed something on those rain-soaked streets that both horrified him and birthed a dream: an overloaded scooter lost traction in a busy intersection and sent several members of the family tumbling across the pavement. In that moment Nanovation took root in Tata's imagination. The very idea was supposed to be impossible. A safe and appealing family car for the price of a motor scooter? The experts dismissed it. But Ratan Tata was undeterred. When budget constraints, design restrictions, the rising costs of materials, and political agitation threatened to derail the project, Team Nano pressed on. This is the story of how, in the face of insurmountable odds, Tata Motors created one of the greatest innovations in the auto industry since Model-T. Nanovation has disrupted an entire industry and changed the game for India forever. Imagine what it can do for your business. Is your company changing the way society functions? What's your Nanovative idea? It's time to get moving! Warning! Don't read this book unless you are ready to challenge management dogma, taken-for-granted assumptions, and outdated systems by asking what if? and why not? to some of your industry's toughest questions. But, if you're ready to revolutionize the products you make, the processes you use, and the companies you build, pull up a seat at the drafting table with the creators of the Nano, the most important car to roll off the assembly line in decades. Discover the thinking that bred their ingenuity and the leadership that encouraged them to overcome adversity, to take risks despite their fear of failure, and to innovate beyond their customer's wildest expectations. Endorsements: If you're interested in stoking the fires of innovation and making a profit while making a difference, Nanovation is a must read. ?Indra K. Nooyi, chairman and CEO, PepsiCo The Freiberg's deep dive into a company that transformed an entire industry is loaded with hands-on-advice- and a warning not to downsize your dreams!- Gary Kelly, chairman, president and CEO, Southwest Airlines Nanovation is for leaders who want to leave a lasting legacy in the world. ?Chris Connor, chairman and CEO, Shermin-Williams Company Read Nanovation and learn what you can do to create an innovative culture in your organization. ?Ken Blanchard, co-author One Minute Manager, Full Steam Ahead, and Lead with LUV Nanovation is a must read for any leader. ?Eric Danziger, CEO, Wyndham Hotel Group Nanovation is for leaders who want to shake it up. ?Bruce Bochy, manager, 2010 World Champion San Francisco Giants Vibrant and energetic, the passion of the authors reflects that of the innovators it chronicles...A practical guide for creating a radical culture of innovation. ?N.R. Constellation of Genius Kevin Jackson, 2013-09-17 Ezra Pound referred to 1922 as Year One of a new era. It was the year that began with the publication of James Joyce's *Ulysses* and ended with the publication of T. S. Eliot's *The Waste Land*, two works that were arguably the sun and moon of modernist literature, some would say of modernity itself. In *Constellation of Genius*, Kevin Jackson puts the titanic achievements of Joyce and Eliot in the context of the world in which their works first appeared. As Jackson writes in his introduction, On all sides, and in every field, there was a frenzy of innovation. It is in 1922 that Hitchcock directs his first feature; Kandinsky and Klee join the Bauhaus; the first AM radio station is launched; Walt Disney releases his first animated shorts; and Louis Armstrong takes a train from New Orleans to Chicago, heralding the age of modern jazz. On other fronts, Einstein wins the Nobel Prize in Physics, insulin is introduced to treat diabetes, and the tomb of Tutankhamun is discovered. As Jackson writes, the sky was blazing with a ‘constellation of genius’ of a kind that had never been known before, and has never since been rivaled. *Constellation of Genius* traces an unforgettable journey through the diaries of the actors, anthropologists, artists, dancers, designers, filmmakers, philosophers, playwrights, politicians, and scientists whose lives and works—over the course of twelve months—brought a seismic shift in the way we think, splitting the cultural world in two. Was this a matter of inevitability or of coincidence? That is for the reader of this romp, this hugely entertaining chronicle, to decide.

Aerospace power in the twenty-first century a basic primer Clayton K. S. Chun, 2001 Dr. Chun's *Aerospace Power in the Twenty-First Century: A Basic Primer* is a great start towards understanding the importance of aerospace power and its ability to conduct modern warfare. Aerospace power is continually changing because of new technology, threats, and air and space theories. However, many basic principles about aerospace power have stood the test of time and warfare. This book provides the reader with many of these time-tested ideas for consideration and reflection. Although *Aerospace Power in the Twenty-First Century* was written for future officers, individuals desiring a broad overview of aerospace power are invited to read, share, and discuss many of the ideas and thoughts presented here. Officers from other services will find that this introduction to air and space forces will give them a good grasp of aerospace power. More experienced aerospace leaders can use this book to revisit many of the issues that have affected air and space forces in the past and that might affect them in the future. Air Force officers will discover that *Aerospace Power in the Twenty-First Century* is a very timely and reflective resource for their professional

libraries.

The Art of Self-Deception William Kronick,2011-09 Before turning to novel-writing, William Kronick enjoyed a long career as both a documentary and theatrical filmmaker. As writer-director, his highly acclaimed Network Specials ranged from the National Geographic's Alaska! to six Plimpton! entertainments to Mysteries of the Great Pyramid. In the feature arena, he directed the comedy, The 500 Pound Jerk, and the Second Unit on such major productions as King Kong (1976), Flash Gordon and others. His first novel, The Cry of Sirens (2004) was followed by Cooley Wyatt, then N. Y. / L. A. All three explore, in the framework of morality tales, the dynamics of authentic artistic talent, celebrity and commerce in our modern culture. Each one centers on a violent act involving a physical or moral crime committed by the protagonist; both he and the reader must decide what represents appropriate justice. His fourth novel, All Stars Die, tells of two lovers for whom morality is not the issue, but their dark secrets are. The Art of Self-Deception returns to the themes of Mr. Kronick's first three novels.

Myth and Society in Ancient Greece Jean Pierre Vernant,1988 In this groundbreaking study, Vernant declinates a compelling new vision of ancient Greece. Myth and Society takes us far from the calm and familiar images of Polykleitos and the Parthenon, and reveals to us a fundamentally other culture--one of slavery, of blood sacrifice, of perpetual and ritualized warfare, of ceremonial hunting and ecstasies.--Publisher's description.

The Future of Air Power in the Aftermath of the Gulf War Robert L. Pfaltzgraff,Richard H. Shultz,1992 This collection of essays reflects the proceedings of a 1991 conference on The United States Air Force: Aerospace Challenges and Missions in the 1990s, sponsored by the USAF and Tufts University. The 20 contributors comment on the pivotal role of airpower in the war with Iraq and address issues and choices facing the USAF, such as the factors that are reshaping strategies and missions, the future role and structure of airpower as an element of US power projection, and the aerospace industry's views on what the Air Force of the future will set as its acquisition priorities and strategies. The authors agree that aerospace forces will be an essential and formidable tool in US security policies into the next century. The contributors include academics, high-level military leaders, government officials, journalists, and top executives from aerospace and defense contractors.

Our Enemies in Blue Kristian Williams,2015-08-03 Let's begin with the basics: violence is an inherent part of policing. The police represent the most direct means by which the state imposes its will on the citizenry. They are armed, trained, and authorized to use force. Like the possibility of arrest, the threat of violence is implicit in every police encounter. Violence, as well as the law, is what they represent. Using media reports alone, the Cato Institute's last annual study listed nearly seven thousand victims of police misconduct in the United States. But such stories of police brutality only scratch the surface of a national epidemic. Every year, tens of thousands are framed, blackmailed, beaten, sexually assaulted, or killed by cops. Hundreds of millions of dollars are spent on civil judgments and settlements annually. Individual lives, families, and communities are destroyed. In this extensively revised and updated edition of his seminal study of policing in the United States, Kristian Williams shows that police brutality isn't an anomaly, but is built into the very meaning of law enforcement in the United States. From antebellum slave patrols to today's unarmed youth being gunned down in the streets, peace keepers have always used force to shape behavior, repress dissent, and defend the powerful. Our Enemies in Blue is a well-researched page-turner that both makes historical sense of this legalized social pathology and maps out possible alternatives.
