Red Zone Baghdad Marcus Fielding, 2011-10-01
When Colonel Marcus Fielding returned home from his tour of duty in Baghdad, a taxi driver asked him what it was like being a soldier there. Marcus, an experienced veteran, found himself speechless – how could he properly explain to a civilian the nature of his work and his life during his tour? He mouthed a few platitudes but felt frustrated: he had not done justice to his experience or to his fellow soldiers still in Iraq. This book is the result of that frustration, and it provides fascinating insights into the conditions on the ground in a theatre of war that more than 20,000 Australian men and women have served. Marcus was deployed as an ‘embed’ in the final days of the Australian presence. By this time, the violence had subsided somewhat from the carnage of the first few years of Operation Iraqi Freedom, but with several crucial elections being held, sectarian terror nonetheless reared its frightening head on many occasions. From his ‘office’ in Saddam’s former al-Faw Palace, Marcus finds himself more involved with nation-building than killing ‘bad guys’. His tour is not so much about combat, guts and glory as it is about dealing with the vital issues associated with the elections and the Coalition troop draw-down. But he also paints a vivid picture of everyday life set against a

backdrop of violence: the heat and dust, attending meetings in the Red Zone, the camaraderie of the cigar club, visits to orphanages and the morale-raising visits of US 'personalities'. There are few Australian books written about the contentious war in Iraq. Red Zone Baghdad presents a rare glimpse into the reality of an officer's war in our time.

Technobiophilia Sue Thomas, 2013-09-26 Why are there so many nature metaphors - clouds, rivers, streams, viruses, and bugs - in the language of the internet? Why do we adorn our screens with exotic images of forests, waterfalls, animals and beaches? In *Technobiophilia: Nature and Cyberspace*, Sue Thomas interrogates the prevalence online of nature-derived metaphors and imagery and comes to a surprising conclusion. The root of this trend, she believes, lies in biophilia, defined by biologist E.O. Wilson as 'the innate attraction to life and lifelike processes'. In this wide-ranging transdisciplinary study she explores the strong thread of biophilia which runs through our online lives, a phenomenon she calls 'technobiophilia', or, the 'innate attraction to life and lifelike processes as they appear in technology'. The restorative qualities of biophilia can alleviate mental fatigue and enhance our capacity for directed attention, soothing our connected minds and easing our relationship with computers. *Technobiophilia: Nature and Cyberspace* offers new insights on what is commonly known as 'work-life balance'. It explores ways to make our peace with technology-induced anxiety and achieve a 'tech-nature balance' through practical experiments designed to enhance our digital lives indoors, outdoors, and online. The book draws on a long history of literature on nature and

technology and breaks new ground as the first to link the two. Its accessible style will attract the general reader, whilst the clear definition of key terms and concepts throughout should appeal to undergraduates and postgraduates of new media and communication studies, internet studies, environmental psychology, and human-computer interaction. www.technobiophilia.com

In The Dark Forest, Earth is reeling from the revelation of a coming alien invasion-in just four centuries' time. The aliens' human collaborators may have been defeated, but the presence of the sophons, the subatomic particles that allow Trisolaris instant access to all human information, means that Earth's defense plans are totally exposed to the enemy. Only the human mind remains a secret. This is the motivation for the Wallfacer Project, a daring plan that grants four men enormous resources to design secret strategies, hidden through deceit and misdirection from Earth and Trisolaris alike. Three of the Wallfacers are influential statesmen and scientists, but the fourth is a total unknown. Luo Ji, an unambitious Chinese

Jungle Night Sandra Boynton, 2023-06-20 Two celebrated artists, Sandra Boynton and Yo-Yo Ma, come together for *Jungle Night*, a soothing bedtime board book. (Okay, MOSTLY soothing.) This board book guides us through the jungle to hear the distinctive, gentle snore of each animal: “Listen to the tiger: ZEEE-ZOOO-HAAA. Listen to the cheetah: CHEE-CHEE-TAAAH.” A free downloadable recording at JungleNight.com offers a narration of the book, with each and every animal snore interpreted by the expressive, playful cello of Yo-Yo Ma. He even does the elephant’s stop-the-show snore—though admittedly that took Ma’s cello PLUS the classic horn salute of the James R. Barker steamship. (Seriously.) All this fabulousness leads into the coolest lullaby ever: “Jungle Gymnopédie No. 1,” a polyrhythmic jungle-y arrangement by Boynton of Erik Satie’s renowned piece, with Yo-Yo Ma on cello, guitar played by Ron Block of Alison Krauss Union Station, and drums by Kevin MacLeod. “Yo-Yo and I chose this piece because it’s the most gorgeous and mesmerizing night song imaginable,” explains Boynton. “And there was surely nothing else that could get those animals back to sleep after that elephant blast.”

Performance and the Medical Body Alex Mermikides, Gianna Bouchard, 2016-02-25 This edited collection focuses on performance practice and analysis

that engages with medical and biomedical sciences. After locating the 'biologization' of theatre at the turn of the twentieth century, it examines a range of contemporary practices that respond to understandings of the human body as revealed by biomedical science. In bringing together a variety of analytical perspectives, the book draws on scholars, scientists, artists and practices that are at the forefront of current creative, scientific and academic research. Its exploration of the dynamics and exchange between performance and medicine will stimulate a widening of the debate around key issues such as subjectivity, patient narratives, identity, embodiment, agency, medical ethics, health and illness. In focusing on an interdisciplinary understanding of performance, the book examines the potential of performance and theatre to intervene in, shape, inform and extend vital debates around biomedical knowledge and practice in the contemporary moment.

Archive Everything Gabriella Giannachi, 2023-09-19
How the archive evolved to include new technologies, practices, and media, and how it became the apparatus through which we map the everyday. In *Archive Everything*, Gabriella Giannachi traces the evolution of the archive into the apparatus through which we map the everyday. The archive, traditionally a body of documents or a site for the preservation of documents, changed over the centuries to encompass, often concurrently, a broad but interrelated number of practices not traditionally considered as archival. Archives now consist of not only documents and sites but also artworks, installations, museums, social media platforms, and mediated and mixed reality environments. Giannachi tracks the evolution of these diverse archival practices across the centuries. Archives today offer a multiplicity of viewing platforms to replay the past, capture the present, and map our presence. Giannachi uses archaeological practices to explore all the layers of the archive, analyzing Lynn Herschman Leeson's *!Women Art Revolution* project, a digital archive of feminist artists. She considers the archive as a memory laboratory, with case studies that include visitors' encounters with archival materials in the Jewish Museum in Berlin. She discusses the importance of participatory archiving, examining the “multimedia

roadshow” Digital Diaspora Family Reunion as an example. She explores the use of the archive in works that express the relationship between ourselves and our environment, citing Andy Warhol and Ant Farm, among others. And she looks at the transmission of the archive through the body in performance, bioart, and database artworks, closing with a detailed analysis of Lynn Hershman Leeson's Infinity Engine.
