Forex Trading Money Management System Don Guy,2017-01-17 I'm going to show you how to CRUSH financial markets using a simple Money Management System that reduces your risk while maximizing profits! While this system may focus on FOREX trading and the casino game Roulette, it can be applied to trading

ANY financial market, including stocks, commodities, and binary options. I was inspired to develop this system after a horrible night in Las Vegas where I lost \$2000 playing Roulette with a betting system that I thought was unbeatable. I spent the following 12 years reverse engineering everything that went wrong that dreadful night and developed what I discovered into a simple and powerful Money Management system that makes it easy for anyone to CRUSH financial markets like a professional gambler! After developing this system, I returned to Las Vegas and turned \$20 into \$500 in about 1 hour at the roulette table, and that was down from a high of \$750. The \$500 profit that I walked away with was locked in from the profit-locking mechanism, like a gear that spins freely in one direction but quickly locks in the opposite direction. In January 2015, I had this system programmed into an MT4 Forex Trading Robot so I could automate the entire system (signals, trade execution, and money management). After a few weeks of little activity, the market sprang to life and so did my system! My account doubled in about 48 hours and that's when I knew I had developed something very special. But my trading robots are NOT required to use this system. It can be applied manually to virtually ANY trading system in ANY market and even on casino games like Roulette, although you will get much better results in financial markets where you can have far better statistics than a casino game. So come join me and I'll open a whole new dimension of trading and opportunities for BIG PROFITS that you have never noticed before!

The 10xroi Trading System L R Thomas,2014-01-01 If you are fed up with trading systems that promise the earth and fail to deliver then The 10XR0I Trading System will not disappoint. The leading foreign exchange broker conducted a study that found that winning traders had something in common. Their wins were much larger than their losses. Many trading systems are designed to have lots of wins but that doesn't make them profitable, they just appeal to the Holy Grail seeker who is looking for a trading system that never loses. By trading a high probability system that gives a very large risk reward ratio like The 10XR0I Trading system, you will automatically have a much higher chance of actually making a profit in the Forex markets. Written by a trader with over eight years' experience in trading foreign currencies, this book is written in an easy to comprehend style with lots of illustrations and trading examples to help clarify each part of the system. The system is simple and easy to follow and takes up a very small amount of time as it uses the daily and hourly time frames. This makes it easy to trade around most jobs. Most importantly it explains every part of the system including the correct trading psychology and money management which most systems leave out. This is a typical review from a student. I recommend the 10XR0I Trading System book for novice traders & experienced traders. This is a forex system combined with perfect money management that makes it incredible. This is a must book for every forex trader. Bankim Vaidya

Rocket Science for Traders John F. Ehlers, 2001-07-30 Predict the future more accurately in today's difficult trading times The Holy Grail of trading is knowing what the markets will do next. Technical analysis is the art of predicting the market based on tested systems. Some systems work well when markets are trending, and some work well when they are cycling, going neither up nor down, but sideways. In Trading with Signal Analysis, noted technical analyst John Ehlers applies his engineering expertise to develop techniques that predict the future more accurately in these times that are otherwise so

difficult to trade. Since cycles and trends exist in every time horizon, these methods are useful even in the strongest bull--or bear--market. John F. Ehlers (Goleta, CA) speaks internationally on the subject of cycles in the market and has expanded the scope of his contributions to technical analysis through the application of scientific digital signal processing techniques.
