Chemistry Education Javier García-Martínez, Elena Serrano-Torregrosa, 2015-05-04 Winner of the CHOICE Outstanding Academic Title 2017 Award This comprehensive collection of top-level contributions provides a thorough review of the vibrant field of chemistry education. Highly-experienced chemistry professors and education experts cover the latest developments in chemistry learning and teaching, as well as the pivotal role of chemistry for shaping a more sustainable future. Adopting a practice-oriented approach, the current challenges and opportunities posed by chemistry education are critically discussed, highlighting the pitfalls that can occur in teaching chemistry and how to circumvent them. The main topics discussed include best practices, project-based education, blended learning and the role of technology, including e-learning, and science visualization. Hands-on recommendations on how to optimally implement innovative strategies of teaching chemistry at university and high-school levels make this book an essential resource for anybody interested in either teaching or learning chemistry more effectively, from experience chemistry professors to secondary school teachers, from educators with no formal training in didactics to frustrated chemistry students.

Automated Technology for Verification and Analysis Farn Wang, 2004-10-11 It was our great pleasure to hold the 2nd International Symposium on Automated Technology on Verification and Analysis (ATVA) in Taipei, Taiwan, ROC, October 31-

November 3, 2004.

The series of ATVA meetings is intended for the promotion of related research in eastern Asia. In the last decade, automated technology on verification has become the new strength in industry and brought forward various hot research activities in both Europe and USA. In comparison, eastern Asia has been quiet in the forum. With more and more IC design houses moving from Silicon Valley to eastern Asia, we believe this is a good time to start cultivating related research activities in the region.

The emphasis of the ATVA workshop series is on various mechanical and informative techniques, which can give engineers valuable feedback to fast converge their designs according to the specifications. The scope of interest contains the following research areas: model-checking theory, theorem-proving theory, state-space reduction techniques, languages in automated verification, parametric analysis, optimization, formal performance analysis, real-time systems, embedded systems, infinite-state systems, Petri nets, UML, synthesis, tools, and practice in industry.

The Stray Cat Handbook Tamara Kreuz, 2008-04-21

Finally, a book that deals with stray cats; a how-to guide to trapping and dealing with a stray cat. As a pet owner, animal lover and director of a humane organization that deals with stray cats every day, this book gives us one more tool to

offer to people who want to help the thousands of strays that wander our streets. Bravo! Joseph J. Sprague, Jr., Executive Director, Tree House Animal Foundation Tamara Kreuz cares about the plight of stray and feral cats and gives practical ways to help them. Individuals and shelters can benefit from this book. If those who find stray animals can themselves set about to help by finding homes for domestic strays, or by creating safe havens for feral cats, this will make life a lot easier for shelter personnel, who are all too often overburdened by the number of animals they receive. We highly recommend The Stray Cat Handbook. Louise Holton and Becky Robinson, Co-founders, Alley Cat Allies: The National Feral Cat Network This is a must read for those considering animal rescue work. The information and suggestions provided are first rate and are based on actual experiences. Linda A. Heller, Division Manager, Orange County Animal Services (Florida) A Howell Cat Book of Distinction
