Menacing Skies: Texas Weather and Stories of Survival Dan Henry,2020-05-26 Imagine: you're blindsided on a dark highway by a half-mile-wide tornado. Or worse: you're aboard a commercial jetliner brought to the ground by a powerful thunderstorm-the deadliest plane crash in Texas history. In *Menacing Skies: Texas Weather and Stories of Survival*, Dan Henry shares incredible stories of survival from people who have come face-to-face with nature's most violent storms. Dan has covered every type of weather event during his three-decade career as a meteorologist. In this book, he collaborates with other top experts in the field to unravel the mysteries of science that drive our weather. Why do some thunderstorms spawn destructive tornadoes, and others don't? What is supercharging hurricanes like Harvey, enabling them to unleash historic flooding? How will climate change affect our weather-and our lives-in the next 100 years? Whether you're an aspiring storm chaser or someone who runs for shelter at the first clap of thunder, *Menacing Skies* will leave you awed by the power of the human spirit and better prepared for whatever severe weather you encounter.

Weather on the Air Robert Henson,2013-01-22 From low humor to high drama, TV weather reporting has encompassed an enormous range of styles and approaches, triggering chuckles, infuriating the masses, and at times even saving lives. In *Weather on the Air*, meteorologist and science journalist Robert Henson covers it all—the people, technology, science, and show business that combine to deliver the weather to the public each day. Featuring the long-term drive to professionalize weathercasting; the complex relations between government and private forecasters; and the effects of climate-change science and the Internet on today's broadcasts. With dozens of photos and anecdotes illuminating the many forces that have shaped weather broadcasts over the years, this engaging study will be an invaluable tool for students of broadcast meteorology and mass communication and an entertaining read for anyone fascinated by the public face of weather.

American Weather Stories Patrick Hughes,1976 Weather has shaped United States' culture, national character and folklore; at times it has changed the course of history. The seven accounts compiled in this publication highlight some of the nation's weather experiences from the hurricanes that threatened Christopher Columbus to the peculiar run of bad weather that has plagued American presidents on Inauguration Day. Also presented are meteorological phenomena encountered by people who documented weather and climate during the Revolutionary and Civil Wars and those who suffered through the year without a summer, the Blizzard of '88, and the dustbowl drought of the 1930's. Numerous historical photographs illustrate the entries. (Author/WB).

Reading the Weather Thomas Morris Longstreth,1915

Television Weathercasting Robert Henson, 1990 Will it rain tomorrow? That perennial question has made weather the most popular segment of local television news for years. Yet weathercasters do far more than simply convey the latest outlook. Depending on the circumstances, they may inject humor into the forecast (having a Lhasa apso pant and wag its tail during the forecast, for instance), warn of a life-threatening tornado or hurricane, or instruct viewers on the science behind weather. This book, the first critically to examine weathercasters and their craft, is based on years of research and covers both the lighthearted and serious aspects of television weather. Chapters include pioneer weathercasters of the 1940s and 1950s, technical advances, interaction with the National Weather Service, severe weather coverage, celebrities who began with television weather, and the status of women and minorities in weathercasting.

Thunder in the Heartland Thomas W. Schmidlin, Jeanne Appelhans Schmidlin, 1996 Ohio can be a land of weather extremes. Bringing together data from government records, scientific studies, memoirs, diaries and newspapers, this study highlights 200 weather events from 1790 to the present which demonstrate extremes of rain, snow, storms and temperature.
