Aging in America Robert L. Scardamalia,2016-08-30 Today, concerns about the financial stability of Social Security, trends in disability, health care costs, and the supply of caregivers are all driven by the coming explosion in the population of those over the age of 65. Aging in America focuses on the economic and demographic portrait of the senior population and can provide a context for analysis of broader population issues. It provides a range of characteristics of the older population including: age composition, race and Hispanic origin, educational attainment, living arrangements, veteran status, employment and income, health insurance, disability, and housing characteristics. Some of the benefits of Aging in America include: It provides a cross-section of socio-economic characteristics focused on the aging population for commonly researched geographic areas: states, counties, cities, metropolitan and micropolitan areas, and congressional districts. The tables are structured to allow easy comparisons across geographic areas and easy profiling of characteristics for any area of reader interest. This publication fills an information gap because of the difficulty in extracting comparative data from the Census Bureau's American FactFinder dissemination system. Users will have comparative data in a single reference volume.
