Aunt Arie Linda Garland Page, Eliot Wigginton, 2000-11-09 Of all the people documented by the Foxfire students since 1966, none has been more appealing to readers than Arie Carpenter. For all those who have read and cherished the Foxfire books, here is a loving portrait of a fondly remembered friend. This book is not just about Aunt Arie; it is Aunt Arie. In her own words, she discusses everything from planting, harvesting, and cooking to her thoughts about religion and her feelings about living alone. Also included are testimonials from many who knew her and a wealth of photographs.

Forkhead Transcription Factors Kenneth Maiese, 2010-07-29 Forkhead Transcription Factors: Vital Elements in Biology and Medicine provides a unique platform for the presentation of novel work and new insights into the vital role that forkhead transcription factors play in multiple systems throughout the body. Leading international authorities provide their knowledge and insights to offer a novel perspective for translational medicine that highlights the role of forkhead genes and proteins that may have the greatest impact for the development of new strategies for a broad array of disorders. Equally important, Forkhead Transcription Factors: Vital Elements in Biology and Medicine clearly sets a precedent for the necessity to understand the diverse and complex nature of forkhead proteins since this family of transcription factors can limit as well as foster disease progression depending upon the cellular environment. The presentation and discussion of innovative studies and especially those that examine previously unexplored pathways that may influence clinical survival and longevity offer an exciting approach to address the potential of forkhead transcription factors for new therapeutic avenues in

multiple disciplines.

The Google Story (2018 Updated Edition) David A. Vise, Mark Malseed, 2005-11-15 The definitive, bestselling account of the company that changed the way we work and live, updated for the twentieth anniversary of Google's founding with analysis of its most recent bold moves to redefine the world—and its even more ambitious plans for the future. Moscow-born Sergey Brin and Midwest-born Larry Page dropped out of graduate school at Stanford University to, as they said, “change the world” through a powerful search engine that would organize every bit of information on the Web for free. The Google Story takes you deep inside the company's wild ride from an idea that struggled for funding in 1998 to a firm that today rakes in billions in profits. Based on scrupulous research and extraordinary access to Google, this fast-moving narrative reveals how an unorthodox management style and a culture of innovation enabled a search-engine giant to shake up Madison Avenue, clash with governments that accuse it of being a monopoly, deploy self-driving cars to forever change how we travel, and launch high-flying Internet balloons. Unafraid of controversy, Google is surging ahead with artificial intelligence that could cure diseases but also displace millions of people from their jobs, testing the founders' guiding mantra: DON'T BE EVIL. Praise for The Google Story “[The authors] do a fine job of recounting Google's rapid rise and explaining its search business.”—The New York Times “An intriguing insider view of the Google culture.”—Harvard Business Review “An interesting read on a powerhouse company . . . If you haven't read anything about one of today's most influential companies, you should. If you don't read The Google Story, you're missing a few extra treats.”—USA Today “Fascinating . . . meticulous . . . never bogs down.”—Houston Chronicle

Anomaly Detection as a Service Danfeng (Daphne) Yao, Xiaokui Shu, Long Cheng, Salvatore J. Stolfo, 2022-06-01 Anomaly detection

has been a long-standing security approach with versatile applications, ranging from securing server programs in critical environments, to detecting insider threats in enterprises, to anti-abuse detection for online social networks. Despite the seemingly diverse application domains, anomaly detection solutions share similar technical challenges, such as how to accurately recognize various normal patterns, how to reduce false alarms, how to adapt to concept drifts, and how to minimize performance impact. They also share similar detection approaches and evaluation methods, such as feature extraction, dimension reduction, and experimental evaluation. The main purpose of this book is to help advance the real-world adoption and deployment anomaly detection technologies, by systematizing the body of existing knowledge on anomaly detection. This book is focused on data-driven anomaly detection for software, systems, and networks against advanced exploits and attacks, but also touches on a number of applications, including fraud detection and insider threats. We explain the key technical components in anomaly detection workflows, give in-depth description of the state-of-the-art data-driven anomaly-based security solutions, and more importantly, point out promising new research directions. This book emphasizes on the need and challenges for deploying service-oriented anomaly detection in practice, where clients can outsource the detection to dedicated security providers and enjoy the protection without tending to the intricate details.

Tomboys Michelle Ann Abate, 2008-06-28 Starting with the figure of the bold, boisterous girl in the mid-19th century and ending with the “girl power” movement of the 1990’s, *Tomboys* is the first full-length critical study of this gender-bending code of female conduct. Michelle Abate uncovers the origins, charts the trajectory, and traces the literary and cultural transformations that the concept of “tomboy” has undergone in the United States. Abate focuses on literature including Louisa May Alcott's *Little Women* and Carson McCullers's *The Member of the Wedding* and

films such as Peter Bogdanovich's *Paper Moon* and Jon Avnet's *Fried Green Tomatoes*. She also draws on lesser-known texts like E.D.E.N. Southworth's once wildly popular 1859 novel *The Hidden Hand*, Cold War lesbian pulp fiction, and New Queer Cinema from the 1990s. *Tomboys* also explores the gender and sexual dynamics of tomboyism, and offers intriguing discussions of race and ethnicity's role in the construction of the enduring cultural archetype. Abate's insightful analysis provides useful, thought-provoking connections between different literary works and eras. The result demystifies this cultural phenomenon and challenges readers to consider tomboys in a whole new light.

LogoLounge 4 Bill Gardner, Catharine Fishel, 2010-01-01 Now in paperback, this fourth volume in the best-selling LogoLounge series delivers a fresh collection of 2,000 totally new logos from designers worldwide. Smart Frederic Martel, 2018-07-05 Digitization is accelerating globalization tenfold. Social networks have gone mobile: telephone, television and towns have gone 'smart'. How did China manage to create clones of Google, Facebook and YouTube, and build its own censored version of the Internet? How do Arab countries use social networks for their revolutions? Why is there no minister for communications in the US, and why does no one regulate the Internet there? From Silicon Valley to Tokyo,

from South Africa to southern India, and all the way to Cuba and Gaza, this unprecedented investigation in the field covers the whole battle of the Internet and its future. Drawing on hundreds of interviews in about fifty countries, Frederic Martel examines the different 'Internets' on five continents. In so doing, he reveals that we are moving not only into a connected, globalized world, but also a territorialized one. Smart shows that the Internet has never been truly global, and that it will become increasingly local.

Dancing With Bigotry NA NA, Donaldo Macedo, Lilia I.

Bartolomé, 2016-04-30 As the end of the century draws closer, one of the most pressing challenges facing educators in the United States is the specter of an 'ethnic and cultural war' - a code phrase that engenders our society's licentiousness toward racism. In *Dancing With Bigotry*, Macedo and Bartolomé use examples from the mass media, popular culture, and politics to illustrate the larger situations facing educators and how this type of argument is both ignored in much of the academic research and rhetoric. They also examine why it is essential to take on the sources of 'mass public education.' Academia needs to understand that the popular press and mass media educate more people about issues regarding ethnicity and race than all other sources of education available to U.S. citizens. By shunning the mass media, educators are missing the obvious - more public education is done by the media than by teachers, professors, or anyone else. *Dancing with Bigotry* sheds light on the ideological mechanisms that shape and maintain the racist social order, while moving the discussion beyond the reductionist binarism of White versus Black racism. Discussing social complexities, including ethnic cleansing, culture wars, hegemony, human sufferings, and intensified xenophobia, Macedo and Bartolomé explain why it is essential that we gain a nuanced understanding of how ideology underlies all social, cultural, and political discourse and actions. This book shows that it is imperative that we appreciate what it means to educate for critical citizenry in the ever-increasing multiracial

and multicultural world of the twentieth century.

Google Photos Chris Guld, 2016-12-17 Google Photos is the best way to keep your lifetime of memories, effortless and free. Android Forensics Andrew Hoog, 2011-06-15 Android Forensics covers an open source mobile device platform based on the Linux 2.6 kernel and managed by the Open Handset Alliance. This book provides a thorough review of the Android platform including supported hardware devices, the structure of the Android development project, and implementation of core services (wireless communication, data storage, and other low-level functions).

Bottom's Dream Arno Schmidt, 2016 I have had a dream past the wit of man to say what dream it was, says Bottom. I have had a dream, and I wrote a Big Book about it, Arno Schmidt might have said. Schmidt's rare vision is a journey into many literary worlds. First and foremost it is about Edgar Allan Poe, or perhaps it is language itself that plays that lead role; and it is certainly about sex in its many Freudian disguises, but about love as well, whether fragile and unfulfilled or crude and wedded. As befits a dream upon a heath populated by elemental spirits, the shapes and figures are protean, its protagonists suddenly transformed into trees, horses, and demigods. In a single day, from one midsummer dawn to a fiery second, Dan and Franzisca, Wilma and Paul explore the labyrinths of literary creation and of their own dreams and desires. Since its publication in 1970 Zettel's Traum/Bottom's Dream has been regarded as Arno Schmidt's

magnum opus, as the definitive work of a titan of postwar German literature. Readers are now invited to explore its verbally provocative landscape in an English translation by John E. Woods.

Solar Resources Roland Hulstrom, 1989 *Solar Resources* takes stock of the resource - sunlight - on which any plan for solar heat conversion technologies must be based. It describes the evolution of theoretical models, algorithms, and equipment for measuring, analyzing, and predicting the quantity and composition of solar radiation, and it reviews and directs readers to insolation databases and other references that have been compiled since 1975. Following an overview of solar energy research by the editor, Raymond J. Bahm presents a comprehensive guide to available insolation databases and other information resources in the United States. Charles M. Randall and Richard Bird discuss the theoretical models and algorithms used to characterize the transference of solar radiation through the earth's atmosphere. Their chapter also addresses the important question of the accuracy of the data sets produced by the various modeling methods and algorithms. The National Weather Service (NWS) monitoring network and other major monitoring networks in the United States are discussed by Kirby Hanson and Thomas Stoffel. And Eugene Zerlaut covers the instrumentation used to measure total solar irradiance and spectral solar irradiance; he describes types of equipment, their manufacturers, procedures for calibration, and the accuracy of the data produced. Richard Bird and Carol Riordan explain the nature of spectral solar irradiance at the earth's surface, and John Jensenius describes the NWS Operational Solar Insolation Forecast System, which predicts the daily total global-horizontal insolation for two days. In the concluding chapter, Claude Robbins summarizes daylighting models and resources, and details methods for converting insolation data to illuminance data. *Solar Resources* is volume 2 in the series *Solar Heat Technologies: Fundamentals and Applications*, edited by Charles A. Bankston

The Saints of Zara Isabel-Rose Kulski,2018-10-25 Nishan was nineteen years old when Turkey saw an upheaval in the Ottoman government. Violence and lawlessness ravaged the whole country. When the Mormon missionaries arrived, it seemed logical to seek a new opportunity in the United States. Nishan and a small group of Armenian converts left their violence-torn home in Zara, Turkey, in September of 1902. In *The Saints of Zara*, author Isabel-Rose Kulski shares her family's story, focusing on her father Nishan, a man who saw too little love but nonetheless lived an interesting life. Through a host of photographs, excerpts from Nishan's diary, and details provided by family members, she tells of how the group made a new life in Mormon Utah. *The Saints of Zara* recounts a compelling and rich story that evokes another time in a changed landscape. It offers a look into one family's stunning triumphs and failures in twentieth-century America.

Gypsy Music Street Roberta Dietzen,2013-02-26 It's 1937, the eve of World War II. At twenty-six years old, Rezsı Lehrer leaves Munkacs, a small charming city located deep within a remote corner of the Carpathian mountains and travels alone to the United States. War breaks out and Eastern European borders are sealed. Rezsı's family is trapped in Czechoslovakia and the packages she sends home are returned unopened. When the war ends, Rezsı discovers her parents, two brothers and scores of relatives perished in the Holocaust. *Gypsy Music Street* is the story of one woman's endless sorrow and guilt she suffers at the loss of her family, the family she left behind to die alone. Yet she still yearns to return to her town, the little Paris of the East, to see it just one more time. But after the war, countries borders are redrawn and Mukacevo is no longer located in Czechoslovakia. It becomes completely closed off within the iron grip of the Soviet Union and the political climate is one of Cold War. Mukacevo is off limits for travel. As the years pass, Rezsı reminisces, sharing her longing and grief about the past with her daughter Bobbie. And when she dies an old woman, her dream unfulfilled, Bobbie is driven by her own loss and grief to make this journey home for her mother, and for herself. Adventures in Budapest, Ukraine and Israel make *Gypsy Music Street* an enthralling memoir of love and loss. Yet, it is also a story of the overwhelming joy a daughter experiences when she travels back in time and discovers her own torn roots.
