Unlocking English Learners' Potential Diane Staehr Fenner,Sydney Snyder,2017-05-16 Schools are not intentionally equitable places for English learners to achieve, but they could be if the right system of support were put in place. Diane Staehr Fenner and Sydney Snyder recommend just such a system. Not only does it have significant potential for providing fuller access to the core curriculum, it also provides a path for teachers to travel as they navigate the individual needs of students and support their learning journeys. --Douglas Fisher, Coauthor of Visible Learning for Literacy A once-in-a-generation text for assisting a new generation of students Content teachers and ESOL teachers, take special note: if you're looking for a single resource to help your English learners meet the same challenging content standards as their English-proficient peers, your search is complete. Unlocking Private Investment in Sustainable Infrastructure in Asia Bhajan Grewal,Nella Hendriyetty,Iskandar Abdullaev,Chul Ju Kim,Naoyuki Yoshino,Eisa Khan Ayoob Ayoobi,2022-10-24 Investment in infrastructure is essential for promoting economic growth, and while countries in Asia have enjoyed higher rates of gross domestic product growth in recent years, the region remains severely deficient in the scale and quality of sustainable infrastructure. Moreover, population growth and climate change continue to put increasing pressure on the need for strategic and farsighted development, calling for policy makers to reevaluate infrastructure governance to ensure sustainable economic growth. Currently, in developing Asia, most investment in infrastructure comes from the public sector. However, with growing fiscal deficits and other budgetary constraints, it is essential to develop alternative sources of investment for infrastructure projects. This presents opportunities to tap into the private sector, which can play an instrumental role in minimizing the funding gap through the development of stronger, more transparent public–private partnerships (PPPs) and incentivizing sustainable infrastructure investment. This book provides a scholarly discussion on the importance of PPPs and approaches to unlock private participation in infrastructure investment based on lessons from across Asia. Among the proposed schemes are government tax incentives, development-based land value capture strategy under PPP land pooling, Viability Gap Funds, Project Development Facilities, and other guarantees. The book aims to assess the impacts and future of sustainable infrastructure investments and examines the role of governments in mobilizing financial resources and new models for unlocking private investment in sustainable infrastructure. This book consists of fifteen original chapters on

the experiences of the Central Asia Regional Economic Cooperation (CAREC) and a few other cases for promoting private investment in sustainable infrastructure. The fact that not much has been published previously on this theme makes this book a welcome and timely addition to the much needed knowledge on this subject. Policy issues and options in aquatic food systems: Review of frameworks, tools, and studies Ragasa, Catherine,Loison, Sarah Alobo,2023-01-24 Although policies can be critical constraining or enabling factors for aquatic food systems (AqFS) development, scarce evaluation of the impacts of existing policies means that decision-makers have limited understanding of how to improve the design and implementation of effective policies. This paper reviews key policy issues in AqFS and how they have been analyzed and assessed to provide context-tailored policy options and guidance. Our review shows that countries face many policy issues but have little analysis on them. Despite the availability of a wide variety of frameworks, concepts, tools, methods, and approaches, their application in empirical analysis to solve policy issues in AqFS has been limited. More research is available on local- and community-level governance of fisheries, but less on national or subnational policies and regulations in AqFS. The few available policy studies focus on developed countries, with fewer applications in developing countries where growth of the aquaculture and fisheries sectors is much stronger. The studies provide useful policy options and guidance, and this review highlights the need for more such studies to address policy-related issues in the sector.
