*The Oxford English Literary History: Volume 10:  
1910-1940: The Modern Movement* Chris

Baldick, 2005-11-10 The Oxford English Literary History is the new century's definitive account of a rich and diverse literary heritage that stretches back for a millennium and more. Each of these groundbreaking volumes offers a leading scholar's considered assessment of the authors, works, cultural traditions, events, and the ideas that shaped the literary voices of their age. The series will enlighten and inspire not only everyone studying, teaching, and researching in English Literature, but all serious readers. This exciting new volume provides a freshly inclusive account of literature in England in the period before, during, and after the First World War. Chris Baldick places the modernist achievements of Virginia Woolf, T. S. Eliot, and James Joyce within the rich context of non-modernist writings across all major genres, allowing 'high' literary art to be read against the background of 'low' entertainment. Looking well beyond the modernist vanguard, Baldick highlights the survival and renewal of realist traditions in these decades of post-Victorian disillusionment. Ranging widely across psychological novels, war poems, detective stories, satires, and children's books, The Modern Movement provides a unique survey of the literature of this turbulent time.

*Animal Skulls* Mark Elbroch,2006 This reference and guidebook offers illustrations, descriptions, and measurements for the skulls of some 275 animal species found throughout North America. The skull is the key anatomical feature used to identify an animal and understand many of its behaviors. This book describes in words and pictures the bones and regions of the skull important to identification, including illustrations of all the bones in the cranium, leading to a greater understanding of a creature's place in the natural world. With life-size drawings, this guide is a reference for wildlife professionals, trackers, and animal-lovers.
