**Learning From the Links** David K. Hurst, 2010-05-11 For the first time, a seasoned business executive and avid golfer combines these two passions to explore what makes for top performance in each field. Management consultant David K. Hurst explores compelling links relating the two activities to explain clearly what every manager who plays golf may feel only intuitively: that there is a deep systemic connection between them. For on the tee, as in the boardroom, a player can't just

hit and hope -- he or she must continually think ahead, contemplate multiple scenarios, and consider the downside of every decision. And then everything depends on execution. In *Learning from the Links*, Hurst clarifies muddled thinking in both management and golf: he deals squarely with the challenge of implementing a game plan and seeing it through. Hurst takes to task the current head-down instructional model used to teach golf and management. He addresses the huge gulf between knowing what to do in a given situation and knowing how to do it. This chasm is an ever-present hazard both on the course and in an organization: it keeps people from solving their problems and achieving their goals. By examining golfers' and managers' struggles for improvement, Hurst shows us why complex systems are so hard to change and how to set about changing them -- systematically. Using the latest thinking from fields as diverse as neuroscience, artificial intelligence, art, and anthropology, Hurst's primary purpose is to help his readers make sense of their own experience -- to help them learn more effectively. His practical advice is profusely illustrated with examples from both golf and management, allowing the reader to move back and forth between his or her experiences in both activities. Part business management book, part strategy guide, these are more than just lessons for one's game or one's office: these are lessons for life.

Videojournalism Kenneth Kobre, 2013-01-17 Videojournalism is a new field that has grown out of traditional print photojournalism, slideshows that combine sound and pictures, public radio, documentary filmmaking and the best of television news features. This amalgam of traditions has emerged to serve the Internet's voracious appetite for video stories. Videojournalism is written for the new generation of backpack journalists. The solo videojournalist must find a riveting story; gain access to charismatic characters who can tell their own tales; shoot candid clips; expertly interview the players; record clear, clean sound; write a script with pizzazz; and, finally, edit the material into a piece worthy of five minutes of a viewer's attention. Videojournalism addresses all of these challenges, and more - never losing sight of the main point: telling a great story. This book, based on extensive interviews with professionals in the field, is for anyone learning how to master the art and craft of telling real short-form stories with words, sound and pictures for the Web or television. The opening chapters cover the foundations of multimedia storytelling, and the book progresses to the techniques required to shoot professional video, and record high quality sound and market the resulting product. Videojournalism also has its own website - go to just one URL and find all the stories mentioned in the book. You also will find various how-to videos on the site. To keep up with the latest changes in the field such as new cameras, new books, new stories or editing software, check the site regularly and like [www.facebook.com/KobreGuide](http://www.facebook.com/KobreGuide).

**The Business of iPhone App Development** Dave Wooldridge, Michael Schneider, 2010-08-26  
The phenomenal success of the iPhone and the iPod touch has ushered in a "gold rush" for developers, but with well over 100,000 apps in the highly competitive App Store, it has become

increasingly difficult for new apps to stand out in the crowd. Achieving consumer awareness and sales longevity for your iPhone app requires a lot of organization and some strategic planning. This book will show you how to incorporate marketing and business savvy into every aspect of the design and development process, giving your app the best possible chance of succeeding in the App Store. *The Business of iPhone App Development* was written by experienced developers with business backgrounds, taking you step-by-step through cost-effective marketing techniques that have proven successful for professional iPhone app creators—perfect for independent developers on shoestring budgets. Although there are a few iPhone app marketing books on the horizon, they appear to tackle the subject from purely a marketer's perspective. What makes this book unique is that it was written by developers for developers, showing you not only what to do, but also how to do it, complete with time-saving resources and ready-to-use code examples. No prior business knowledge is required. This is the book you wish you had read before you launched your first app!

*Arts-Based Research* Jan Jagodzinski, Jason Wallin, 2013-04-19 A provocative book, an important book! jagodzinski's and Wallin's 'betrayal' is in fact a wake-up call for art-based research, a loving critique of its directions. jagodzinski's and Wallin's reference is the question 'what art can do' - not what it means. Theirs is an ultimate affirmation that uncovers the singularities that compose and give consistency to art not as an object, but as an event. Their betrayal consists in an affirmation of life and becoming, positing a performative 'machinics of the arts' which is in absolute contraposition with the hegemonic discourse of art and|as an object of knowledge and representation. This does not only concern academia, but also politics and ethics - an untimely book that comes just at the right time! Bernd Herzogenrath, Goethe Universität Frankfurt am Main (Germany), author of *An American Body|Politic. A Deleuzian Approach*, and editor of *Deleuze & Ecology* and *Travels in*

Intermedia[lity]. ReBlurring the Boundaries. Approaching the creative impulse in the arts from the philosophical perspectives of Deleuze + Guattari, Jagodzinski and Wallin make a compelling argument for blurring the boundaries of arts-based research in the field of art education. The authors contend that the radical ideas of leading scholars in the field are not radical enough due to their reliance on existing research ontologies and those that end in epistemological representations. In contrast, they propose arts-based research as the event of ontological immanence, an incipient, machinic process of becoming-research through arts practice that enables seeing and thinking in irreducible ways while resisting normalization and subsumption under existing modes of address. As such, arts practice, as research-in-the making, constitutes a betrayal of prevailing cultural assumptions, according to the authors, an interminable renouncement of normalized research representations in favor of the contingent problematic that emerges during arts practice. Charles R. Garoian, Professor of Art Education, Penn State University, author of *The Prosthetic Pedagogy of Art*. Jagodzinski and Wallin have written a challenging book on the theme of betrayal which aims to question the metaphysical ground of the practice of many arts educators and researchers. Dismantling the notion of praxis which assumes a prior will as well as the pervasive notion of the creative and reflexive individual, they revisit the notion of poiesis and the truth of appearing in order to advocate the centrality of becoming in pedagogical relations. Is it possible to develop pedagogies beyond those images of thought that attenuate learners, teachers and researchers? We need a new image of thought, or better, a thought without image, and this book asks us to take up the challenge. Dennis Atkinson, Director of the Centre for the Arts and Learning, Department of Educational Studies, Goldsmiths University of London, author of *Art Equality and Learning; Pedagogies Against the State*.

*Social Equity in a Post-Roe America* Lorenda A. Naylor, Heather Wyatt-Nichol, 2024-04-30 Despite hundreds of federal laws and U.S. Supreme Court decisions prohibiting discrimination based on sex and race, American women and people of color continue to face pervasive individual and structural discrimination. Women often lack equal pay for equal work, affordable childcare, and paid family medical leave. Following the overturning of Roe vs. Wade, safe, legal abortion has become inaccessible in approximately half the country, disproportionately impacting poor women. Women and people of color are underrepresented in elected offices at the federal and state levels, and the voting rights of people of color continue to be eroded. Employing a public administration framework, *Social Equity in a Post-Roe America* documents the scope and breadth of inequality in the United States, linking social equity to sex, race, and the rule of law. This insightful and provocative new book examines U.S. Supreme Court decisions and federal statutes across four public policy domains that increasingly influence U.S. democracy and impact the lives of American women. These policy domains consist of political representation, which includes citizenship and voting rights, contraception, abortion, and employment. *Social Equity in a Post-Roe America* offers policy

recommendations to increase equitable access and equal opportunity for women and people of color. It is required reading for all students of public administration, public policy, and political science, as well as for engaged citizens.

**A Case for Teaching Literature in the Secondary School** Janet Alsup, 2015-04-17 Taking a close look at the forces that affect English education in schools—at the ways literature, cognitive science, the privileging of the STEM disciplines, and current educational policies are

connected—this timely book counters with a strong argument for the importance of continuing to teach literature in middle and secondary classrooms. The case is made through critical examination of the ongoing culture wars between the humanities and the sciences, recent research in cognitive literary studies demonstrating the power of narrative reading, and an analysis of educational trends that have marginalized literature teaching in the U.S., including standards-based and scripted curricula. The book is distinctive in presenting both a synthesis of arguments for literary study in the middle and high school and sample lesson plans from practicing teachers exemplifying how literature can positively influence adolescents' intellectual, emotional, and social selves.
