Harm Reduction Treatment for Substance Use Susan E. Collins, Seema L. Clifasefi, 2023-05-22 Harm reduction approaches are effective, patient-driven alternatives to abstinence-based treatment for people who are not ready, willing, or able to stop using substances. This volume outlines the scientific basis and historical development of these approaches, and reviews why abstinence-based approaches often do not work. The authors then share their expertise about harm reduction treatment (HaRT), an empirically based approach co-developed with community members impacted by substance-related harm - a first of its kind. The reader learns in detail about the pragmatic mindset and compassionate heartset of HaRT and the three treatment components: measurement and tracking of patient-preferred substance-related metrics, harm-reduction goal setting and achievement, and discussion of safer-use strategies. This volume walks practitioners through all components, provides example scripts for use in daily practice, and illustrates the work through case studies and input from community members. Handouts are available for use in daily practice. This is essential reading for clinical psychologists, psychotherapists, and researchers who encounter people who have substance-use problems.

Alcoholism Maria L. Gifford, 2009-10-22 An intriguing look at the history of alcoholism and its dramatic effects, from the first fermented grape to current advances in genetic research. Alcoholism tells the story of a disease familiar to many yet not well understood. It is the first biography of alcohol abuse that gauges its devastating effects on the body, the family, the economy, and the community. Alcoholism provides the latest understanding of the disease as a behavioral dysfunction and a biological condition. Coverage includes the origins of alcohol and the discovery of alcoholism as a

medical disease; the biology of alcoholism and its effects on the body; and current diagnostic and treatment methods for alcoholism. In addition, the book explores the effects on society of such alcoholism-related problems as domestic abuse, fetal alcohol syndrome, drunk driving, and suicide, as well as promising new directions in alcoholism research, awareness, treatment, and prevention.

Feed the Baby: An Inclusive Guide to Nursing, Bottle-Feeding, and Everything In Between Victoria Facelli IBCLC, Shruti Nagaraj MD, MPH, 2023-08-01 Finally, a book on newborn feeding that focuses on the milks and the methods, for all families. Getting a baby fed is one of the most important tasks for a new parent. With straightforward advice and evidence-based reasoning, lactation consultant Victoria Facelli introduces her modern approach in *Feed the Baby*. Both bottle and breast are welcomed as equally valuable tools. Based on her years of experience in the field, Facelli understands what families and babies need to thrive. She explains the science behind the various options, from how milks are made to how a newborn's sucking and swallowing skills develop. Here are dozens of nursing positions and paced bottle-feeding techniques, with suggested systems and methods for parents and partners, from those critical hours after birth through the early weeks and months to the first year. Includes detailed information on hunger cues, sleep, pumping, milk supply, and much-needed support and encouragement for challenging moments. Illustrations and links to video demonstrations make it easy to implement whatever protocol the reader decides will work best for them.
