Touching Light Ronelle Wood,2015-09-07 You have inside you a cloak of gossamer connective tissue that surrounds and supports everything and functions like fiber optics. This tissue is called fascia. In these pages, myofascial release expert Ronelle Wood translates the scientific language for the chemistry, function, and physiology of fascia, shares her hands-on expertise, and explains in layman's terms how our fascia affects us all in everyday life and its potential as a prime source of health and rejuvenation. Gay Hendricks says in his foreword: I've been blessed to know many great healers and teachers over my forty-five years in the field of transformation; Ronelle is right at the top of the list of masterful practitioners I've known. Read this book and you'll no longer perceive your body as a misbehaving slave to be punished into submission, but as a communicative partner-always supporting you.

Free Rose Light Mary O'Connor,2021-09-28 Free Rose Light is the wide-ranging story of the people and community of South Street Ministries, in Akron, Ohio, told in the style of the ministry--improvisational, risky, and present. As much as this is the story of South Street through O'Connor's experience of the organization, it is also an invitation to the reader by example. There is no set of conclusions or directions provided in this work, save for one: don't let anyone define your story. You claim your own story.

The Light's Vital Purposes Margaret F McCoy,2023-01-31

Margaret Frances started her Independent Instructor career after her own personal transformational experiences. Agreeing with the great scholars of the ages, that knowledge is power, she has worked 35 years in producing the fruit of her Quest; a Wholistic Transformational Synthesis; an extensive compilation of her writing and research to offer to her audiences and classes. Designed to answer the riddles of life that perplex the many, the

elements of the synthesis work with harmonious precision, and hold the keys for one ultimate purpose; to assist the serious students of life in living a life that is more authentic, healthy, meaningful, and holistic.

Cooking Light Lighten Up America Editors of Cooking Light Magazine, 2013-10-22 *Cooking Light Lighten Up, America!* is a celebration and discovery of regional American cooking, and the permission to eat the foods you love-it's the soul of American cooking made light. This collection of America's favorite fare offers healthy versions of classics new and old, memory-making recipes from all walks of life and regions, and returns the most beloved American dishes to the table. *Lighten Up, America!* follows Allison Fishman Task as she embarks on a cross-country road trip in search of the country's favorite classic dishes. Allison shows the reader how to take these regional recipes and make them lighter and healthier with a few simple substitutions and smart cooking techniques. From caramel-pecan sticky buns to reuben sandwiches to fried green tomatoes, this book teaches how to turn what might have been once-in-awhile favorites into everyday classics. Highlights Include: Classic American Dishes Made Lighter: Readers will rediscover regional American cooking and eat the food they love through more than 150 delicious recipes from coast to coast. All with complete nutrition analysis. Regional Culinary Traditions: Join Allison as she tells delightful and tantalizing stories behind some of our most beloved regional dishes. Each story gives insight into regional flavor and color while celebrating iconic fare like Memphis barbecue, New Orleans gumbo, and Iowa pork tenderloin

sandwiches. Insider's View of Festivals and Food Fairs: Allison also visits food fairs and festivals, so you'll get a behind-the-scenes look at some of the more unusual foods this great country has to offer such as wild boar nachos, bear meatloaf, and dandelion soup. Food Born In America: Allison will share inspiring stories about the many American entrepreneurs and home cooks who conceived and popularized recipes and ingredients. Take the Philly cheesesteak, cobb salad, and stove top stuffing-just to name a few-all crafted through the ingenuity of American food lovers.

In_Security Anna Light, 2015-11-09 We have an enemy. And our enemy knows the most powerful person on the planet is a free person. When we're free there are endless possibilities for God to work in us to accomplish His purpose for our lives. But many of us are not free. When it comes to our God-given purpose, many of us are fearful, unsure, and held back. Insecure. The enemy doesn't want us free. That is the very reason we have to become free. In this book you will find the keys that unlock the chains of insecurity. You will find the strength and confidence to be the person God sees, and accomplish the work He has called you to do by tackling issues like: Our lack of identity Believing lies that hold us back Fearing what people think How to walk in freedom Do you want to be free? How much do you want it?

Atomic and Free Electrons in a Strong Light Field Mikhail V Fedorov, 1998-01-15 This book presents and describes a series of unusual and striking strong-field phenomena concerning atoms and free electrons. Some of these phenomena are: multiphoton stimulated bremsstrahlung, free-electron lasers, wave-packet physics, above-threshold ionization, and strong-field stabilization in Rydberg atoms. The theoretical foundations and causes of the phenomena are described in detail, with all the approximations and derivations discussed. All the known and relevant experiments

are described too, and their results are compared with those of the existing theoretical models. An extensive general theoretical introduction gives a good basis for subsequent parts of the book and is an independent and self-sufficient description of the most efficient theoretical methods of the strong-field and multiphoton physics. This book can serve as a textbook for graduate students.

Contents: Introduction to the Theory of Field-Induced Atomic Transitions Multiphoton Stimulated Bremsstrahlung Multiphoton Compton Scattering and Ponderomotive Forces in an Inhomogeneous Light Field Free-Electron Lasers Laser Acceleration of Electrons Wave Packets Above-Threshold Ionization Stabilization of Atoms in a Strong Ionizing Field

Readership: Physicists.

Barefoot Running Michael Sandler, Jessica Lee, 2011-09-20

How could something we have for free—our bare feet—be better for running than \$150 shoes? The truth is that running in shoes is high-impact, unstable, and inflexible. Shoes promote a heel-centric ground strike, which weakens your feet, knees, and hips, and leads to common running injuries. In contrast, barefoot running is low-impact, forefoot-centric, stable, and beneficial to your body. It encourages proper form and strengthens your feet in miraculous ways. When you run in shoes, you not only risk developing poor form, but you also hinder the natural relationship with the ground that running facilitates. Barefoot running restores the delightful sensory and spiritual connections to the earth that you were meant to experience. Barefoot Running offers the only step-by-step direction runners need at any age to overcome injuries, run faster than ever, and rediscover the pure joy of running. Once you tear off your shoes and learn to dance with nature, you'll tread lightly and freely, hearing only the earth's symphony and feeling only the dirt beneath your feet. Hit the ground running with

revolutionary techniques for starting out slowly, choosing minimalist footwear, navigating rough weather and rugged terrain, and building your feet into living shoes.
