**BlackBerry for Work** Kunal Mittal, Shikha Gupta, Neeraj Gupta, 2010-05-06 The BlackBerry is cool, and the BlackBerry is fun, but the BlackBerry also means serious business. For those of you who bought your BlackBerry to help get your life organized and free yourself from the ball-and-chain of desktop computing, BlackBerry for Work: Productivity for Professionals is the book to show you how. There are plenty of general-purpose BlackBerry guides, but this book shows you how to complete all the traditional smartphone tasks, like to-dos, calendars, and email, and become even more efficient and productive. You'll learn mechanisms for developing effective workflows specific to the features of the BlackBerry and also efficient strategies for dealing with the specialized aspects of business and professional lifestyles. After giving a professionally targeted introduction to the built-in applications and configuration options, this book details the BlackBerry's enterprise features. This book also delves into App World, the BlackBerry's source for third-party software. It discusses some of the best business and vertical applications, and shows you how to take advantage of this wealth of add-ons and professional functionality. The only business-specific guide to the BlackBerry. Improve your productivity with innovative mobile workflows that free you from the desktop. Make the BlackBerry work for you so you can work better. The authors of BlackBerry for Work have decided to direct their share of the proceeds from the book to a charity in India. The Mitr Foundation is a trust founded in the city of Hyderabad, with the objective of contributing its might towards the empowerment of the girl child through education. Somewhere between the elite and the underprivileged lies the core essence of our endeavor. Shikha Gupta has pledged to undertake the responsibility of educating three children.

**Free to Make** Dale Dougherty, 2016-09-27 Dale Dougherty, creator of MAKE: magazine and the Maker Faire, provides a guided tour of the international phenomenon known as the Maker Movement, a social revolution that is changing what gets made, how it's made, where it's made, and who makes it. Free to Make is a call to join what Dougherty calls the "renaissance of making," an invitation to see ourselves as creators and shapers of the world around us. As the internet thrives and world-changing technologies—like 3D printers and tiny microcontrollers—become increasingly affordable, people around the world are moving away from the passivity of one-size-fits-all consumption and command-and-control models of education and business. Free to Make explores how making revives abandoned and neglected urban areas, reinvigorates community spaces like libraries and museums, and even impacts our personal and social development—fostering a mindset that is engaged, playful, and resourceful. Free to Make asks us to imagine a world where making is an everyday occurrence in our schools, workplaces, and local communities, grounding us in the physical world and empowering us to solve the challenges we face.

*The Cult of Mac* Leander Kahney,2006-11-06 There is no product on the planet that enjoys the devotion of a Macintosh computer. Famously dedicated to their machines, many Mac fans eat, sleep, and breathe Macintosh. The Cult of Mac is the first book about Macintosh culture, arguably the largest distinct subculture in computing. Written by Wired News managing editor Leander Kahney, The Cult of Mac is an in-depth look at Mac users and their unique, creative, and often very funny culture. Like fans of a football team or a rock group, Macintosh fans have their own customs, with clearly defined obsessions, rites and passages. From people who get Mac tattoos and haircuts, to those who furnish their apartments with empty Mac boxes, this book details Mac fandom in all of its forms. The paperback edition includes an all-new chapter about the iPod, updates throughout, and new photos that reflect current Apple technology.

**Someone Who Will Love You in All Your Damaged Glory** Raphael Bob-Waksberg,2019-06-11 Written with all the scathing dark humor that is a hallmark of BoJack Horseman, Raphael Bob-Waksberg delivers a fabulously off-beat collection of short stories about love—the best and worst thing in the universe. Featuring: • A young engaged couple forced to deal with interfering relatives dictating the appropriate number of ritual goat sacrifices for their wedding. • A pair of lonely commuters who ride the subway in silence, forever, eternally failing to make that longed-for contact. • A struggling employee at a theme park of U.S. presidents who discovers that love can't be genetically modified. And fifteen more tales of humor, romance, whimsy, cultural commentary, and crushing emotional vulnerability.

**Ask a Manager** Alison Green,2018-05-01 From the creator of the popular website Ask a Manager and New York's work-advice columnist comes a witty, practical guide to 200 difficult professional conversations—featuring all-new advice! There's a reason Alison Green has been called "the Dear Abby of the work world." Ten years as a workplace-advice columnist have taught her that people avoid awkward conversations in the office because they simply don't know what to say. Thankfully, Green does—and in this incredibly helpful book, she tackles the tough discussions you may need to have during your career. You'll learn what to say when • coworkers push their work on you—then take credit for it • you accidentally trash-talk someone in an email then hit "reply all" • you're being micromanaged—or not being managed at all • you catch a colleague in a lie • your boss seems unhappy with your work • your cubemate's loud speakerphone is making you homicidal • you got drunk at the holiday party Praise for Ask a Manager "A must-read for anyone who works . . . [Alison Green's] advice boils down to the idea that you should be professional (even when others are not) and that communicating in a straightforward manner with candor and kindness will get you far, no matter where you work."—Booklist (starred review) "The author's friendly, warm, no-nonsense writing is a pleasure to read, and her advice can be widely applied to relationships in all areas of readers' lives. Ideal for anyone new to the job market or new to management, or anyone hoping to improve their work experience."—Library Journal (starred review) "I am a huge fan of Alison Green's Ask a Manager column. This book is even better. It teaches us how to

deal with many of the most vexing big and little problems in our workplaces—and to do so with grace, confidence, and a sense of humor.”—Robert Sutton, Stanford professor and author of *The No Asshole Rule* and *The Asshole Survival Guide* “Ask a Manager is the ultimate playbook for navigating the traditional workforce in a diplomatic but firm way.”—Erin Lowry, author of *Broke Millennial: Stop Scraping By and Get Your Financial Life Together*

Computing Taste Nick Seaver,2022-12-06 Meet the people who design the algorithms that capture our musical tastes. The people who make music recommender systems have lofty goals: they want to broaden listeners' horizons and help obscure musicians find audiences, taking advantage of the enormous catalogs offered by companies like Spotify, Apple Music, and Pandora. But for their critics, recommender systems seem to embody all the potential harms of algorithms: they flatten culture into numbers, they normalize ever-broadening data collection, and they profile their users for commercial ends. Drawing on years of ethnographic fieldwork, anthropologist Nick Seaver describes how the makers of music recommendation navigate these tensions: how product managers understand their relationship with the users they want to help and to capture; how scientists conceive of listening itself as a kind of data processing; and how engineers imagine the geography of the world of music as a space they care for and control. *Computing Taste* rehumanizes the algorithmic systems that shape our world, drawing attention to the people who build and maintain them. In this vividly theorized book, Seaver brings the thinking of programmers into conversation with the discipline of anthropology, opening up the cultural world of computation in a wide-ranging exploration that travels from cosmology to calculation, myth to machine learning, and captivation to care.
