The Tycoon's Triplet Baby Surprise (Book Two) Holly Rayner, Sean Lawson didn't think he had time for a baby. Does he have time for three? It all starts with a stray cufflink, dropped by the irresistibly handsome tech billionaire Sean Lawson, and held in safekeeping by talented attorney Charlotte Waters. Now, with Sean under legal attack from an old rival, Charlotte finds the perfect opportunity to return the cufflink to him: by pulling some strings and inserting herself onto his legal team. Sparks fly as the gorgeous billionaire and his newly appointed attorney get reacquainted.

Briefly abandoning herself to the desire she's felt for ten years, Charlotte finds herself falling hard for her boss—and compromising her professional ethics in the process. As the legal case picks up steam, Charlotte receives some shocking news: she's pregnant, with not one, not two, but three of Sean Lawson's babies! With the court case in jeopardy, and their fledgling romance on the line, can they overcome the forces that seek to drive them apart, and become the united, loving parents they never expected to be?

Encyclopedia of Transportation Mark Garrett, 2014-08-13 Viewing transportation through the lens of current social, economic, and policy aspects, this four-volume reference work explores the topic of transportation across multiple disciplines within the social sciences and related areas, including geography, public policy, business, and economics. The book's articles, all written by experts in the field, seek to answer such questions as: What has been the legacy, not just economically but politically and socially as well, of President Eisenhower's modern interstate highway system in America? With that system and the infrastructure that supports it now in a state of decline and decay, what's the best path for the future at a time of enormous fiscal constraints? Should California politicians plunge ahead with plans for a high-speed rail that every expert says—despite the allure—will go largely unused and will never pay back the massive investment while at this very moment potholes go unfilled all across the state? What path is best for emerging countries to keep pace with dramatic economic growth for their part? What are the social and financial costs of gridlock in our cities? Features: Approximately 675 signed articles authored by prominent scholars are arranged in A-to-Z fashion and conclude with Further Readings and cross references. A Chronology helps readers put individual events into historical context; a Reader's Guide organizes entries by broad topical or thematic areas; a detailed index helps users quickly

locate entries of most immediate interest; and a Resource Guide provides a list of journals, books, and associations and their websites. While articles were written to avoid jargon as much as possible, a Glossary provides quick definitions of technical terms. To ensure full, well-rounded coverage of the field, the General Editor with expertise in urban planning, public policy, and the environment worked alongside a Consulting Editor with a background in Civil Engineering. The index, Reader's Guide, and cross references combine for thorough search-and-browse capabilities in the electronic edition. Available in both print and electronic formats, Encyclopedia of Transportation is an ideal reference for libraries and those who want to explore the issues that surround transportation in the United States and around the world.

Cameroon's Tycoon Max Esser, 2001 Max Esser was an adventurous young merchant banker, a

Rhineland, who became the first managing director of the largest German plantation company in Cameroon. This volume gives a vivid account of the antecedents and early stages as experienced and described by Esser. In 1896 he ventured, with the explorer Zintgraff, into the hinterland to seek the agreement of Zintgraff's old ally, the ruler of Bali, for the provision of laborers for his projected enterprise. The consequences, many optimistically unforeseen, are illustrated with the help of contemporary materials. Esser's account is preceded by a look at his and his family's connections, added to by an account of newspaper campaigns against him, and completed by an examination of his Cameroon collection, which he gave to the Linden Museum in Stuttgart. E.M. Chilver is well known for her joint work with Phyllis Kaberry in Cameroon. Her last university post was as Principal of Lady Margaret Hall, Oxford. Ute Röschenhaler teaches at Frankfurt University.

Energy and Transport in Green Transition Atle Midttun, Nina Witoszek, 2015-06-26 This book breaks new ground in the studies of green transition. It frames the ongoing transformation in terms of a battle of modernities with the emerging vision of ecomodernity as the final destination. It also offers a systematic exploration of the potential for extensive transformation of carbon-intensive sectors - with a focus on energy and transport - towards a low or post-carbon economy. The book does so in a comparative perspective, by pointing to a diversity of techno-economic and institutional solutions in the mature Western economies, and in the rapidly growing East and developing South. The contributors highlight a broad spectrum of available alternatives as well as illuminate conflicting interests involved. They also demonstrate how solutions to the climate challenge require parallel technological and governance innovation. The book advocates a new, overarching vision and agenda of ecomodernity - based on a synergistic paradigm-shift in industry, politics and culture - to trigger and sustain the ecological innovation necessary to tip development in a green direction. This vision

cannot be monolithic; rather, it should reflect the diverse interests and conditions of the global population. This book is aimed at researchers and postgraduate students of energy, transport, environmental and climate policies, as well as development, environment, innovation and sustainability.
