Border Management Modernization Gerard McLinden, Enrique Fanta, David Widdowson, Tom Doyle, 2010-11-30 Border clearance processes by customs and other agencies are among the most important and problematic links in the global supply chain. Delays and costs at the border undermine a country's competitiveness, either by taxing imported inputs with deadweight inefficiencies or by adding costs and reducing the competitiveness of exports. This book provides a practical guide to assist policy makers, administrators, and border management professionals with information and advice on how to improve border management systems, procedures, and institutions.

Around France with Thickness and Smelfungus Richard Guise, 2018-09-14 For many Britons France has provided their first taste of that alien world called 'abroad' - and sometimes their last. Richard Guise has tracked down ten travellers' tales from three centuries, before venturing forth himself to follow some of their wanderings across the country. He finds out what's left from the sights they saw and how dramatically the country and its people changed over these turbulent times - taking in the years of the Grand Tour, the Revolution and the Napoleonic era; the coming of the railways, holidays and guide books; two world wars, recovery and prosperity; and the twenty-first-century threat of terrorism. His virtual companions include two Grand Tourers (Philip Thicknesse and Tobias Smollett - nicknamed Smelfungus), the man rumoured to have inspired Karl Baedeker, a future chairman of London County Council and Richard's own father, a D-Day survivor. They're not all complimentary about France and the French...

Cultural and Literary Representations of the Automobile in French Indochina Stéphanie Ponsavady, 2018-08-21 How are the pleasures and thrills of the automobile linked to France's history of conquest, colonialism, and exploitation in Southeast Asia? Cultural and Literary Representations of the Automobile in French Indochina addresses the contradictions of the "progress" of French colonialism and their consequences through the lens of the automobile. Stéphanie Ponsavady examines the development of transportation systems in French Indochina at the turn of the twentieth century, analyzing archival material and French and Vietnamese literature to critically assess French colonialism.

French Fried: one man's move to France with too many animals and an identity thief Chris Dolley, 2010-06-24 ** New York Times Bestseller ** Animals behaving badly, other people's misfortunes and the most bizarre true crime story ever. French Fried is the unfortunately true account of Chris Dolley's first eight months in France and has been described as 'A Year in Provence with Miss Marple and Gerald Durrell.' Just when Chris and Shelagh think nothing more could possibly go wrong, they discover that Chris's identity has been stolen and their life savings - all the money from their house sale in England that was going to finance their new life in France - had disappeared. A bank account had been opened in Chris's name in Spain to take the proceeds. Then they're abandoned by the police forces of four countries who all insist the crime belongs in someone else's jurisdiction. The French say it's an Irish crime as that's where the money was held. The Irish say it's French as that's where all the correspondence came from. The British say it's nothing to do with them even though forged British passports were used to open the bank account in Spain. And the Spanish are on holiday - and can't even think about investigating any bank account for at least four weeks. So Chris has to solve the crime himself. But unlike fictional detectives he has an 80 year-old mother-in-law and an excitable puppy who insist they come along if he's going anywhere interesting - like a stakeout. REVIEWS This was a fantastic read. It had me laughing so much that I nearly got relegated to the sofa! Once I had started reading this book, I could not put it down, I was even quite happy to miss my favourite TV programmes! - Bookmarked When I downloaded this book this morning, I had every intention of putting it on my phone and reading it in dribs and drabs. And now I appear to have finished the book! The best thing about 'French Fried' is it's sense of humour; warm, self-deprecating, and very British. Literally laugh out loud in several places (I'm glad I'm the only one home!). - Librarything Chris Dolley's humour reminds me of James Herriot at times, with my husband shushing me in the middle of the night. I could not put this book down and enjoyed it immensely. The characters, especially Nan, were life-size. - Salammi

The Robomobility Revolution of Urban Public Transport Sylvie Mira-Bonnardel, Fabio Antonialli, Danielle Attias, 2021-08-31 Over the past two decades, society has been witnessing how

technological, political, and societal changes have been transforming individual and collective urban mobility. Driven both by newcomers and traditional players, by disruptive as well as incremental innovations, the main objective now is to enhance mobility and accessibility while, reducing vehicle ownership, congestion, road accidents, and pollution in cities. This transformation has been mainly enabled by the widespread adoption of internet-connected devices (e.g.: smartphones and tablets) and by the innovative business models, technologies, and use-cases that arose from this rapid digitalization, such as peer-to-peer, and two-sided markets providing several mobility schemes: car-sharing, car-pooling, bike sharing, free-floating (cars, bikes, electric scooter), ridesharing and ride hailing either for long distances as well as for urban and micro-mobility. The book presents – in a holistic perspective – how this revolution is happening and what are the major cornerstones for the implementation of robomobility. It aims at answering several substantial issues, such as: What is robomobility and what does it imply for the different stakeholders of the public transport ecosystem? How do policy makers integrate this innovation and how ready the regulations are? How do citizens take part in this transformation? What is the level of user acceptance for this new type of mobility? What are its environmental impacts? What is the economic impact of deploying these shuttles in a local ecosystem?

Crécy 1346 Peter Hoskins, Richard Barber, 2016-11-11 On 26 August 1346, near the village of Crécy in northern France, Edward III's outnumbered English army confronted the French forces of Philip VI and won one of the most remarkable battles of the Hundred Years War. Edward's victory had a major impact on the course of the conflict, and it ranks alongside Poitiers and Agincourt as a landmark in the history of medieval warfare. And now, thanks to this detailed, highly illustrated guide, visitors can explore the battlefield for themselves and retrace the entire course of the Crécy campaign. Peter Hoskins and Richard Barber set Edward's victory within the context of the Hundred Years War and provide a graphic account of the battle. They include practical information to guide the motorist, cyclist and walker as well as descriptions of buildings, sites and monuments surviving from the period. The book is a mine of fascinating historical information, and it is based on the most recent scholarship and research. Intersections without Traffic Signals II Werner Brilon, 2012-12-06 In March 1988, an international workshop on intersections without traffic signals was held at the Ruhr-University in Bochum, Germany. The proceedings of this workshop were published by Springer 1). The workshop was performed in a very harmonious atmosphere, which stimulated the experts from different countries to communicate and exchange their ideas and experiences. The presentations and the written contributions documented the present state of technical solutions for design and engineering of unsignalized intersections both regarding scientific research and practical applications. Moreover, numerous unsolved problems were identified. Thus, the 1988 workshop stimulated new developments in the field of unsignalized intersections in several countries. In the meantime, these investigations have led to a remarkable progress. For example in Germany a new guideline for unsignalized cross intersections and T-junctions has been finished and is going to be introduced in 1991. New results on roundabout capacity have been worked out as well. Many particularly important developments were made in foreign countries. Especially in the United States, an increasing interest in this subject can be observed. In the annual meetings of the TRB, this item received great attention. Many research institutes in North America have concentrated their activities on that point. A new TRB-circular concerning unsignalized intersections is going to be published. It will contain a new procedure for four-way-stop-control intersections, which seems to be a special feature of North American traffic engineering. However, new results from the US for two-way-stop control intersections are available as well.

Quantitative Semiotic Analysis Dario Compagno, 2018-01-16 This contributed volume gives access to semiotic researches adopting a quantitative stance. European semiotics is traditionally based on immanent methodologies: meaning is seen as an autonomous dimension of human existence, whose laws can be investigated via purely qualitative analytical and reflexive analysis. Today, researches crossing disciplinary boundaries reveal the limitations of such an homogeneous practice. In particular, two families of quantitative research strategies can be identified. On the one hand, researchers wish to naturalize meaning, by making semiotic results interact with those coming from Neurophysiological and psychological sciences. On the other hand, statistical and computational tools are adopted to work on linguistic and multimedia corpora. The book acts to put the two approaches into dialogue.
