New Social Mobility Jens Schneider,Maurice Crul,Andreas Pott,2022-06-28 This open access book comparatively analyses intergenerational social mobility in immigrant families in Europe. It is based on qualitative in-depth research into several hundred biographies and professional trajectories of young people with an immigrant working-class background, who made it into high-prestige professions. The biographies were collected and analysed by a consortium of researchers in nine European countries from Norway to Spain. Through these analyses, the book explores the possibilities of cross-country comparisons of how trajectories are related to different institutional arrangements at the national and local level. The analysis uncovers the interaction effects between structural/institutional settings and specific individual achievements and family backgrounds, and how these individuals responded to and navigated successfully through sector-specific pathways into high-skilled professions, such as becoming a lawyer or a teacher. By this, it also explains why these trajectories of professional success and upward mobility have been so exceptional in the second generation of working-class origins, and it tells us a lot also about exclusion mechanisms that marked the school and professional careers of children of immigrants who went to school in the 1970s to 2000s in Europe – and still do.

European Powers in the First World War Spencer Tucker, 2018-12-07 First published in 1996. The First World War was the single most important event of the twentieth century. This volume concentrates on non-U.S. aspects of the conflict. Organized alphabetically, its more than 600 detailed entries offer information and insight on such subjects as the causes of the conflict, major battles and campaigns, weapons systems (including military aviation, chemical warfare, the submarine, and the tank), and the terms of the peace. Some 350 biographies provide information on the roles played in the conflict by generals, admirals, and civilian leaders. There are also biographies of individuals who were shaped by the war, such as Charles De Gaulle, Adolf Hitler, Benito Mussolini, and Joseph Stalin; essays on each of the countries involved in the conflict; new appraisals of such subjects as military medicine and artillery tactics; and essays on such diverse subjects as art, literature, and music in the war.
