English–French Translation Christophe Gagne,Emilia Wilton-Godberfforde,2020-12-30 English-French Translation: A Practical Manual allows advanced learners of French to develop their translation and writing skills. This book provides a deeper understanding of French grammatical structures, the nuances of different styles and registers and helps increase knowledge of vocabulary and idiomatic language. The manual provides a wealth of practical tasks based around carefully selected extracts from the diverse text types students are likely to encounter, from literary and expository, to persuasive and journalistic. A mix of shorter targeted activities and lengthier translation pieces guides learners through the complexities and challenges of translation from English into French. This comprehensive manual is ideal for advanced undergraduate and postgraduate students in French language and translation.

Translation, Linguistics, Culture Nigel Armstrong,2005-01-01 This book takes a linguistic approach to translation issues, looking first at the structural view of language that explains the difficulty of translation and at theories of cultural non-equivalence. A subsequent chapter on text types, readership and the translator's role completes the theoretical framework. The linguistic levels of analysis are then discussed in ascending order, from morpheme up to sentence, while a summarising chapter considers various translation types and strategies, again considered in relation to text type, author and reader.

The Beginning Translator's Workbook Michele H. Jones,2014-03-18 This workbook combines methodology and practice for beginning translators with a solid proficiency in French. It assumes a linguistic approach to the problems of translation and addresses common pitfalls, including the delineation of “translation units”, word polysemy, false cognates, and structural and cultural obstacles to literal translation. The first part of the book focuses on specific strategies used by professionals to counter these problems, including transposition, modulation, equivalence, and adaptation. The second part of the book provides a global application of the techniques taught in the opening sections, guiding the student through step-by-step translations of literary and non-literary excerpts. The revised edition clarifies some of the finer points of the translation techniques introduced in the first edition, provides extra practice exercises, and offers information on a website that can be used in class.

General principles are elucidated in an introduction, in a postlude entitled &The Elements of Good Translation,& and throughout the French and Spanish parts. Part I, Translating from French into English, is organized alphabetically to cover French words and phrases that cannot be translated literally (absence, abuser, adapt&é &à . . .), English locutions with connotations differing from those of their French counterparts (actually, analyze, as well as, also . . . and special problems (abstract nouns, ambiguity, archaisms). Part II, Translating from Spanish into English, has the same alphabetical organization, covering tricky Spanish terms (abordaje, acciones, actitudes. . .), problematic English translations (alternate, although, aspect . . .) and special problems (ambiguity, Anglicisms, dictionaries . . .). Part II also has an entry under Portuguese, dispelling the assumption that facility in translating Spanish guarantees capability to handle Portuguese.

A Linguistic Handbook of French for Translators and Language Students Paul Boucher,2018-04-03 A Linguistic Handbook of French for Translators and Language Students offers the reader an in-depth contrastive study of French and English based on recent theories of linguistics and discourse analysis. At the same time it is a practical manual for the advanced language student or the translator with dozens of exercises in analyzing and translating French along with detailed corrections. Organized in three sections – Structure, Perspective and Coherence – the handbook first explores French word formation and syntax, then moves on to the use of tense and aspect, illocution and speech styles in various text types. Finally, problems concerning textual coherence and cohesion in both languages are discussed: anaphora and ellipsis, relevance and equivalence and information structure. Each chapter is followed by a list of suggested readings for further discussion and a detailed glossary at the end of the book explains all technical terms used. The handbook is designed to be used either as a textbook or for individuals working at home.

On Translating French Literature and Film II ,2021-07-19

On Translating French Literature and Film Geoffrey T. Harris,1996 This volume is of particular relevance to literary and filmic translators, to translation theorists and to anyone with an interest in translation as an art. Throughout the majority of essays in the volume, translation is projected as a complex creative task and not as an exercise in simply re-encoding the meaning of a source text. The received superiority of the original is ultimately questioned here. The customary binary divide between original and translation or copy, and between author and translator is forcefully challenged as cinematic and literary translation is presented as an essentially

creative process. Whether highlighting specific author-related problems or whether focusing on the broader issues of the ethics of translation, of cultural transmissibility or of obsolescence, the general thrust of these essays seeks to demonstrate the authorial credentials of the translator. Despite the cogent counter-arguments advanced by a minority of the contributors, the dominant discourse here is one which replaces the stereotypical, virtually anonymous translator with a high-profile, creative figure.

Comparative Stylistics of French and English Jean-Paul Vinay, Jean Darbelnet, 1995-12-01 The *Stylistique comparée du français et de l'anglais* has become a standard text in the French-speaking world for the study of comparative stylistics and the training of translators. This updated, first English edition makes Vinay & Darbelnet's classic methodology of translation available to a wider readership. The translation-oriented contrastive grammatical and stylistic analyses of the two languages are extensively exemplified by expressions, phrases and texts. Combining description with methodological guidelines for translation, this volume serves both as a course book and through its detailed index and glossary as a reference manual for specific translation problems.
