Data Mining Mobile Devices Jesus Mena,2013-06-18 With today's consumers spending more time on their mobiles than on their PCs, new methods of empirical stochastic modeling have emerged that can provide marketers with detailed information about the products, content, and services their customers desire. Data Mining Mobile Devices defines the collection of machine-sensed environmental data pertaining to human social behavior. It explains how the integration of data mining and machine learning can enable the modeling of conversation context, proximity sensing, and geospatial location throughout large communities of mobile users. Examines the construction and leveraging of mobile sites Describes how to use mobile apps to gather key data about consumers' behavior and preferences Discusses mobile mobs, which can be differentiated as distinct marketplaces—including Apple®, Google®, Facebook®, Amazon®, and Twitter® Provides detailed coverage of mobile analytics via clustering, text, and classification AI software and techniques Mobile devices serve as detailed diaries of a person, continuously and intimately broadcasting where, how, when, and what products, services, and content your consumers desire. The future is mobile—data mining starts and stops in consumers' pockets. Describing how to analyze Wi-Fi and GPS data from websites and apps, the book explains how to model mined data through the use of artificial intelligence software. It also discusses the monetization of mobile devices' desires and preferences that can lead to the triangulated marketing of content, products, or services to billions of consumers—in a relevant, anonymous, and personal manner.

Advertising in the Digital Age Sevil Yesiloglu,Joyce Costello,2024-04-09 Advertising is everywhere. Whether you realise it or not, it's there when you watch your favourite Netflix show, when you scroll through Instagram, and when you search on Google. What's more, advertisers are becoming more savvy than ever, using new technologies to target adverts to you specifically. So what are we to make of all this? This book will equip you with a thorough understanding of today's media environment and how 'online' advertising differs from traditional 'offline' models. In an age of influencers, big data, AI and social media, the world of advertising looks very different from how it did a generation ago. You will learn not only about various types of advertising, but also about its impact on viewers, from our buying habits to possible harm. Tying theory and concepts to practice, this volume is the ideal complement to courses in advertising, digital media and communication, and will enable you to form a clear picture of the reality of working across promotional media industries.

The Little Book of Likes Erik Hanberg,2013-04-01 The Little Book of Likes is dedicated to helping small (and very small) nonprofits build an audience on social media platforms like Facebook and Twitter. This short guide leads Executive Directors and nonprofit marketing managers through the ins and outs of a simple social media strategy that is effective and sustainable. With real-world practical advice, it recognizes that nonprofit managers usually have better things to be doing than updating Facebook. Like The Little Book of Gold, it was written specifically for small nonprofits as a "road map" to the often confusing and changing world of social media. New material in the revised and expanded edition covers Facebook advertising, podcasting, and other tools to help make your social media work for you. Revised and expanded in 2019!

The Complete Idiot's Guide to Social Media Marketing, 2nd Edition Jennifer Abernethy, 2012-04-03 The Complete Idiot's Guide® to Social Media Marketing, Second Edition, covers cutting-edge techniques for small and large businesses alike. Ask the Author Q: How has social media marketing changed business and personal lives? A: The playing field has been leveled for business. No longer do you need a 6 or 7 figure budget to reach people around the country or globe for that matter. Personally, many lives have been affected. Many people more connected, businesses have grown because of the connections, TV and singing careers have been launched, money has been raised for charity, books have been marketed and purchased, and so on. Q: What has been the most challenging part of utilizing social media? A: I think the learning curve. With all of these sites . . . they come with no directions and no LIVE phone number. Q: What has worked the best and worst thus far? A: Facebook because of it's broad reach really has worked for me, but many would argue that YouTube works the best; particularly since it is the search engine of choice with the 11-34 age group. Q: How can a person searching for a job use social media marketing? A: So many ways. . . . They need to be on LinkedIn with a professional looking profile, photo, and contact information. They could also utilize video to begin sharing their expertise. Candidates need to stand out in a crowd of millions so if they say . . . sent in a video introducing themselves and a video follow up email . . . that would wow them! Q: What is the newest thing since Twitter? A: I believe companies and individuals are starting to utilize audio for creating their own iTunes channel, and also location-based social media like FourSquare. I personally, am not sold on location based services as of yet from a safety point of view, but for retailers it can be a good thing. I believe video is going to explode in popularity in 2011 for the 35+ market as well. They just need to get comfortable being on camera!

Worried About the Wrong Things Jacqueline Ryan Vickery, 2018-09-11 Why media panics about online dangers overlook another urgent concern: creating equitable online opportunities for marginalized youth. It's a familiar narrative in both real life and fiction, from news reports to television storylines: a young person is bullied online, or targeted by an online predator, or exposed to sexually explicit content. The consequences are bleak; the young person is shunned, suicidal, psychologically ruined. In this book, Jacqueline Ryan Vickery argues that there are other urgent concerns about young people's online experiences besides porn, predators, and peers. We need to turn our attention to inequitable opportunities for participation in a digital culture. Technical and material obstacles prevent low-income and other marginalized young people from the positive, community-building, and creative experiences that are possible online. Vickery explains that cautionary tales about online risk have shaped the way we think about technology and youth. She analyzes the discourses of risk in popular culture, journalism, and policy, and finds that harm-driven expectations, based on a privileged perception of risk, enact control over technology. Opportunity-driven expectations, on the other hand, based on evidence and lived experience, produce discourses that acknowledge the practices and agency of young people rather than seeing them as passive victims who need to be protected. Vickery first addresses how the discourses of risk regulate and control technology, then turns to the online practices of youth at a low-income, minority-majority Texas high school. She considers the participation gap and the need for schools to teach digital literacies, privacy, and different online learning ecologies. Finally, she shows that opportunity-driven expectations can guide young people's online experiences in ways that balance protection and agency.

Youth Politics in Urban Asia Yi’En Cheng, Sonia Lam-Knott, 2021-07-12 Youth Politics in Urban Asia examines how young people’s political actions in Asia are the product of their urban realities, and at the same time, appreciates that young people are striving to remake these urban spaces in a myriad of tangible and intangible ways. The book explores the ways in which urban development and urban governance in Asia enable or constrain young people’s citizenship, aspirations, and responses to a variety of socioeconomic and political issues in the region. Informed by qualitative and ethnographic approaches, featuring locales ranging from Pune to Shanghai, the chapters broadly address three themes: the variegated ways in which youth politics is constituted and has manifested in Asian cities; the role of cities in shaping and mediating youth politics in Asia; and whether it is possible to conceive of youth politics across urban Asia as diverse and specific, but also structurally entangled. In examining how young people’s political performances and social actions are shaped by, and conversely, shape, Asian urban spaces, this collection advances a deeper understanding of the interplay of youth politics and urban environments. It will be an essential text for scholars and students interested in young people’s politics, urban studies, and social change in Asia. The chapters in this book were originally published as a special issue of the journal Space and Polity.
