Adair's History of the American Indians James Adair,2023-11-17 Adair's History of the American Indians by James Adair is a classic study of southeastern Native American culture of the late colonial period from 1735 to 1768. It's one of the few primary sources from that time period that aims to understand that culture, even if it's from the skewed view of an English settler. Even considering it's flaws, the book is considered one of the finest histories of the Native Americans.

2 Billion Under 20 Jared Kleinert,Stacey Ferreira,2015-07-28 Of the roughly

6.97 billion people on Earth today, approximately 2 billion of them are under 20 years old. Millennials have a lot of reputations these days, but powerful, smart, and affective are not usually the adjectives used to describe them. Jared Kleinert and Stacey Ferreira want to change that and empower these young people to follow their dreams, set goals, and achieve success. Both young successful entrepreneurs themselves, they believe in breaking down age barriers to make a difference. Jared, best-known as the Founder and CEO of Synergist, and Stacey, best-known as the Co-Founder of MySocialCloud.com met in 2012 at the Under 20 Thiel Fellowship Summit. After speaking with their equally impressive peers, they realized that these 2 billion young voices have inspiring stories to share with the world and they wanted to bring them to life through 2 Billion Under 20. Jared and Stacey also decided to start an online community, www.2BillionUnder20.com where young people could help each other grow and develop their dreams into reality. They've curated an anthology of amazing stories from their peers. Contributors like Paige McKenzie who started her own YouTube channel at the age of 16 that now has more than 55 million views and Jack Andraka who created an early detection Pancreatic cancer test at age 14 have joined forces to show the world that age is just a number.

Leveraging Data Science for Global Health Leo Anthony Celi, Maimuna S. Majumder, Patricia Ordóñez, Juan Sebastian Osorio, Kenneth E. Paik, Melek Somai, 2020-07-31 This open access book explores ways to leverage information technology and machine learning to combat disease and promote health, especially in resource-constrained settings. It focuses on digital disease surveillance through the application of machine learning to non-traditional data sources. Developing countries are uniquely prone to large-scale emerging infectious disease outbreaks due to disruption of ecosystems, civil unrest, and poor healthcare infrastructure - and without comprehensive surveillance, delays in outbreak identification, resource deployment, and case management can be catastrophic. In combination with context-informed analytics, students will learn how non-traditional digital disease data sources - including news media, social media, Google Trends, and Google Street View - can fill critical knowledge gaps and help inform on-the-ground decision-making when formal surveillance systems are insufficient.

Power and Landscape in Atlantic West Africa J. Cameron Monroe, Akinwumi Ogundiran, 2012-02-13 This volume applies insights drawn from the theories and methods of landscape archaeology to contribute to our understanding of the nature of West African societies in the Atlantic Era (17th-19th Centuries AD). The authors adopt a broad set of methods and approaches to tackle how the nature and structures of African political and social relations changed across regions in this period. This is only the second volume in a decade to focus on the archaeology of this period in West Africa, and the first volume in sub-Saharan Africanist archaeology to be focused in the recent past in one sub-region of the continent from a coherent methodological and theoretical standpoint--Provided by publisher.
