*Engaging the Public to Fight the Consequences of Terrorism and Disasters* I. Apostol, J. Mamasakhlisi, D. Subotta, 2015-05-07  
Governments must work tirelessly to update their preparedness for dealing with natural and man-made disasters, as well as taking account of the increasingly present threat of terrorism. Efficient international cooperation is key to achieving safety and internationalizing security policy. This book presents the proceedings of the NATO Advanced Research Workshop (ARW) *Engaging the Public to Fight the Consequences of Terrorism and Disasters*, held in Tbilisi, Georgia, in June 2014. The purpose of the workshop was to analyze accumulated European theoretical knowledge and practical experience in the field of disaster prevention and the involvement of the public in preventing and fighting the consequences of terrorism, as well as natural and man-made disasters. There was a particular focus on the perspective of the region, especially with a view to meeting European Union standards and setting uniform and independent standards for hazard and risk assessment methods. The protection of economically critical infrastructure, such as dams, pipelines and transport and storage facilities, was addressed as were the issues of managing water and non-renewable resources, the disposal of

dangerous chemicals and radioactive waste, and defensible methods of transport for fuel supplies and key personnel. Contributions reflected the extensive experience of the participating NATO and partner countries, including Armenia, Austria, Bulgaria, Georgia, Germany, Italy, Moldova, the Netherlands, Romania, Turkey and Ukraine as well as international organizations such as UNECE and NATO.

Moving Data Pelle Snickars, Patrick Vonderau, 2012-07-10 The iPhone has revolutionized not only how people communicate but also how we consume and produce culture. Combining traditional and social media with mobile connectivity, smartphones have redefined and expanded the dimensions of everyday life, allowing

individuals to personalize media as they move and process constant flows of data. Today, millions of consumers love and live by their iPhones, but what are the implications of its special technology on society, media, and culture? Featuring an eclectic mix of original essays, *Moving Data* explores the iPhone as technological prototype, lifestyle gadget, and platform for media creativity. Media experts, cultural critics, and scholars consider the device's newness and usability—even its lickability—and its biographical story. The book illuminates patterns of consumption; the fate of solitude against smartphone ubiquity; the economy of the App Store and its perceived crisis of choice; and the distance between the accessibility of digital information and the protocols governing its use. Alternating between critical and conceptual analyses, essays link the design of participatory media to the iPhone's technological features and sharing routines, and they follow the extent to which the pleasures of gesture-based interfaces are redefining media use and sensory experience. They also consider how user-led innovations, collaborative mapping, and creative empowerment are understood and reconciled through changes in mobile surveillance, personal rights, and prescriptive social software. Presenting a range of perspectives and arguments, this book reorients the practice and study of media critique.
