**Game Preview** Nicolae Sfetcu,2014-05-04 A guide for game preview and rules: history, definitions, classification, theory, video game consoles, cheating, links, etc. While many different subdivisions have been proposed, anthropologists classify games under three major headings, and have drawn some conclusions as to the social bases that each sort of game requires. They divide games broadly into, games of pure skill, such as hopscotch and target shooting; games of pure strategy, such as checkers, go, or tic-tac-toe; and games of chance, such as craps and snakes and ladders. A guide for game preview and rules: history, definitions, classification, theory, video game consoles, cheating, links, etc.

What’s the best way to slice a ham sandwich, mathematically? What makes Bobs look especially Bob-like? Is the right or left ear better at discerning lies? Could mice be outfitted with parachutes to kill tree snakes?

*THE PSYCHODYNAMICS AND PSYCHOLOGY OF GAMBLING* Mikal Aasved,2002-01-01 The Psychodynamics and Psychology of Gambling is the first volume in the four-volume The Gambling Theory and Research Series. Author Mikal Aasved felt a need to fill what he perceived to be a lack of background sources or reviews of literature pertaining to gambling theory and research. This series will present major findings of leading researchers as they study the causes and effects of gambling, both recreational and excessive. This first entry in the series reviews the most influential psychodynamic and psychological theories that explain why people gamble. Psychoanalytical theorists discussed include Freud, Von Hattingberg, Fenichel, Bergler, Simmel, Greenson, Stekel, and others. Aasved includes sections on behavioral (learning or reinforcement theory) psychological approaches to gambling with discussion of Skinner's ideas and research findings as well as Pavlov's principles. This book begins with the question 'Why do people gamble?' and offers many theories proposed by clinicians, laboratory and field researchers, and participants as they seek to explain the motivation behind gambling. The differences between gambling as entertainment and gambling compulsion is a focus of much research. Aasved addresses ideas set forth as to why some people are able to control their gambling and others cannot, even when it means sacrificing their jobs, family, and material possessions. This text provides a

comprehensive background into theories of addiction research as studied by leaders in the field.

**Gaming in Online Casinos** Nicolae Sfetcu,2014-05-10 Internet casino guide - best gambling on net and casino bonus. Online casinos, also known as virtual casinos, are the online version of land-based (brick and mortar) casinos. They allow you to play casino games through the Internet. Some online casinos provide various games, while others only provide only one type of game. Online poker is also very popular and there are many dedicated companies that provide this activity.

**The Sociology of Gambling** Mikal J. Aasved,2003 This is the second in a series of books intended to review and evaluate the most popular and influential explanations for gambling and the many research studies that have been conducted to confirm or refute them. This book focuses on the contributions of specialists in the social sciences, most of whom are convinced that gambling is a consequence of the social or subcultural environment in which the gambler lives. To further the understanding of why people gamble, investigators went to places where gambling occurred and spent time among and interacted with the gamblers. Some attended Gamblers Anonymous meetings and others became participant observers in gambling establishments by becoming employed as roulette croupiers or card dealers. Topics covered include the gambler's point of view, the researcher's point of view, social structure, economics, statistical tests of earlier ideas, special populations, ``armchair" theories, gambling and the public, problem correlates, and risk factors. In addition, a critique of the qualitative and quantitative studies involving survey research methods and interview research methods is given that provides theoretical explanations for why people gamble. Numerous results from geographical surveys are provided, as well as tables that examine the research of problem gambling.
