Nestlé in Fulton, New York Jim Farfaglia, 2018-11-26 Devour this delectable, surprising history of one of America's most beloved confectioners with photos, firsthand accounts, and stories. In 1898, Switzerland's Nestlé Company was searching for a location to build its first milk processing plant in the United States. Upstate New York's bountiful dairy farms sealed the deal for a factory in Fulton. Soon another Swiss company requested space at the factory to produce a confection that had taken Europe by storm: the milk chocolate bar. Over the next century, factory technicians invented classic treats including the Nestlé Crunch Bar, Toll House Morsels, and Nestlé Quik. With 1,500 workers churning out a million pounds of candy per day, Fulton became known as the city that smelled like chocolate. In this lively, photo-filled biography, Jim Farfaglia recounts the delectable history of Nestlé in Fulton, New York.

**The Housing Boom and Bust** Thomas Sowell, 2010-02-23 Scary headlines and scarier statistics tell the story of a financial crisis on a scale not seen in decades—certainly not within the lifetime of most Americans. Moreover, this is a worldwide financial crisis. Financial institutions on both sides of the Atlantic have either collapsed or have

been saved from collapse by government bailouts, as a result of buying securities based on American housing values that eroded or evaporated. Now completely revised in paperback, *The Housing Boom and Bust* is designed to unravel the tangled threads of that story. It also attempts to determine whether what is being done to deal with the problem is more likely to make things better or worse.

**The Settlers' War** Gregory Michno, 2011-08-15 Distributed by the University of Nebraska Press for Caxton Press During the decades from 1820 to 1870, the American frontier expanded two thousand miles across the trans-Mississippi West. In Texas the frontier line expanded only about two hundred miles. The supposedly irresistible European force met nearly immovable Native American resistance, sparking a brutal struggle for possession of Texas's hills and prairies that continued for decades. During the 1860s, however, the bloodiest decade in the western Indian wars, there were no large-scale battles in Texas between the army and the Indians. Instead, the targets of the Comanches, the Kiowas, and the Apaches were generally the homesteaders out on the Texas frontier, that is, precisely those who should have been on the sidelines. Ironically, it was these noncombatants who bore the brunt of the warfare, suffering far greater losses than the soldiers supposedly there to protect them. It is this story that *The Settlers' War* tells for the first time.

Cities and Affordable Housing Sasha Tsenkova, 2021-09-06 This book provides a comparative perspective on housing and planning policies affecting the future of cities, focusing on people- and place-based outcomes using the nexus of planning, design and policy. A rich mosaic of case studies features good practices of city-led strategies for affordable housing provision, as well as individual projects capitalising on partnerships to build mixed-income housing and revitalise

neighbourhoods. Twenty chapters provide unique perspectives on diversity of approaches in eight countries and 12 cities in Europe, Canada and the USA. Combining academic rigour with knowledge from critical practice, the book uses robust empirical analysis and evidence-based case study research to illustrate the potential of affordable housing partnerships for mixed-income, socially inclusive neighbourhoods as a model to rebuild cities. Cities and Affordable Housing is an essential interdisciplinary collection on planning and design that will be of great interest to scholars, urban professionals, architects, planners and policy-makers interested in housing, urban planning and city building.

Growing Smarter Robert D. Bullard,2007-01-12 The smart growth movement aims to combat urban and suburban sprawl by promoting livable communities based on pedestrian scale, diverse populations, and mixed land use. But, as this book documents, smart growth has largely failed to address issues of social equity and environmental justice.

Smart growth sometimes results in gentrification and displacement of low- and moderate-income families in existing neighborhoods, or transportation policies that isolate low-income populations. *Growing Smarter* is one of the few books to view smart growth from an environmental justice perspective, examining the effect of the built environment on access to economic opportunity and quality of life in American cities and metropolitan regions. The contributors to *Growing Smarter*—urban planners, sociologists, economists, educators, lawyers, health professionals, and environmentalists—all place equity at the center of their analyses of place, space, and race. They consider such topics as the social and environmental effects of sprawl, the relationship between sprawl and concentrated poverty, and community-based regionalism that can link cities and suburbs. They examine specific cases that illustrate opportunities for integrating environmental justice concerns into smart growth efforts, including the dynamics of sprawl in a South Carolina county, the debate over the rebuilding of New Orleans after Hurricane Katrina, and transportation-related pollution in Northern Manhattan. *Growing Smarter* illuminates the growing racial and class divisions in metropolitan areas today—and suggests workable strategies to address them.

Snow Hill Michelle Fulton, 2009-03-02 Snow Hill, the seat of Worcester County, is more than 300 years old and continues to grow. Travelers from all around visit this quaint and unique community of art galleries, bed-and-breakfasts, and small shops, including Maggie's of Snow Hill, in which the author works as a bookseller.

**The Manors and Historic Homes of the Hudson Valley** Harold Donaldson Eberlein, 2023-02-01 Harold Donaldson Eberlein's *The Manors and Historic Homes of the Hudson Valley* has been considered an essential and elegant resource ever since its first publication by J.B. Lippincott in 1924. Profusely illustrated with drawings, classic prints, and photographs (many of the latter taken by the author himself), the book not only discusses the architecture and beauty of more than thirty-five historically relevant estates and homesteads, but also contextualizes their varied histories amid key social and political disruptions, ranging from the rise of the Dutch through to the American Revolution and the heyday of the patroonships overseen by such families as the Livingstons, the Van Rensselaers, and the Van Cortlandts. Eberlein saw the old manors and historic homes of the Hudson Valley as vital signposts to that history of the region— a history inseparably bound up with the old houses that stand upon both banks of the river, and [a history which] without them ... would lose its dramatic force and become a dull, dead abstraction. This new edition features an introduction by historian Ed Rienehan who sets the work in the context of its time, and many new photographs. This book is an indispensable resource for those interested in New York state history and the stories behind some of its best-loved homes.
