Introduction to TikTok Gilad James, PhD, TikTok is a social media platform that allows users to create and share short-form videos, typically set to music. It has become increasingly popular among younger audiences, with over 800 million active users worldwide. The app's algorithmic feed shows users content that is tailored to their interests and behavior, making it an addictive and highly engaging platform. TikTok has also become a hub for creativity and self-expression, with users often showcasing their talent in music, dance, and comedy. The app has also faced controversy over its handling of user data and potential security risks, leading to calls for greater regulation and oversight. Despite these concerns, TikTok remains one of the most popular social media platforms in the world today, with a growing influence on modern youth culture.

Mastering OpenCV 3 Daniel Lelis Baggio,Shervin Emami,David Millan Escrivá,Khvedchenia Ievgen,Jason Saragih,Roy Shilkrot,2017-04-28 Practical Computer Vision Projects About This Book Updated for OpenCV 3, this book covers new features that will help you unlock the full potential of OpenCV 3 Written by a team of 7 experts, each chapter explores a new aspect of OpenCV to help you make amazing computer-vision aware applications Project-based approach with each chapter being a complete tutorial, showing you how to apply OpenCV to solve complete problems Who This Book Is For This book is for those who have a basic knowledge of OpenCV and are competent C++ programmers. You need to have an understanding of some of the more theoretical/mathematical concepts, as we move quite quickly throughout the book. What You Will Learn Execute basic image processing operations and cartoonify an image Build an OpenCV project natively with Raspberry Pi and cross-compile it for Raspberry Pi.text Extend the natural feature tracking algorithm to support the tracking of multiple image targets on a video Use OpenCV 3's new 3D visualization framework to illustrate the 3D scene geometry Create an application for Automatic Number Plate Recognition (ANPR) using a support vector machine and Artificial Neural Networks Train and predict pattern-recognition algorithms to decide whether an image is a number plate Use POSIT for the six degrees of freedom head pose Train a face recognition database using deep learning and recognize faces from that database In Detail As we become more capable of handling data in every kind, we are becoming more reliant on visual input and what we can do with those self-driving cars, face recognition, and even augmented reality applications and games. This is all powered by Computer Vision. This book will put you straight to work in creating powerful and unique computer vision applications. Each chapter is structured around a central project and deep dives into an important aspect of OpenCV such as facial recognition, image target tracking, making augmented reality applications, the 3D visualization framework, and machine learning. You'll learn how to make AI that can remember and use neural networks to help your applications learn. By the end of the book, you will have created various working prototypes with the projects in the book and will be well versed with the new features of OpenCV3. Style and approach This book takes a project-based approach and helps you learn about the new features by putting them to work by implementing them in your own projects.

The Experience Effect Jim Joseph,2010-05-19 The overall experience of the buying process ultimately determines whether consumers will pay money for a product or service: they weigh what they are purchasing with their responses to the marketing message, the advertising, the sales approach, the website, the interaction with company personnel, and more. Jim Joseph calls the ideal combination these elements the “experience effect.” In this book, he shows how any business can create one for its brand to ensure customers leave satisfied. The Experience Effect does this by teaching readers how to understand their brand’s target audience, conduct more effective market research, connect with customers on an emotional level, establish appropriate and engaging customer touchpoints, link digital and nondigital media, and perform a gap analysis of their brands’ marketing. Filled with practical advice and real-life examples, this insightful guide helps companies of any type and size coalesce the varied elements of their business into a seamless consumer experience that resonates deeply, builds brand loyalty, and keeps customers coming back.

Our Lives to Live Kanwaljit Soin,Margaret Thomas,2015-05-05 Our Lives to Live: Putting a Woman's Face to Change in Singapore explores and documents how women's roles, choices, and voices in Singapore have changed in the last 50 years; how women, from all sectors of society, have helped to shape the Singapore we know today. The 31 chapters, some with a more academic slant, others with a distinctly personal tone, reflect the rich diversity and depth of

women's contributions to Singapore's evolution in the last half century, and also point to the problematical areas that still need attention. The perspectives in this book are provided by three generations of women, and they put a human face — the woman's face — to the tremendous changes in Singapore society over the past 50 years. The authors include some of Singapore's most accomplished women in many different fields — Speaker of Parliament Halimah Yacob, political scientist and diplomat Chan Heng Chee, global women's activist Noeleen Heyzer, sociologist and politician Aline Wong, food ambassador Violet Oon, sports legend Pat Chan, law lecturer and playwright Eleanor Wong, and novelist Meira Chand. Contents:Fifty Years of Change and Struggle for Equality (Aline Wong)Women and an Age-Friendly Singapore (Angelique Chan)A Home-schooling in Financial Fitness (Audrey Chin)Preparing Our Children for the Future (Carmee Lim)My Life to Live (Chan Heng Chee)My Choices (Choo Wai Hong)Where Will Women Be in 50 Years?
