Fun Science Charlie McDonnell,2016-10-06 Welcome, fellow humans (and others), to the the world of FUN SCIENCE! I'm Charlie, also known across the internet as charlieissocoollike. In my book, I take you on an awesome journey through the cosmos, beginning with the Big Bang through to the Solar System and the origins of life on Earth, all the way down to the particles that make up everything around us (including you and me!). Expect frequent digressions, tons of illustrations of not-so-sciencey things (NB a microwave flying through space), and pages packed with my all time favourite mind-bending science facts. So, get ready for a faster-than-the-speed-of-light (OK, not quite) tour of all of the best and most interesting things that science has to offer us... and most importantly: WELCOME TO THE UNIVERSE! (Written by a science fan NOT a scientist!)

Fun with Science George Barr,1994-01-01 Instructions on how to do demonstrations with electricity, magnetism, air pressure, and other scientific principles

Bathroom Science Christine Taylor-Butler,2016-10-01 Create exploding toilet volcanoes, oozing sink slime, and bubbling bathtub cauldrons...all in the name of science! Each step-by-step experiment uses household and other easy-to-find materials so the young scientist's lab can be equipped quickly, inexpensively, and—for those who might worry—safely. Bathroom Science highlights the materials, the method, and the scientific why behind every experiment. Best of all, Bathroom Science makes science as simple (and occasionally explosive) as going to the bathroom. We've packed in 101 kid-challenging experiments, including... *Turn Your Toilet into a Volcano *Steam Up a Secret Message *Fill the Sink with Booger Slime *Give Bathwater an Eerie Glow *The Cackling Chicken of Death, and *Make Your Own Stink Bomb (Eew!) The folks who brought you Uncle John's Bathroom Reader...creating the next generation of mad (and amazing) scientists, one kid at a time! (Bwa-ha-ha!)

Awesome Science Experiments for Kids Crystal Ward Chatterton,2018-02-13 Getting kids excited about science can be difficult. Science Experiments for Kids provides young scientists ages 5-10 with hands-on experiments that teach them how to apply the scientific method. From the home laboratory of former chemistry teacher and blogger behind the Science Kiddo, Crystal Chatterton combines fun experiments with the hows and whys behind them in Science Experiments for Kids--

Make Science Fun Jacob Strickling,2016-11 With all the technology, games and apps available to kids these days, it's easy to overlook science books as a fantastic source of entertainment and education. 'Make Science Fun' teaches scientific concepts and ideas through fun, memorable experiments and activities that can easily be performed at home using common household items and engaging content. The fascinating information and experiments will encourage kids to explore science and the world around them.

Science Experiments That Surprise and Delight Sheri Bell-Rehwoldt,2010-12 Provides step-by-step instructions for science projects using household materials and explains the science behind the experiments--Provided by publisher.

Make Science Fun: Experiments Jacob Strickling,2017-11-06 Make Science Fun 2, intended for an older more 'serious' age group of 8-15, is designed for children to do actual science experiments (not just science 'activities') at home. Most science experiment books aren't experiment books at all. They mostly contain fun science activities, which are fun to do & help learn science - but a fun science 'activity' isn't always an experiment. A science experiment sets out to answer a question or solve a problem using a fair and controlled test. To count as a science experiment you need to take measurements, make observations and control variables. With space to write hypotheses, record results, make observations and draw graphs required, Make Science Experiments is a strong foundation on which to build student awareness of the importance of science in everyday lives. SELLING POINTS - Science experiments for the kitchen, garage or workshop, bathroom and garden. - Bonus projects perfect for a science fair or school project. - Projects using only basic products that can be found in every home kitchen or bathroom. - Make Science Fun banishes the 'science is boring' stereotype through fun experiments that children can do alone or with friends or parents. - The author's YouTube channel.

Super Fun Science Jaclyn Crupi,2017 Teach children how to become little scientists with this hands-on book. They will learn fascinating things about such topics as energy, gravity, weight, light, and matter. Includes ways to make a scale, bend light, trap gas, and more. Kids will prove scientific facts for themselves by testing them out with challenging experiments created especially for them.

Fun & Easy Science Projects: Grade 3 Experiland,2010-09-23 Science certainly does not need to be complicated formulas, heavy text books and geeky guys in white lab coats with thick glasses. Science can be really simple and is actually only about understanding the world you live in! Science experiments are an awesome part of science that allows you to engage in cool and exciting hands on learning experiences that you are sure to enjoy and remember! By working through the science projects in this book, you will learn about science in the best possible way - getting your hands dirty & doing things yourself! Specially chosen to appeal to kids in grade 3, each experiment answers a particular question about a specific category of science and includes an introduction, list of the materials you need, easy-to-follow steps, an explanation of what the experiment demonstrates as well as a learn more and science glossary section! Each of these easy-to-understand sections helps explain the underlying scientific concepts to kids and will inspire them to create their own related experiments and aid in developing an inquisitive mind. Amongst many others, you will send secret messages to your friends with your own invisible ink to understand how chemical reactions works, construct a rocket to see how objects fly, make a self-filling water bowl for pets using air pressure, and make a light bulb shine using a lemon as a battery to learn about electric current! Other fun experiments include growing your own crystals along a piece of string, making an electrical doorbell for your room, telling the time with your own water clock, cutting through ice with a string, making a spool 'walk' with the energy stored in an elastic band and many, many more! The 40 projects contained in this science experiment e-book cover a wide range of scientific topics; from Chemistry and Electricity to Life Sciences and Physics... there are even experiments on earth science, astronomy and geology all designed for young students in grade 3! With this book, you are sure to find a project that interests you. When you are interested in a certain science topic, you will have more fun, and learn more, too! Designed with safety in mind, most of the items you will need for the experiments, such as jars, aluminium foil, scissors and sticky tape, you can find around your home. Others, such as magnets, lenses or a compass, you will be able to buy quite cheaply at a hobby shop or hardware store.

Mini Science Fun Rebecca Felix,2017-01-01 Imagine a volcano no bigger than a basketball, a tornado you can contain in a jar, and a tiny submarine that can fit in the palm of your hand. You can make each of these and more! No giant laboratory needed to design and create these experiments. Easy-to-follow instructions and detailed photos guide you through making your own miniature science experiments.

Experiment with Kitchen Science Nick Arnold,2019-10 Science isn't limited to the classroom--it can be cooked up in the kitchen! This photographic book of experiments and projects covers covers chemical reactions, states of matter, microbiology, and much more- all with ingredients and equipment that can be found in the kitchen. The STEAM Ahead series shows readers that science isn't limited to the classroom--it can be found out in the garden, cooked up in the kitchen, and brought to life with paper and paints! Each book features clear, step-by-step instructions and has a fresh, contemporary design, with an emphasis on fun, achievable experiments to give kids hands-on experiences. The science behind each experiment is explained, giving readers the theory behind the practical activities.

Fantastic Flying Fun with Science Edwin J. C. Sobey,2000 Suggests simple experiments that demonstrate the principles of aerodynamics and heavier-than-air flight, and provides advice on preparing related science projects.

The Curious Toddler's Science Activity Book Kailan Carr,2021-04-06 A play-and-learn science adventure for curious toddlers ages 1 to 3 Dive into the amazing world of science for toddlers. This giant collection of simple activities will help kids practice core science skills the way they learn best: through play! You can choose activities based on the skills developed, how long they take, or even how messy things might get. Best of all, every activity is designed for fun, which is the best way to help your little scientist learn and grow. This introduction to science for toddlers features: 100+ Educational activities--Explore activities that integrate science for toddlers, like building a rock tower, creating DIY playdough, or making things stick with static electricity. Labels for learning--Each experiment is labeled with the skills being taught, including observation, problem-solving, physics, biology, and more. Toddler teaching tips--Discover a brief overview of toddler development and milestones, as well as handy teaching advice that makes it easy to pick the right activities. Set kids up for a lifetime of learning with these super fun science-for-toddlers activities.
