**Programming Languages and Systems** Mooly Sagiv,2005-03-10 ETAPS 2005 was the eighth instance of the European Joint Conferences on Theory and Practice of Software. ETAPS is an annual federated conference that was established in 1998 by combining a number of existing and new conferences. This year it comprised five conferences (CC, ESOP, FASE, FOSSACS, TACAS), 17 satellite workshops (AVIS, BYTECODE, CEES, CLASE, CMSB, COCV, FAC, FESCA, FINCO, GCW-DSE, GLPL, LDTA, QAPL, SC, SLAP, TGC, UITP), seven invited lectures (not including those that were specific to the satellite events), and several tutorials. We received over 550 submissions to the five conferences this year, giving acceptance rates below 30% for each one. Congratulations to all the authors who made it to the final program! I hope that most of the other authors still found a way of participating in this exciting event and I hope you will continue submitting. The events that comprise ETAPS address various aspects of the system development process, including specification, design, implementation, analysis and improvement. The languages, methodologies and tools which support these activities are all well within its scope. Different blends of theory and practice are represented, with an inclination towards theory with a practical motivation on the one hand and soundly based practice on the other. Many of the issues involved in software design apply to systems in general, including hardware systems, and the emphasis on software is not intended to be exclusive.

The other is a devious trickster whose dark webs extend from the battlefield to intelligence networks the world over, as befitting a member of Obsidian Eyes. The greatest body versus the greatest mind... And as the forces in the shadows continue to move, chaos looms patiently on the horizon...

**Wild Bread** MaryJane Butters,2018-05-15 The owner of the historic Barron Flour Mill completely reinvents the concept of healthier-for-you, naturally fermented sourdough. Until now, sourdough was perceived as too much work and sour-tasting, artisan-style-only loaves. In Wild Bread, MaryJane Butters' quick and easy 1-minute 2x/day technique demonstrates the use of eight different types of flours for each bread featured—everything from gluten-free brown-rice flour to quinoa to common white to heirloom whole wheat—for a whopping 295 recipes and 475 photographs. Using her step-by-step method, every style of bread imaginable, including gluten-free, will loft with wild abandon without the purchase of a single packet of not-so-healthy, store-bought yeast. In nutritionally superior wild-yeast bread, fermentation triggers the release of vital nutrients and breaks down carbohydrates. In MaryJane's world, there's no such thing as too much bread because once you convert to slow-rise wild-bread making, that bagel you've been thinking about is more like a vitamin pill than a source of "carb-loaded" guilt. Lessons gleaned from MaryJane Butters' diverse pioneering background, from carpenter to dairy owner to former wilderness ranger turned organic farmer, led her eventually to stewardship of the 4-story, historic Barron Flour Mill. It was only natural that her years spent living on remote Forest Service fire-watch towers with only a living, breathing sourdough "mother" for companionship would lead her to write a pioneering wild-yeast bread book. "One of my favorite resources for beginners."—A Home Made from Scratch
