**Learning to Predict Climate Variations
Associated with El Nino and the Southern
Oscillation** National Research Council, Division on
Earth and Life Studies, Commission on Geosciences,
Environment and Resources, Advisory Panel for the
Tropical Oceans and Global Atmosphere Program
(TOGA Panel), 1997-01-12 The TOGA (Tropical Ocean
and Global Atmosphere) Program was designed to
study short-term climate variations. A 10-year
international program, TOGA made El Nino a
household word. This book chronicles the
cooperative efforts of oceanographers and
meteorologists, several U.S. government agencies,
many other nations, and international scientific
organizations to study El Nino and the Southern
Oscillation (ENSO). It describes the progression
from being unable to detect the development of
large climate variations to being able to make and
use rudimentary climate predictions, especially
for some tropical countries. It examines the

development of the TOGA Program, evaluates its accomplishments, describes U.S. participation in the program, and makes general recommendations for developing better understanding and predictions of climate variations on seasonal to interannual time scales.

Environmental Anthropology Helen Kopnina, Eleanor Shoreman-Ouimet, 2013-07-18 This volume presents new theoretical approaches, methodologies, subject pools, and topics in the field of environmental anthropology. Environmental anthropologists are increasingly focusing on self-reflection - not just on themselves and their impacts on environmental research, but also on the reflexive qualities of their subjects, and the extent to which these individuals are questioning their own environmental behavior. Here, contributors confront the very notion of natural resources in granting non-human species their subjectivity and arguing for deeper understanding of nature, and wilderness beyond the label of ecosystem services. By engaging in interdisciplinary efforts, these anthropologists present new ways for their colleagues, subjects, peers and communities to understand the causes of, and alternatives to environmental destruction. This book demonstrates that environmental anthropology has moved beyond the construction of rural, small group theory, entering into a mode of solution-based methodologies and interdisciplinary theories for understanding human-environmental interactions. It is focused on post-rural existence, health and environmental risk assessment, on the realm of alternative actions, and emphasizes the necessary

steps towards preventing environmental crisis.

The El Niño-Southern Oscillation Phenomenon

Edward S. Sarachik, Mark A. Cane, 2010-02-18 Many climatic extremes around the globe, such as severe droughts and floods, can be attributed to the periodic warming of the equatorial Pacific sea surface, termed the El Niño or Southern Oscillation (ENSO). Advances in our understanding of ENSO, in which Edward S. Sarachik and Mark A. Cane have been key participants, have led to marked improvements in our ability to predict its development months or seasons, allowing adaptation to global impacts. This book introduces basic concepts and builds to more detailed theoretical treatments. Chapters on the structure and dynamics of the tropical ocean and atmosphere place ENSO in a broader observational and theoretical context. Chapters on ENSO prediction, past and future, and impacts, introduce broader implications of the phenomenon. This book provides an introduction to all aspects of this most important mode of global climate variability, for research workers and students of all levels in climate science, oceanography and related fields.

Tendência temporal da mortalidade geral por suicídio no estado do Ceará/Brasil, 2000 a 2015

Jarlideire Soares Freitas, Raimunda Hermelinda Maia Macena, Carlos Henrique Alencar, Renato Evando Moreira Filho, Rosa Maria Salani Mota, 2020-05-06 O suicídio é definido como um comportamento no qual um indivíduo realiza autoagressão a fim de produzir dano a si próprio, e compreende as

ideações, tentativas e a consumação do óbito (Abreu et al., 2010). Há que se destacar que a problemática do suicídio é complexa, atingindo a humanidade de maneiras diferenciadas, por seu caráter multifacetado e por acarretar inúmeras consequências físicas, emocionais e sociais (Morais et al., 2016). Estima-se que a cada 40 segundos uma pessoa cometa suicídio em algum local do planeta (Who, W. H. O. R., 2014), o que significa que até 2020 mais de 1,5 milhões de pessoas irão cometer suicídio em todo mundo. Em 2015 ocorreram aproximadamente 800.000 mortes por suicídio no mundo, estando entre as 20 principais causas de morte e sendo considerada a segunda causa de morte por injúrias no mundo (Who, 2017b). Somente em 2014, na Europa, ocorreram mais de 58.000 mortes por suicídio e as tentativas sem êxito conseguem representar 20 vezes mais que esse número (Lovisi et al., 2009; Eurostat, 2014; Who, W. H. O. R., 2014; Freeman et al., 2017). Se pensarmos nas tentativas que não obtiveram êxito, essa problemática ganha números ainda maiores e reafirma a relevância dessa temática para a saúde pública (Who, 2017b).

Arid Lands Charles Hutchinson,2019-04-23 The international conference Arid Lands: Today and Tomorrow drew more than 400 participants from over 35 countries to Tucson, Arizona, for one week in October of 1985. The diversity of presenters, disciplines and subject matters addressed contributed to an interesting and informative conference. The papers presented in this volume represent the efforts of scientists and other individuals who, through their various disciplines, are addressing the problems of and opportunities presented by the arid lands of the world. A committee of five scientists reviewed for substance, relevance and their contribution to the conference the 284 abstracts that were submitted. They selected 146 for presentation at the conference and of those papers presented, 128 were received for inclusion in the proceedings.

Expansão da capacidade de ponta do Sistema Interligado Brasileiro Ana Lucia Rodrigues da Silva, 2022-06-20 Diante da contínua expansão das fontes renováveis de geração – competitivas, porém inflexíveis e não controláveis – o Planejamento do SEB projeta que a matriz brasileira terá de se adequar para atender ao requisito de capacidade de potência a partir de 2026, ou antes, mesmo apresentando equilíbrio estrutural entre oferta e demanda de energia. Essa necessidade é estimada no Plano Decenal de Expansão de Energia, da EPE, como 10 horas/mês. Na contramão, justamente as usinas que ofertam maior razão potência/energia são previstas para desmobilização após o término dos atuais contratos: as termelétricas a óleo combustível ou diesel, de alto CVU. De um lado, seria retrógrado que a matriz brasileira expandisse a partir de termelétricas a óleo. De outro, é contraditório o país abrir mão de uma importante infraestrutura existente e amortizada, com mínimo custo fixo e 100% flexível, justamente quando desponta o requisito de capacidade de potência e quando as termelétricas previstas para implantação possuem elevada inflexibilidade operativa. Nesse contexto, o “P&D Atendimento à Ponta” cumpre um importante papel ao explorar soluções não intuitivas e demonstrar a vantagem de manter ativas as usinas de alto CVU, sob a perspectiva do sistema e do consumidor. Por óbvio, a permanência dessas usinas deve estar refletida em competitividade econômica, a partir de receitas fixas mais baixas, que compensem o CVU elevado para as frequências de acionamento compatíveis com a necessidade sistêmica de capacidade de potência.

A Geografia Censurada: Cerceamentos à Produção e à Distribuição de Livros Didáticos Márcio

Abondanza Vitiello, 2020-06-24 O fim da Ditadura Militar (1964-1985), no Brasil, pôs fim à censura? Que interferências a Geografia Escolar estaria sofrendo nos dias de hoje? Em que medida o Currículo Oficial e o Programa Nacional do Livro Didático (PNLD) continuam a impor o poder do Estado na seleção dos conteúdos educacionais? Em favor de quem? E os múltiplos atores sociais – professores, pais de alunos, autores de livros didáticos, editores, mídia, mercado editorial – de que forma estariam interferindo nos temas e métodos tratados por essa disciplina escolar? As complexidades impostas por uma sociedade cada vez mais globalizada, interconectada e informacional no tocante à censura, à interdição e ao cerceamento aos conteúdos e métodos contidos nos livros didáticos de Geografia estão no centro deste debate. Em que medida as avaliações do PNLD não estabelecem um cerceamento da liberdade de expressão e representam uma interferência autocrática do Estado na formulação dos conteúdos e métodos? Por outro lado, o mercado também atua no controle dessas produções didáticas, por exemplo, nas restrições impostas pelas necessidades de lucro do mercado editorial e, principalmente, na ostensiva interferência dos meios de comunicação que promovem um patrulhamento ideológico dos programas educacionais. Daí surge o objeto de análise central deste livro, escrito pelo professor da Universidade Federal de Alfenas (MG) Márcio Vitiello, que é o de avaliar de que forma o Estado, as mídias e os diferentes atores

sociais de fato interferem – e até mesmo promovem – a censura nos conteúdos e métodos expressos nos livros didáticos e, conseqüentemente, nos conteúdos da Geografia Escolar brasileira nas primeiras décadas do século XXI.
