Funded! Richard Hoefer, 2017-06-02 **Funded!** leads readers from knowing nothing about writing grants to having a complete grant proposal. Based on personal experience and the experiences of dozens of professional nonprofit grantwriters, students learn about writing grants by completing exercises at the end of each chapter, moving from finding funding opportunities to submitting the completed proposal. The book covers every essential grantwriting topic: finding funding, writing needs statements, finding or developing evidence-based programs, developing logic models, writing evaluation plans, describing implantation plans, budgeting, sustainability planning, and submission to the funder. Overall, it is an invaluable resource that provides flexibility for instructors, students, and professionals to learn about grantwriting in a variety of settings and formats.

Four Steps to Funding Morgan Giddings, 2011-07-11 What goes on inside your grant reviewer's head? Understanding this is the key to avoiding rejection and getting your next grant funded. You may wonder...What is my reviewer really looking for? Did they reject my grant just because of politics? Why did one reviewer love my grant and another one hate it? How can I revise my grant to make it more fund-able? The answers lie within a four step process reviewers go through when they read your grant proposal - a process most reviewers aren't even aware they're doing. If you gloss over one of these steps - or worse, leave it out all together - your grant will be rejected, and you may get cryptic reviews back that don't explain why it was rejected or help you avoid another rejection. **Four Steps to Funding** gives you the simple process that will clarify your thinking, organize your proposal, and address reviewer objections before you submit your grant. Going far beyond the typical word-smithing and fill-in-the-blank examples of other grant writing books, 4 steps to funding gets into the mind of your reviewer and provides techniques for persuading him/her of the value of your work, your own credibility, and your approach. Written in an easy to read, engaging style, the concepts in this book are critical, for writing NIH or NSF grants. However, the concepts are easily applicable to Foundation, SBIR, or even business or non-profit proposals. It is your turn to crack the code, by learning the four steps that your next grant proposal must have in order to succeed. Your proposal will go beyond providing the facts and will get your reviewer excited about your work, and ready to fund it!

The Grant Writing and Funding Coach Deborah Griffiths, 2017-03-01 The 'Grant Writing and Funding Coach' is a framework for you to present your project in a clear and confident style, establish a rapport with funders and succeed with your proposal. In this book, you'll find short narrative and budget summaries for your review and checklists for staying organized while you're going through the application process. Believe in your project and funders will too!

From So What? to So Funded!: How Nonprofits Use Stories to Create Impact and Change the World Lisa Gerber, 2021-11-10 Jane has dedicated her life's work to a cause that matters. But something isn't working, and Jane is having a hard time getting people to support the great work her organization does. They don't seem to notice or care. So what? they say. It's frustrating because there's so much Jane wants to achieve, but she simply doesn't have the resources. And then Jane read a new book by master storyteller Lisa Gerber, and learned how to tell a compelling story. She learned to tell the right story at the right time to the right people. And in doing so, Jane uncovered beautiful stories that unlocked her audience's attention - and their wallets. Now, instead of asking, Who are you? they say, What do you need? Jane went from So what? to So funded! And so can you.

Intellectual Property Valuation and Innovation Ruth Taplin, 2013-10-15 With the recent global economic crisis, attitudes and practices in relation to intellectual property valuation are changing as exemplified by the dichotomy explained in this book, which makes it unique. While there has been a move towards global harmonisation in terms of valuation of both tangible and intangible assets that are based on innovation, there is also a tendency against global harmonisation because of cultural attitudes and practices of different countries. This can be seen most acutely in relation to intellectual property valuation in Asia, especially East Asia, which often differs from the West's perception of valuation. The book is written by experts in intellectual property, valuation and innovation who are mainly practitioners covering innovators, marketers, accountants, social innovators and business and management academics. The breadth and practitioner background of most of the contributors make the material relevant to those involved in valuation, economics, business, management, accounting and finance, law and maritime insurance. This book takes an interdisciplinary approach that cross-cuts all the above-mentioned disciplines and takes the understanding of intellectual property valuation to a new level.

Digital Kenya Bitange Ndemo, Tim Weiss, 2016-11-18 This book is open access under a CC BY 4.0 license. Presenting rigorous and original research, this volume offers key insights into the historical, cultural, social, economic and political forces at play in the creation of world-class ICT innovations in Kenya. Following the arrival of fiber-optic cables in 2009, Digital Kenya examines why the initial entrepreneurial spirit and digital revolution has begun to falter despite support from motivated entrepreneurs, international investors, policy experts and others. Written by engaged scholars and professionals in the field, the book offers 15 eye-opening chapters and 14 one-on-one conversations with entrepreneurs and investors to ask why

establishing ICT start-ups on a continental and global scale remains a challenge on the “Silicon Savannah”. The authors present evidence-based recommendations to help Kenya to continue producing globally impactful ICT innovations that improve the lives of those still waiting on the side-lines, and to inspire other nations to do the same.

Public Value Adam Lindgreen, Nicole Koenig-Lewis, Martin Kitchener, John D Brewer, Mark H. Moore, Timo Meynhardt, 2019-05-08 Over the last 10 years, the concept of value has emerged in both business and public life as part of an important process of measuring, benchmarking, and assuring the resources we invest and the outcomes we generate from our activities. In the context of public life, value is an important measure on the contribution to business and social good of activities for which strict financial measures are either inappropriate or fundamentally unsound. A systematic, interdisciplinary examination of public value is necessary to establish an essential definition and up-to-date picture of the field. In reflecting on the ‘public value project’, this book points to how the field has broadened well beyond its original focus on public sector management; has deepened in terms of the development of the analytical concepts and frameworks that linked the concepts together; and has been applied increasingly in concrete circumstances by academics, consultants, and practitioners. This book covers three main topics; deepening and enriching the theory of creating public value, broadening the theory and practice of creating public value to voluntary and commercial organisations and collaborative networks, and the challenge and opportunity that the concept of public value poses to social science and universities. Collectively, it offers new ways of looking at public and social assets against a backdrop of increasing financial pressure; new insights into changing social attitudes and perceptions of value; and new models for increasingly complicated collaborative forms of service delivery, involving public, private, and not-for-profit players.

Handbook of the Economics of Art and Culture, 2013-09-16 This volume emphasizes the economic aspects of art and culture, a relatively new field that poses inherent problems for economics, with its quantitative concepts and tools. Building bridges across disciplines such as management, art history, art philosophy, sociology, and law, editors Victor Ginsburgh and David Throsby assemble chapters that yield new perspectives on the supply and demand for artistic services, the contribution of the arts sector to the economy, and the roles that public policies play. With its focus on culture rather than the arts, Ginsburgh and Throsby bring new clarity and definition to this rapidly growing area. Presents coherent summaries of major research in art and culture, a field that is inherently difficult to characterize with finance tools and concepts Offers a rigorous description that avoids common problems associated with art and culture scholarship Makes details about the economics of art and culture accessible to scholars in fields

Why Startups Fail Tom Eisenmann, 2021-03-30 If you want your startup to succeed, you need to understand why startups fail. “Whether you’re a first-time founder or looking to bring innovation into a corporate environment, Why Startups Fail is essential reading.”—Eric Ries, founder and CEO, LTSE, and New York Times bestselling author of *The Lean Startup* and *The Startup Way* Why do startups fail? That question caught Harvard Business School professor Tom Eisenmann by surprise when he realized he couldn’t answer it. So he launched a multiyear research project to find out. In *Why Startups Fail*, Eisenmann reveals his findings: six distinct patterns that account for the vast majority of startup failures. • **Bad Bedfellows.** Startup success is thought to rest largely on the founder’s talents and instincts. But the wrong team, investors, or partners can sink a venture just as quickly. • **False Starts.** In following the oft-cited advice to “fail fast” and to “launch before you’re ready,” founders risk wasting time and capital on the wrong solutions. • **False Promises.** Success with early adopters can be misleading and give founders unwarranted confidence to expand. • **Speed Traps.** Despite the pressure to “get big fast,” hypergrowth can spell disaster for even the most promising ventures. • **Help Wanted.** Rapidly scaling startups need lots of capital and talent, but they can make mistakes that leave them suddenly in short supply of both. • **Cascading Miracles.** Silicon Valley exhorts entrepreneurs to dream big. But the bigger the vision, the more things that can go wrong. Drawing on fascinating stories of ventures that failed to fulfill their early promise—from a home-furnishings retailer to a concierge dog-walking service, from a dating app to the inventor of a sophisticated social robot, from a fashion brand to a startup deploying a vast network of charging stations for electric vehicles—Eisenmann offers frameworks for detecting when a venture is vulnerable to these patterns, along with a wealth of strategies and tactics for avoiding them. A must-read for founders at any stage of their entrepreneurial journey, *Why Startups Fail* is not merely a guide to preventing failure but also a roadmap charting the path to startup success.
